

Radiation: Exchange Between Surfaces

- **Overview**

- **Enclosures** consist of two or more surfaces that envelop a region of space (typically gas-filled) and between which there is radiation transfer.
- **Virtual**, as well as **real**, surfaces may be introduced to form an enclosure.
- A **nonparticipating medium** within the enclosure **neither emits, absorbs, nor scatters radiation** and hence has no effect on radiation exchange between the surfaces.
- Each surface of the enclosure is assumed to be **isothermal, opaque, diffuse** and **gray**, and to be characterized by uniform **radiosity** and **irradiation**.
