Shadows in the Sea Harold Weber McCormick, Thomas B. Allen, William Edward Young, 2012-09-01 **Shadows in the Sea** Thomas B. Allen, 1996 *Shadows in the Sea* Harold W. McCormick, 2017-08-08 Captain Young and I for some years have been gathering material from all over the world about the Selachians the Sharks Skates Rays and their allies of which there are more than 600 known species We originally intended merely to up date Captain Young s book *Shark Shark* published by Gotham House in 1934 and now a collector s item but as the material ever expanded it was decided that an entirely new book covering a much broader field was needed Adaterial was collected from all over the world for many years When Captain Young and I felt that the research was nearly completed we called upon Tom Allen an experienced newspaperman to aid us in transforming the research material into a book Tom and I continued the research up to and beyond the completion of the manuscript Tom also did further research and added new material in the course of writing the book In all scientific classifications the Selachians are separated clearly from the Teleosteans or Bony Fishes and there are even leading ichthyologists ho do not regard the former as fishes at all but rather as representing a separate and distinct Class of animal life *Shadows in the Sea. Vertebrates V.L. Bels, M. Chardon, P. Vandewalle, 2012-12-06 Although feeding is not yet been thoroughly studied in many vertebrates taxa and different conceptual and methodological approaches of the concerned scientists make a synthesis difficult the aim of the editors is to provide a comprehensive overview of the feeding design in aquatic and terrestrial vertebrates with a detailed description of its functional properties The book emphasizes the constant interaction between function and form behaviour and morphology in the course of evolution of the feeding apparatus and way of feeding both complementary and basically related to survival interspecific competition adaptation to environmental changes and adaptive radiations Special stress is drawn on quantification of the observational and experimental data on the morphology and biomechanics of the feeding design and its element jaws teeth hyoid apparatus tongue in order to allow present and further comparisons in an evolutionary perspective **The Real Jaws** Rachel Lee Perez, 2025-08-30 Explores the 1916 New Jersey shark attacks their impact on shark fear and how media shaped harmful misconceptions In the Summer of 1916 a series of shark attacks along the New Jersey shore would send shockwaves across its otherwise peaceful beach towns Spanning a terrifying two weeks including the deaths of nearly five people these attacks would officially cement an innate fear of sharks that humans have felt since the beginning of time Although initially kept under wraps by the tourism industry

these attacks would ultimately plaster the front pages of newspapers across the United States and even overseas As the news spread the line between fact and fiction blurred reshaping our cultural and scientific understanding of the beasts of the ocean It was the 1916 shark attacks that would establish our modern day misconstrued perception of sharks as evil man eating monsters and would later inspire the film Jaws which would perpetuate the same harmful narrative The Real Jaws takes an in depth look at each one of the attacks and how they instilled a centuries long fear of the ocean s apex predator It explores the various theories explaining why these attacks may have occurred and the probability of something like this happening again And finally it analyses the way the harmful misconceptions derived from films like Jaws have redefined humanity s relationship with sharks leading humans to become the predators and sharks to become the prey

Demon Fish Juliet Eilperin, 2011-06-14 A group of traders huddles around a pile of dried shark fins on a gleaming white floor in Hong Kong A Papua New Guinean elder shoves off in his hand carved canoe ready to summon a shark with ancient magic A scientist finds a rare shark in Indonesia and forges a deal with villagers so it and other species can survive In this eye opening adventure that spans the globe Juliet Eilperin investigates the fascinating ways different individuals and cultures relate to the ocean s top predator Along the way she reminds us why after millions of years sharks remain among nature s most awe inspiring creatures From Belize to South Africa from Shanghai to Bimini we see that sharks are still the object of an obsession that may eventually lead to their extinction This is why movie stars and professional athletes go shark hunting in Miami and why shark s fin soup remains a coveted status symbol in China Yet we also see glimpses of how people and sharks can exist alongside one another surfers tolerating their presence off Cape Town and ecotourists swimming with sharks that locals in the Yucatán no longer have to hunt With a reporter s instinct for a good story and a scientist s curiosity Eilperin offers us an up close understanding of these extraordinary mysterious creatures in the most entertaining and illuminating shark encounter you re likely to find outside a steel cage

Twelve Days of Terror Richard G. Fernicola, 2016-05-02 Upon the 100th anniversary of the most terrifying stretch of shark attacks in American history a wave said to have been the inspiration for Jaws comes a reissue of the classic Lyons Press account and investigation In July 1916 a time when World War I loomed over America and New York City was in the midst of a deadly polio epidemic the tri state area sought relief at the

Jersey shore The Atlantic s refreshing waters proved to be utterly inhospitable however In just twelve days four swimmers were violently and fatally mauled in separate shark attacks and a fifth swimmer escaped an attack within inches of his life In this thoroughly researched account Dr Richard Fernicola the leading expert on the attacks presents a riveting portrait investigation and scientific analysis of the terrifying days against the colorful backdrop of America in 1916 in Twelve Days of Terror

Shark Dean Crawford,2008-08-01 A sleek hunter of the seas the shark has struck fear into the hearts of men since the days of the first fishermen Dean Crawford now explores here the long relationship between shark and man revealing that behind the fearsome caricature is a complex animal that deserves a thoughtful reconsideration With a lineage stretching back over 100 million years the shark has evolved into 350 different species from the great white to the pike bearing goblin to the tiny cookie cutter Crawford compiles here a fascinating narrative that analyzes how and why the animal looms large in our cultural psyche While sharks have played a prominent part in religion and mythology they are more commonly perceived as deadly predators in such films as Jaws and Dr No or as symbols of natural violence as in Hemingway s Islands in the Stream Shark ultimately argues however that our ill informed emotional responses spurred by such representations have encouraged the wholesale slaughter of sharks and our ignorance endangers the very existence of the shark today Both a celebration of their lethal beauty and plea for their conservation Shark urges us to shed our fears and appreciate the magnificence of this majestic animal

Sharks and Rays Fog City Press,2003 Encourages a better understanding of these creatures a chance to get closer to their real life world be it on a dive in their natural habitat or a visit to an aquarium
