Radiation Chemical Processes In Solid Phase Theory And Application:

Radiation-Chemical Processes in Solid Phase Evginiy I. Grigoriev, Leonid I. Trakhtenberg, 1996-11-14 Unlike many other references *Radiation Chemical Processes in Solid Phase* analyzes experimental data on radiolysis in terms of solid state physics It traces the effect exerted by media from primary processes of radiation substance interaction to final products The authors consider the main chemically active elementary excitations arising under irradiation of solids and discuss the mechanisms of chemical reactions induced by them They present the general principles of solid state and molecular physics and cover numerous radiation chemical processes **Library of Congress Subject Headings** Library of Congress, 2011
