What Television Remembers Jennifer VanderBurgh, 2023-10-15 Television in Canada has been undervalued as a cultural form Despite being publicly funded Canadian television programs are also notoriously difficult to access once they go off the air which has compounded the problem In What Television Remembers Jennifer VanderBurgh intervenes in the story of the medium in Canada by exploring the long relationship between TV and the city of Toronto From the first demonstration of television at the Canadian National Exhibition in 1939 and the mass viewing of Queen Elizabeth II s coronation broadcast in 1953 to the late century installation of TV screens in public spaces around the city television has shaped Toronto s collective imagination and affirmed viewers in their multiple identities as local residents national citizens and transnational consumers In a close reading of Toronto based CBC dramas from the 1960s to 2010 VanderBurgh explains how the city has functioned as a strategic location in CBC programming reflecting dramatically changing ideas about Canadian identity community and citizenship At a time when many are suggesting that the era of television is over What Television Remembers sounds the alarm that we are in danger of forgetting TV in Canada without appreciating the complexities of its contributions and legacy

American Entrepreneur Chapter 9: Deliverance and Despair: 1920-1939, *Media and Culture* Richard Campbell, Christopher R. Martin, Bettina Fabos, 2011-02-23 It s no secret today s media landscape is evolving at a fast and furious pace and students are experiencing these developments firsthand While students are familiar with and may be using the latest products and newest formats they may not understand how the media has evolved to this point or what all these changes mean This is where Media and Culture steps in The eighth edition pulls back the curtain and shows students how the media really works giving students the deeper insight and context they need to become informed media critics

Media and Communications Technologies Stephen Lax, 2017-09-16 Complex technology is now widely available and commonplace with new developments emerging almost every day So how are we to keep up with and make sense of technological changes behind media and communication systems Do new technologies change society or are new media the products of social forces This book examines how media and communication technologies work and considers the society that develops and uses them From the telegraph to the future of mobile communication Stephen Lax takes the reader through a critical examination of the most important technologies to come out of the past century Each chapter is filled with insightful case studies and thought provoking examples that clearly explain key concepts whilst exploring historical context and chronological developments to show that new technology

depends upon its history Assuming no prior technical knowledge the book addresses both technical and social aspects of these developments explaining bandwidths and frequencies alongside issues of policy and regulation Illustrated with clear diagrams boxes and tables Media and Communication Technologies helps students to confront and make sense of the technological changes taking place in communications today **The CIA's Secret War in Tibet** Kenneth J. Conboy, James Morrison, 2002 In one of the most remote covert campaigns of the cold war the CIA harnessed nurtured and encouraged the Khampa tribesmen of Tibet in their defiance against Chinese subjugation This is the first time the story has been told

Through the Maelstrom Борис Горбачевский, 2008 A junior officer in the Red Army provides one of the richest and most detailed memoirs of life and warfare on the Eastern Front from his combat training in early 1942 until the surrender and occupation of Germany *A History of Popular Culture* Raymond F. Betts, Lyz Bly, 2013 This book explores the rapid diffusion and hybridization of popular culture as the result of three conditions of the world since the end of World War II instantaneous communications widespread consumption in a market based economy and the visualization of reality It considers the dominance of American entertainment media and habits of consumption assessing adaptation and negative reactions to this influence *Quacks and Crusaders* Eric S. Juhnke, 2002 One promoted goat gland transplants as a remedy for lost virility or infertility Another blamed aluminum cooking utensils for causing cancer The third was targeted by the Food and Drug Administration as public enemy number one for his worthless cures John Brinkley Norman Baker and Harry Hoxsey were the ultimate snake oil salesmen of the twentieth century With backgrounds in lowbrow performance carnivals vaudeville night clubs each of these charismatic con men used the emerging power of radio to hawk alternative cures in the Midwest beginning in the roaring twenties through the Depression era and into the 1950s All scorned the medical establishment for avarice while amassing considerable fortunes of their own and although the American Medical Association castigated them for preying on the ignorant this book shows that the case against them wasn't all that simple *Quacks and Crusaders* is an entertaining and revealing look at the connections between fraudulent medicine and populist rhetoric in middle America Eric Juhnke examines the careers of these three personalities to paint a vision of medicine that championed average Americans denounced elitism and affirmed rustic values All appealed to the common man winning audiences and patrons in rural America by casting their pitches in everyday language and their messages proved more potent than their medicines in treating the fears insecurities and failing health of their numerous supporters Juhnke first examines the career of each man revealing their geniuses as businessmen and propagandists with such success that Brinkley and Baker ran for governor of their states and Hoxsey had thousands of supporters protest his persecution by the FDA Juhnke then investigates the identity motives and willingness to believe of their many patients and followers He shows how all three men used populist rhetoric evangelical anti Communist anti intellectual to attract their clients and then how their particular brand of populism sometimes mutated to anti Semitism and other sentiments of the radical right By treating the incurable Brinkley Baker and

