**Medical Management of Radiation Accidents** Theodor M. Fliedner, I. Friesecke, K. Beyrer, 2001 This text from the British Institute of Radiology provides an international standard for the evaluation of radiation induced health impairments which should make a useful contribution to the harmonization and standardization of the Medical Management of Radiation Accidents

**Radiation Accidents and Emergencies in Medicine, Research, and Industry** Lawrence Herman

Lanzl, 1965 **Medical Management of Radiation Accidents** Kenneth S. Cohen, 2001-03-28 Although radiation accidents are rare and often complex in nature they are of great concern not only to the patient and involved medical staff but to the media and public as well Yet there are few if any comprehensive publications on the medical management of radiation accidents Medical Management of Radiation Accidents provides a complete reference Hospital Emergency Department

Management of Radiation Accidents, 1984

**Emergency and Disaster Medicine** C. Manni, S.I. Magalini, 2012-12-06 C Manni The focusing of general interest and of many disciplines on disaster medicine is an interesting and recent phenomenon in our society Disasters have by now left the historical and philosophical sphere and finally entered the operational arena Modern man in other words no longer accepts disasters in a passive and fatalistic manner but claims to be able to control them like so many other forces of nature The new approach is aimed at preventing containing and remedying the invariably tragic consequences of these events The role of medicine in this context is of fundamental importance and is characterized by two main aspects application of techniques of intervention appropriately and effectively and collaboration with the general organization assuming responsibility for the protection of health and the treatment of injuries Following a period of more or less chaotic growth during which sectionalism and empirical interests prevailed and localized aspects of this new discipline underwent considerable development a need is now felt to propose and realize a more comprehensive scientific approach It has become necessary to identify and to rationally analyze the individual components of this branch of medicine As in any analysis the recognition of the object of the research is of fundamental importance hence the title of this first round table
