The Arabian Peninsula Derek Hopwood, 2015-07-24 Although the Arabian Peninsula is the heartland of Islam and of the Arab world for decades it did not receive the attention it deserves from scholars and writers The School of Oriental and African Studies University of London and the Middle East Centre of St Antony's College Oxford jointly organized a series of

seminars culminating in a conference at which the papers in this volume first published in 1972 were discussed Together they constitute an authoritative statement of our present knowledge of several areas of the Peninsula with particular emphasis on the Gulf States Three chapters trace the history of Oman from pre Islamic times to the recent past and in so doing emphasize the theme of continuing conflict between sultan and imam Other chapters examine the Gulf and the Peninsula from the standpoint of inter Arab and of international relations The third section of the book is devoted to a discussion of the increasing rate of social change in the area and the final section deals with problems of oil and state and of economic development Religion, Education and Governance in the Middle East Sai Felicia Krishna-Hensel,2016-04-08

The Middle East is a key geopolitical strategic region in the international system but its distinctive cultural and political divisions present a mosaic of states that do not lend themselves to simplistic interpretations A thoughtful analysis of the Middle East requires an understanding of the synergism between tradition and modernity in the region as it adapts to a globalizing world Religious education and activism continue to remain a significant factor in the modernization process and the development of modern governance in the states of the Middle East This interdisciplinary book explores the historical and contemporary role of religious tradition and education on political elites and governing agencies in several major states as well as generally in the region The relationship between democracy and authority is examined to provide a better understanding of the complexity underlying the emergence of new power configurations As the region continues to respond to the forces of change in the international system it remains an important and intriguing area for analysts *Fueling*

Sovereignty Naosuke Mukoyama,2024-03-21 European colonialism was often driven by the pursuit of natural resources and the resulting colonization and decolonization processes have had a profound impact on the formation of the majority of sovereign states that exist today But how exactly have natural resources influenced the creation of formerly colonized states And would the world map of sovereign states look significantly different if not for these resources These questions are at the heart of *Fueling Sovereignty* which focuses primarily on oil as the most significant natural resource of the modern era Naosuke Mukoyama provides a compelling analysis of how colonial oil politics contributed to the creation of some of the world s most unlikely states Drawing on extensive archival sources on Brunei Qatar and Bahrain he sheds light on how some small colonial entities achieved independence despite their inclusion in a merger project promoted by the metropole and regional powers **Reinventing the Sheikdom** Matthew Hedges,2022-04-01 Though the Arab Spring has reverberated through the Middle East largely leaving a path of destruction the relative calm in the United Arab Emirates has offered a regional roadmap for stability Domestic changes since 2000 have significantly altered the country s dynamics firmly cementing power within Abu Dhabi While Khalifa bin Zayed succeeded his father as emir of Abu Dhabi and UAE president in 2004 the Emirates evolution has largely been accredited to Abu Dhabi s crown prince Mohammed bin Zayed His reign has been characterized by the rise of the security apparatus and a micromanaged approach to governance Mohammed bin Zayed

s strategy of fortification has focused on pre-empting threats from the UAE's native population rather than from expatriates or foreign actors. As a result, he has consolidated power by distributing its administration among his tribal and kinship allies. In essence, Mohammed bin Zayed has driven modernization in order to strengthen his grasp on power. This book explores Mohammed bin Zayed's regime security strategy, illustrating the network of alliances that seek to support his reign and that of his family. In an ever-turbulent region, the UAE remains critical to understanding the evolution of Middle Eastern authoritarian control.

The Arabian Frontier of the British Raj James Onley, 2007-11-22 The Arabian Frontier of the British Raj is a study of one of the most forbidding frontier zones of Britain's Indian Empire. The Gulf Residency, responsible for Britain's relationship with Eastern Arabia and Southern Persia, was part of an extensive network of political residencies that surrounded and protected British India. Based on extensive archival research in both the Gulf and Britain, this book examines how Britain's Political Resident in the Gulf and his very small cadre of British officers maintained the Pax Britannica on the waters of the Gulf, protected British interests throughout the region, and managed political relations with the dozens of Arab rulers and governors on both shores of the Gulf. James Onley looks at the secret to the Gulf Residency's effectiveness: the extent to which the British worked within the indigenous political systems of the Gulf. He examines the way in which Arab rulers, in need of protection, collaborated with the Resident to maintain the Pax Britannica, while influential men from affluent Arab, Persian, and Indian merchant families served as the Resident's native agents or compradors in over half of the political posts within the Gulf Residency.