Hoxsey took on the mantles of common folk crusaders Brinkley was idolized for his goat gland cures until his death and Hoxsey's former head nurse continued his work from Tijuana until her death in 1999 In considering who visits quacks and why Juhnke has shed new light not only on the ongoing battle between alternative and organized medicine but also on the persistence of quackery and gullibility in American culture

For a New Liberty: The Libertarian Manifesto Murray Newton Rothbard, 1978

Post-Colonial Distances Denis Crowley, Bev Diamond, Daniel Downes, 2020-10-27 This anthology emanated from a conference in St John's Newfoundland that brought together popular music scholars folklorists and ethnomusicologists from Canada and Australia Implicit in that conference and in this anthology is the comparability of the two countries Their post colonial status if that is indeed an appropriate modifier in either case has some points of similarity On the other hand their distance from hegemonic centres from colonial histories is arguably more a matter of contrast than similarity Canada and Australia are similar in various regards Post colonial in the sense that they are both former British colonies they now each have more than a century of stature as nation states By the beginning of the 21st century they are each modest in size but rich in ethnocultural diversity Nonetheless each country has some skeletons in the closet where openness to difference to indigenous and new immigrant groups are concerned Both countries are similarly both experiencing rapid shifts in cultural makeup with the biggest population increases in Australia coming from China India and South Africa and the biggest in Canada from Afro Caribbean South Asian countries and China The chapters in this anthology constitute an important comparative initiative Perhaps the most obvious point of comparison is that both countries create commercial music in the shadow of the hegemonic US and British industries As the authors demonstrate both proximity specifically Canada's nearness to the US and distance have advantages and disadvantages As the third and fourth largest Anglophone music markets for popular music they face similar issues relating to music management performance markets and production A second relationship as chapters in this anthology attest is the significant movement between the two countries in a matrix of exchange and influence among musicians that has rarely been studied hitherto Third both countries invite comparison with regard to the popular music production of diverse social groups within their national populations In particular the tremendous growth of indigenous popular music has resulted in opportunities as well as challenges Additionally however the strategies that different waves of immigrants have adopted to devise or localize popular music that was both competitive and meaningful to their own people as well as to a larger demographic bear comparison The historical similarities and differences as well as the global positionality of each country in the early 21st century then invites comparison relating to musical practices social organization lyrics as they articulate social issues career strategies industry structures and listeners

Ecological Economics, Second Edition Herman E. Daly, Joshua Farley, 2011-01-26 In its first edition this book helped to define the emerging field of ecological

economics This new edition surveys the field today It incorporates all of the latest research findings and grounds economic inquiry in a more robust understanding of human needs and behavior Humans and ecological systems it argues are inextricably bound together in complex and long misunderstood ways According to ecological economists conventional economics does not reflect adequately the value of essential factors like clean air and water species diversity and social and generational equity By excluding biophysical and social systems from their analyses many conventional economists have overlooked problems of the increasing scale of human impacts and the inequitable distribution of resources This introductory level textbook is designed specifically to address this significant flaw in economic thought The book describes a relatively new transdiscipline that incorporates insights from the biological physical and social sciences It provides students with a foundation in traditional neoclassical economic thought but places that foundation within an interdisciplinary framework that embraces the linkages among economic growth environmental degradation and social inequity In doing so it presents a revolutionary way of viewing the world The second edition of Ecological Economics provides a clear readable and easy to understand overview of a field of study that continues to grow in importance It remains the only stand alone textbook that offers a complete explanation of theory and practice in the discipline California. Court of Appeal (1st Appellate District).

Records and Briefs California (State)., **The New Institutionalism in Strategic Management** P. Ingram,B. Silverman,2002-08-23 In this exciting volume a diverse and accomplished group of scholars work to integrate theories of institutions with strategic management The research they present examines a wide range of industrial contexts ranging from American retailing at the end of the nineteenth century to German tax law at the beginning of the twenty first Hearings United States. Congress. Senate. Committee on Commerce,1956 **Total Cold War** Kenneth Alan Osgood,2006 Osgood focuses on major campaigns such as Atoms for Peace People to People and cultural exchange programs Drawing on recently declassified documents that record U S psychological operations in some three dozen countries he tells how U S propaganda agencies presented everyday life in America to the world its citizens living full happy lives in a classless society where economic bounty was shared by all Osgood further investigates the ways in which superpower disarmament negotiations were used as propaganda maneuvers in the battle for international public opinion He also reexamines the early years of the space race focusing especially on the challenge to American propagandists posed by the Soviet launch of Sputnik *Hearings* United States.
