African Military History John Lamphear, 2017-05-15 This collection of essays on pre colonial sub Saharan African military history is drawn from a number of academic journals and includes some which are considered

milestones in African historiographical discourse as well as others which while lesser known provide remarkable insight into the unique nature of African military history. Selections were made so as to produce an introduction to the understudied field of pre colonial African military history that will be useful to specialists and non specialists alike. The volume also contains an introduction which presents one of the first significant reviews of pre colonial African military historiography ever attempted.

The Code of the Warrior Shannon E. French, 2025-08-21. Combining ethics, history and psychology, *The Code of the Warrior* examines historical and contemporary warrior cultures, arguing that today's warriors need a code to navigate the moral line between soldier and killer. Exploring the roots of military ethics, this third edition of *The Code of the Warrior* furthers author Shannon French's argument that modern troops need a code to shield their humanity as they endure the horrors of war. Stories of ancient Greek and Roman soldiers, Chinese warrior monks, Vikings, Celts, Japanese samurai, medieval European knights, Islamic warriors, and Zulu warriors combine with contemporary perspectives on modern day warfare's latest technologies and power structures to present a truly global and timeless case for the exercise of restraint in warfare, primarily for the benefit of those doing the fighting. This third edition includes updated first and last chapters addressing the need for warrior codes throughout history and in today's military climate. A new chapter on the famous Zulu warrior Chief Shaka makes the important distinction between a warrior and a strongman. Incorporating philosophy with history, religion, anthropology, sociology, and moral psychology, French addresses concepts like honor, courage, commitment, sacrifice, duty, and loss which resonate within and beyond military service. She also presents thoughtful answers to complex questions such as: Why should one side of a conflict show restraint if the other side does not? How can a command climate become corrupted? What is the difference between a warrior and a murderer or a terrorist or a strongman? How do changes in technology affect the conduct of war? The topics explored in this volume have real world implications and applications, and French provides analysis grounded in her own decades of work with and for members of the U.S. military, as well as her extensive international scholarship in military ethics. It is a must read book for anyone interested in how wars can be fought ethically and how warriors can be spared the worst moral injury that comes from betraying their own chosen core values.