Genealogical History in the Persianate World Jo-Ann Gross, Daniel Beben, 2025-06-26 Scholarship on the Muslim world has recently begun to pay increased attention to non-literary genres of documentation as sources for historical research. Genealogical writings are one form of such documentation that has demonstrated significant potential for addressing a wide range of research concerns, particularly for topics that receive little attention in historical chronicles and other state-centered narrative sources. However, while genealogical documentation has received some attention in scholarship on the Arab world, it remains mostly unstudied in scholarship on Persianate societies. The chapters in this book offer reflections on theoretical and methodological issues concerning the study of genealogical documentation, combined with case studies based primarily on previously unpublished, unstudied source materials. The topics explored span the full breadth of the Persianate world, from Anatolia to the Ferghana Valley in Central Asia to the Gujarat region of India, utilizing sources dating from the fourteenth to the twentieth century. The book will be of significant interest to scholars and students of Islamic history and the Persianate ecumene, as well as readers in other fields interested in comparative research demonstrating the use of genealogical documentation as historical sources.

The Persian Gulf in History L. Potter, 2009-01-05 Exploring the history of the Persian Gulf from ancient times until the present day, leading authorities treat the internal history of the region and describe the role outsiders have played there. The book focuses on the unity and identity of Gulf society and how the Gulf historically has been part of a cosmopolitan Indian Ocean world.

Music in Arabia Issa

Boulos, Virginia Danielson, Anne K. Rasmussen, 2021-09-07 Music in Arabia extends and challenges existing narratives of the region's distinctive but understudied music to reveal diverse and dynamic music cultures rooted in centuries-old heritage. Contributors to Music in Arabia bring a critical eye and ear to the contemporary soundscape, musical life, and expressive culture in the Gulf region. Including work by leading scholars and local authorities, this collection presents fresh perspectives and new research addressing why musical expression is fundamental to the area's diverse transnational communities. The volume also examines music circulation as a commodity such as with the production of early recordings, the transnational music industry, the context of the Arab Spring, and the region's popular music markets. As a bonus, readers can access a linked website containing audiovisual examples of the music, dance, and expressive culture introduced throughout the book. With the work of resident scholars and heritage practitioners in conversation with that of researchers from the United States and Europe, Music in Arabia offers both context and content to clarify how music articulates identity and nation among multiethnic, multiracial, and multinational populations. The City in the Ottoman Empire Ulrike Freitag, Malte Fuhrmann, Nora Lafi, Florian Riedler, 2010-11-25 This book examines the city in the Ottoman Empire as a thoroughfare and destination of human migration. Drawing upon case studies from across the Middle East and Europe, it provides new insights on Ottoman institutions and the structure of society. Middle East: Tricontinental Hub: A bibliographic survey United States. Department of the Army, 1965 Beyond Sunni and Shia Frederic Wehrey, 2018-02-01 This collection seeks to advance our understanding of intra-Islamic identity conflict during a period of upheaval in the Middle East. Instead of treating distinctions between and within Sunni and Shia Islam as primordial and immutable, it examines how political economy, geopolitics, domestic governance, social media, non- and sub-state groups, and clerical elites have affected the transformation and diffusion of sectarian identities. Particular attention is paid to how conflicts over distribution of political and economic power have taken on a sectarian quality and how a variety of actors have instrumentalized sectarianism. The volume, covering Syria, Iraq, Lebanon, Saudi Arabia, and the Gulf, Iran, and Egypt, includes contributors from a broad array of disciplines, including political science, history, sociology, and Islamic studies. Beyond Sunni and Shia draws on extensive fieldwork and primary sources to offer insights that are empirically rich and theoretically grounded but also accessible for policy audiences and the informed public. **Report of the Special Study Mission to the Near East Comprising Representative Edward R. Roybal, Chairman, Representative E. Ross Adair, Representative J. Irving Whalley, Representative E. Y. Berry of the Committee on Foreign Affairs** United States. Congress. House. Special Study Mission to the Near East, 1967 **The Birth of Saudi Arabia** Gary Troeller, 2013-10-23 First published in 1976, today the name Saudi Arabia evokes images of desert wastes, limitless reservoirs of oil, and economic might. When one thinks of the predominant foreign power concerned with the desert kingdom, one thinks of the United States. Forty years ago, oil had yet to be discovered; Ibn Saud had just unified the greater part of the Arabian Peninsula, and Great Britain exercised paramount influence at the Saudi Court.

This book deals with the drama of the immediate pre oil era and sets the stage for the Saudi Arabia of today The following pages examine in detail the unification of Arabia and British policy towards Ibn Saud during the early twentieth century when he laid the foundations of present day Saudi Arabia
