Man, Medicine and Morality Archibald Edmund Clark-Kennedy, 1969-01 **Man, Medicine and Morality** Lalit K. Kothari, 2008 **Medicine, Morals and Man** Ernest Edward Claxton, Herbert Alwyn Cochrane McKay, 1969 *Social and Psychological Aspects of Applied Human Genetics* James R. Sorenson, 1972 About 1400 references to books and journal articles primarily concerned with social and psychological issues of applied human genetics in general and genetic counseling in particular Excludes literature dealing with ethical or proscriptive areas Also covers foreign language titles Citations mostly from 1960 s through 1972 Classified arrangement No index *Descartes's Moral Theory* John Marshall, 2018-09-05 Most Cartesian scholars focus on the metaphysical and epistemological aspects of the philosopher's texts In this long awaited volume John Marshall invites us to reconsider Ren Descartes as an ethicist Through an unconventional study of his statements about morality found in such writings as the Discourse on the Method the Passions of the Soul and various correspondence Marshall shows how Descartes confirmed and elaborated his earlier provisional morality in his later works Marshall demonstrates that Descartes left a fully developed conception of moral virtue and happiness along with other accounts of values and norms and he expands on these accounts to describe Cartesian moral theory as a whole He discusses the morale par provision of the Discourse treats Descartes's final morality by focusing on his account of virtue and sets out a Cartesian theory of value and system of duties Throughout the text he uses numerous quotations to illustrate Descartes's comments on ethics and he considers views of other commentators such as Gueroult, 1915 *The Ethics of Medical Homicide and Mutilation* Austin O'Malley, 1919 **The Structure of a Moral Code** John Ladd, 2004-01-28 Mr Ladd here presents a philosophical analysis of the nature and structure of a moral code He exemplifies his general theory by providing the first systematic description of Navajo ethics based on raw material gathered by intensive anthropological field work among the Navajo The complete transcript of his field notes is contained in the Appendix to this book Mr Ladd shows how the codes of other societies can be described with scientific rigor and objectivity Drawing upon recent developments in analytical ethics that emphasize the uses of discourse and the logic of imperatives he develops a general theory of moral codes which holds considerable significance for moral philosophers and which presents for anthropologists a methodology for their investigations into the ethical systems of non literate cultures The Origin and Development of the Moral Ideas Edward Westermarck, 1906 **Race and the Scottish Enlightenment** Linda Andersson Burnett, Bruce Buchan, 2025-08-19 How colonialism shaped the Scottish Enlightenment's conception of race and humanity In the decades after 1750 an increasing number of former medical students from the University of Edinburgh construed humanity as a subject of both intellectual curiosity and colonial interest They drew on a shared educational background blending medicine with natural history and moral philosophy in a range of encounters with non European and Indigenous peoples across the globe whom they began to classify as races Focusing on a surprising number of these understudied

students this book reveals the gradual predominance of race in Scottish Enlightenment thought Teaching provided a toolbox of concepts and theories for students who went on to careers as military and naval surgeons colonial administrators and natural historians While some such as Mungo Park who traveled in Africa are well known many others such as the long term residents in the Russian Empire Matthew Guthrie and his wife Maria Guthrie or the Caribbean botanist Alexander Anderson are less remembered Among this group were those such as the Pacific traveler Archibald Menzies and the circumnavigator of Australia Robert Brown who are known primarily as botanists rather than as ethnographers Together they formed a global network of colonial travelers and natural historians sharing a common educational background and a growing interest in race
