*Forgetting Lot's Wife* Martin Harries, 2009-08-25 Can looking at disaster and mass death destroy us Forgetting Lot's Wife provides a theory and a fragmentary history of destructive spectatorship in the twentieth century Its subject is the notion that the sight of historical catastrophe can destroy the spectator The fragments of this history all lead back to the story of Lot's wife looking back at the destruction of the cities of Sodom and Gomorrah she turns into a pillar of salt This biblical story of punishment and transformation a nexus of sexuality sight and cities becomes the template for the modern fear that looking back at disaster might petrify the spectator Although rarely articulated directly this idea remains powerful in our culture This book traces some of its aesthetic theoretical and ethical consequences Harries traces the figure of Lot's wife across media In extended engagements with examples from twentieth century theater film and painting he focuses on the theatrical theory of Antonin Artaud a series of American films and paintings by Anselm Kiefer These examples all return to the story of Lot's wife as a way to think about modern predicaments of the spectator On the one hand the sometimes veiled figure of Lot's wife allows these artists to picture the desire to destroy the spectator on the other she stands as a sign of the potential danger to the spectator These works that enact critiques of the very desire that inspires them The book closes with an extended meditation on September 11 criticizing the notion that we should have been destroyed by witnessing the events of that day

**Bad Foods** Michael Oakes, 2017-10-24 Bad Foods demonstrates how a variety of historical or political events and personalities have shaped our current views of good nutrition On several occasions in American history concerns have arisen over the safety of our food supply e.g. harmful ingredients in processed foods and the potential that processing might deplete foods of their nutrients These concerns help explain how food characteristics such as freshness natural organic and unprocessed have become important to Americans Bad Foods traces how the food nutrients fat salt and sugar have acquired negative reputations for health as well as any controversies and outright misconceptions of the dangers of these nutrients Bad Foods also explores confusion that can in part be attributed to biased media coverage about foods Modern Americans are routinely bombarded with information about the health value of certain foods and the dangers of others Frequently health information about certain nutrients receives exaggerated coverage e.g. dietary fat while the importance of other nutrients gets ignored e.g. vitamins and minerals Moreover health information about foods is often perceived as contradictory While some readers may be startled by what they perceive to be a challenge to sacred beliefs about foods others will see the honesty in both the research and the writing and recognize the social benefits of examining our beliefs about foods Bad Foods will be of interest to sociologists food science specialists and social historians

**Why Did God Create Viruses, Bacteria, and Other Pathogens?** Jerry Bergman, James Hoff, 2023-05-23 The question Why did God create viruses bacteria pathogens venomous creatures and poisonous chemicals is usually asked by irreligious skeptics to challenge God's authority design and goodness It is also asked by those of faith either out of innocent ignorance or curiosity Life per se is a balance of life forms co-existing because they

were created by God by means of obvious intelligent design The authors show the vast majority of bacteria viruses and insects are beneficial The reason some pathogens are harmful is discussed in some detail Furthermore the role of toxic chemicals which are beneficial and even essential to human and animal life at low to moderate concentrations is also covered The authors conclusions are well documented by several hundred peer reviewed scholarly articles and books if you have ever wondered about why in God s creation there are parasites and pathogens ticks and toxins maladies and mosquitoes then you owe it to yourself to consider the scholarly explanations that set the record straight the professional perspective of Bergman and Hoff If you are looking for sound scientific answers to the question Why did God create life forms that have harmful side effects to other organisms this is the book to read [The Miracles of the Sacred Scripture](#) Augustine of Hippo,D.P. Curtin,2023-06-22 This medieval Irish work recounts the author s motivation and rationale for writing three books on the Holy Scriptures prompted by the commands of his father and the encouragement of the Christian community He reflects on the historical context and spiritual significance of the Scriptures emphasizing the importance of obedience to divine commands despite personal inadequacies The work is structured into three volumes focusing on the Pentateuch the Prophets and the New Testament with a goal to clarify the divine governance of creation and to present the historical accounts without delving into allegorical interpretations The author seeks validation from readers regarding the significance of his work
