Management Of Radioactive Wastes:

Radioactive Waste Management In The 21st Century William R Roy, 2021-06-10 The safe management of radioactive wastes is of paramount importance in gaining both governmental and societal support for nuclear energy The scope of this new textbook is to provide a comprehensive perspective on all types of radioactive wastes as to how they are created classified characterized and disposed Written to emphasize how geology and radionuclide chemistry impact waste management this book is primarily designed for engineers who have little background in geology with low level wastes decommissioning wastes high level wastes and spent nuclear fuel This textbook provides the most up to date information available on waste management in several countries The content of this work includes transporting radioactive materials to disposal facilities The textbook cites numerous case studies to illustrate past practices current methodologies and to provide insights on how radioactive wastes may be managed in the future An international perspective on waste management is also provided to help the readers better understand the diversity in approaches while highlighting what many countries have in common Review questions for classroom use are provided at the end of each chapter Related Link s **Improving the Regulation and Management of Low-Activity Radioactive Wastes** National Research Council, Division on Earth and Life Studies, Board on Radioactive Waste Management, Committee on Improving Practices for Regulating and Managing Low-Activity Radioactive Wastes, 2003-10-14 Low activity radioactive wastes include a broad spectrum of materials for which a regulatory patchwork has evolved over almost 60 years These wastes present less of a radiation hazard than either spent nuclear fuel or high level radioactive waste Low activity wastes however may produce potential radiation exposure at well above background levels and if not properly controlled may represent a significant chronic and in some cases an acute hazard For some low activity wastes the present system of controls may be overly restrictive but it may result in the neglect of others that pose an equal or higher risk The purpose of this interim report is to provide an overview of current low activity waste regulations and management practices Improving the Regulation and Management of Low Activity Radioactive Wastes Interim Report on Current Regulations Inventories and Practices identifies gaps and inconsistencies that suggest areas for improvements The final report will assess options for improving the current practices and provide recommendations

Radioactive Waste Management James Saling, 2018-04-27 This reviews sources of radioactive waste and introduces radioactive decay and radiation shielding calculations It covers technical and regulatory aspects of waste management with discussion questions at the end of each chapter to provide an opportunity to explore the many facets of waste management issues An extensive reference list at the end of each chapter retains the references from the first edition of the book and incorporates references used in preparing this revised text giving readers an opportunity to look at historical records as well as current information **Radioactive Waste Processing and Disposal** U.S. Nuclear Regulatory Commission, U.S. Nuclear Regulatory Commission. Ojovan,Carol M Jantzen,2013-10-31 Radioactive waste management and contaminated site clean up reviews radioactive waste management processes technologies and international experiences Part one explores the fundamentals of radioactive waste including sources characterisation and processing strategies International safety standards risk assessment of radioactive wastes and remediation of contaminated sites and irradiated nuclear fuel management are also reviewed Part two highlights the current international situation across Africa Asia Europe and North America The experience in Japan with a specific chapter on Fukushima is also covered Finally part three explores the clean up of sites contaminated by weapons programmes including the USA and former USSR Radioactive waste management and contaminated site clean up is a comprehensive resource for professionals researchers scientists and academics in radioactive waste management governmental and other regulatory bodies and the nuclear power industry Explores the fundamentals of radioactive waste including sources characterisation and processing strategies Reviews international safety standards risk assessment of radioactive wastes and remediation of contaminated sites and irradiated nuclear fuel management Highlights the current international situation across Africa Asia Europe and North America specifically including a chapter on the experience in Fukushima Japan *Improving the Characterization and Treatment of Radioactive Wastes for the Department of Energy's Accelerated Site Cleanup Program* National Research Council,Division on Earth and Life Studies,Board on Radioactive Waste Management,Committee on Opportunities for Accelerating Characterization and Treatment of Waste at DOE Nuclear Weapons Sites,2005-02-06 The Department of Energy

s Office of Environmental Management EM directs the massive cleanup of more than 100 sites that were involved in the production of nuclear weapons materials during the Manhattan Project and the Cold War This report offers suggestions for more effectively characterizing and treating the orphan and special case wastes that are part of EM s accelerated cleanup program It identifies technical opportunities for EM to improve the program that will save time and money without compromising health and safety The opportunities identified include making more effective use of existing facilities and capabilities for waste characterization treatment or disposal eliminating self imposed requirements that have no clear technical or safety basis and investing in new technologies to improve existing treatment and characterization capabilities For example the report suggests that EM work with DOE classification officers to declassify to the extent possible classified materials declared as wastes The report also suggests a new approach for treating the wastes that EM will leave in place after cleanup Long-term Management of Radioactive Waste OECD Nuclear Energy Agency,1984 **Disposition of**

High-Level Waste and Spent Nuclear Fuel National Research Council,Division on Earth and Life Studies,Board on Radioactive Waste Management,Committee on Disposition of High-Level Radioactive Waste Through Geological Isolation,2001-06-05 Focused attention by world leaders is needed to address the substantial challenges posed by disposal of spent nuclear fuel from reactors and high level radioactive waste from processing such fuel The biggest challenges in achieving safe and secure storage and permanent waste disposal are societal although technical challenges remain Disposition of radioactive wastes in a deep geological repository is a sound approach as long as it progresses through a stepwise decision making process that takes advantage of technical advances public participation and international cooperation Written for concerned citizens as well as policymakers this book was sponsored by the U S Department of Energy U S Nuclear Regulatory Commission and waste management organizations in eight other countries
