Youth Studies and Generations Vitor Sérgio Ferreira, 2020-03-25 There is currently much discourse about generations in the public sphere A sequence of letters conflates generations and age cohorts born in the last few decades generation X Y or Z as well as multiple categories are used to describe today's young people as a generation that is distinct from its predecessors Despite the popularity of generational labels in media politics or even academia the use of generation as a conceptual tool in youth studies has been controversial This Special Issue allows readers to better understand the key issues regarding the use of generation as a theoretical concept and or as a social category in the field of youth studies shedding light on the controversies trends and cautions that go through it

Immigration and the Border David L. Leal, José E. Limón, 2013-06-05 The advent of the twenty first century marks a significant moment in the history of Latinos in the United States The fourth wave of immigration to America is primarily Latino and the last decades of the twentieth century saw a significant increase in the number of Latino migrants a diversification of the nations contributing to this migration and an increase in the size of the native born Latino population A backlash against unauthorized immigration which may indict all Latinos is also underway Understanding the growing Latino population especially its immigrant dimensions is therefore a key task for researchers in the social sciences and humanities The contributors to *Immigration and the Border* address immigration and border politics and policies focusing on the U S side of the border The volume editors have arranged the essays into five sections The two chapters in the first section set the stage and discuss the binational lives

of Mexican migrants chapters in the subsequent sections highlight specific political and policy themes civic engagement public policies political reactions against immigrants and immigrant leadership Because the immigration experience encompasses many facets of political life and public policy the varied perspectives of the contributors offer a mosaic that contextualizes the impact of and contributions by contemporary Latino immigrants Their research will appeal not only to scholars but to policymakers and the public and will inform contentious debates about migration and migrants

The Politics of Belgium Marleen Brans, Lieven De Winter, Wilfried Swenden, 2013-09-13 For too long Belgium remained an unexplored terrain by comparative political scientists Belgium's politics were best known through the writings of Arend Lijphart who considered it a model case of consociationalism Over the past ten to fifteen years the analysis of consociationalism has been complemented by a more detailed coverage of Belgium's spectacular transformation process from a unitary into a federal state moving rapidly now to disintegration Likewise several peculiar aspects of Belgian politics such as the record fragmentation of its party system have been covered in edited volumes or international journals However given the complexity of the Belgian configuration of political institutions and actors any inclusion of particular aspects of the Belgian case in comparative work calls for an in depth and integrated understanding of the broader political system This is the first book which provides such an analysis It brings together a team of 19 political scientists and sociologists who aim to explain the dynamics and incentives of institutional change and seek to analyze the intricate interplay between the main institutional components of the Belgian body politic The sociological political and institutional determinants and the consequences of the federalisation process of Belgium is the central theme that links each of the individual chapters This book will be essential reading for students who want to understand the politics of Belgium and for anyone with a strong interest in West European Politics comparative politics and comparative federalism This book was published as a special issue of West European Politics

Conventional Versus Non-conventional Political Participation in Turkey Cristiano Bee, Ayhan Kaya, 2018-12-07 This book focuses on the emergence of different forms of civic and political activism in Turkey It has taken into account different components of active citizenship specifically looking at the development of civic and political forms of activism that bridge the realms of conventional and non conventional participation Focusing on the effects of the 2013 Gezi Park protests which originated in Istanbul but spread throughout the country this book reflects on how this experience might re orient current on civic and political participation in Turkey Specifically focusing on the main dynamics of non conventional forms of civic and political activism this volume attempts to understand the impact of non conventional forms of political participation on voting behaviour The internal domestic conditions of the country as well as its role in the international arena have dramatically changed since 2013 and are constantly evolving due to the domestic societal and political cleavages and the regional problems in the Middle East Yet the papers in the book reflect upon the significance of occupygezi nowadays demonstrating not only its importance in questioning the link between the patrimonial state and its

citizens but also for stimulating participatory behaviours The chapters originally published as a special issue in Turkish Studies Saturday Review of Politics, Literature, Science and Art ,1907
