and potential impacts To facilitate a better understanding of contemporary business practice in Africa through the application of relevant theories and models including emergent ones The Routledge Companion to Business in Africa is a comprehensive reference resource that provides the perfect platform for embarking on research and study into Africa from the business perspective [Africa in China's Global Strategy](#) Marcel Kitissou, 2007-08-31 China in the past five years has developed a proactive global policy and is emerging as a new global power with particular focus on developing countries in Central Asia Southeast Asia Latin America and Africa What is the role of Africa in China's emerging global foreign policy In 1998 China's aid to Africa was 107 million By 2004 it had reached 2.7 billion 26% of its international assistance that year In 2005 Africa-China trade reached 40 billion 35% up from the previous year China is interested mainly in four sectors infrastructure projects regional banks such as the African Development Bank training of African professionals particularly in economic management and institutions of higher education with the goal of establishing Chinese language programs The human factor is also important Chinese Diaspora is fast increasing For example in Zambia it grew from 3 000 to 30 000 in ten years and in South Africa from practically none to 300 000 African countries constitute a new market for Chinese products They also provide a source of raw materials Today the continent supplies 30% of China's import of oil and gas Angola being the largest supplier with 522 000 barrels of oil per day to China The last five years Chinese oil companies spent 15 billion acquiring oil fields and local companies The appetite for raw materials goes beyond oil and gas and China's foreign political strategy is primarily to solve its own domestic problems and protect its interests in the global arena Will Africa be a pawn or a player in this emerging geopolitical game Will China's deepening relations with the continent represent a new opportunity for African countries to negotiate a new partnership and skillfully use it to the best advantage of their citizens These are some of the questions contributors to the volume have tried to answer by examining various facets of these deepening relations and underlining areas of concerns as well as the opportunities for mutually rewarding relations

Qualitative Economics Woodrow W. Clark II,Michael Fast,2019-10-08 This book provides a new paradigm of economics that is called Qualitative Economics The authors take an approach to economics that is entirely different from the established neo classical economics paradigm Arguing that the basis of neo classical economic theory with its focus on perfect information in a balanced equilibrium system of supply and demand is fundamentally flawed the authors propose an inclusive philosophical and scientific perspective to explain economic structures and activities and how best to understand the dynamics of economics Furthermore the authors argue that a qualitative approach allows for greater understanding of not only the actors actions and situations in economics but also defines the context in which the more traditional quantitative and statistical methods are applied The book includes case studies to further illustrate the applications of qualitative economics

Challenging orthodox paradigms and schools of economic thought the book proposes a new way of looking at economics and as such will be of use to researchers and students of economics business social sciences and the sciences as well as think tanks and advocacy groups interested in heterodox economics
