current philosophical debates **The Waning of Humaneness** Konrad Lorenz,1987 **The Natural Science of the Human Species** Konrad Lorenz,1997-08 This translation contains a synopsis of all the ideas that made Lorenz famous as the founder of ethology the study of comparative animal behavior edited from the author s posthumous works by Agnes von Cranach Here Am I Where Are You The Behavior of the Greylag Goose was thought to be Konrad Lorenz s last book However in 1991 the Russian Manuscript was discovered in an attic and its subsequent publication in German has become a scientific sensation Written under the most extreme conditions in Soviet prison camps the Russian Manuscript was the first outline of a large scale work on behavioral science This translation contains a synopsis of all the ideas that made Lorenz famous as the founder of ethology the study of comparative animal behavior **Civilized Man's Eight Deadly Sins** Konrad Lorenz,1974 Essays on destructive influences of the modern environment on human behavior Homo Sapiens Antonio Vélaz Montoya,2013-08-20 The themes discussed in this book translated to English by Australian Kieran Tapsell form part of a revolutionary discipline known under the name of evolutionary psychology a discipline that has become the most powerful tool discovered to date for man to understand himself Much of the knowledge revealed by human science is explained as a result of the evolutionary process using as a premise the theory that the majority of modern man s desires impulses interests and inclinations and mental faculties were designed by the evolutionary process of the species This new focus allows us to synthesize a group of already established findings coming from such diverse disciplines as genetics evolution ethology anthropology psychology neurology and epistemology In this way it is possible to explain an important part of complex human behavior under one sole unifying principle the direct or indirect search for a greater reproductive efficacy With this work easily readable by the general public the author completes a cycle of subjects that he had begun with From the Big Bang to Homo Sapiens 2004 a book published in Spanish by Villegas Editores **From Islam To Islamism, From Islamic Fundamentalism To Jihadism** Christoph S.,2024-10-16 The aim of this work is to warn of worse things to come by means of an ideology critical analysis of Islamic fundamentalism The argument Nobody could have known that which in reality should read Nobody wanted to know that is today once again beginning to promote the wishful thinking of an inherently tolerant and peaceful Islam If no balance can be achieved between Western and Quranic thinking the worst must be expected The supra naturalistic value system of Islam is to be critically reflected upon from the philosophical position of realism understood as a value neutral collective term for many philosophical currents which assumes the existence and at least partial recognizability of an extra subjectively existing external world *Critical Ethology and Post-Anthropocentric Ethics* Roberto Marchesini,Marco Celentano,2021-05-22 The primary purpose of this book is to contribute to an overcoming of the traditional separation between humanities and life sciences which according to the authors is required today both by the developments of these disciplines and by the social problems they have to face The volume discusses the theoretical epistemological and ethical repercussions of the main acquisitions obtained in the last decades from the behavioral sciences

Both the authors are inspired by the concept of a critical ethology oriented to archive the nature culture and human animal dichotomies The book proposes a theoretical and methodological restructuring of the comparative study of the animal behavior learning and cultures focused on the fact that thought culture and language are not exclusively human prerogatives The proposed analysis includes a critique of speciesism and determinism in the ethical field and converge with the Humanities to which the series is dedicated on a key point it is necessary to arrive at an education system able to offer scientific social and ethical skills that are transversal and transcendent to the traditional humanities life sciences bipartition Skills that are indispensable for facing the complex challenges of the contemporary society and promoting a critical reflection of humanity on itself
