

What is Radical Constructivism?

- Inspired by the work of **Jean Piaget** (1896–1980), the pioneer of the study of cognitive development in children.
- Based on the idea that the **individual** is the central element in meaning-making.
- Individual focuses on their own **experiences**; the child is the creator of their own knowledge.
- Development is a natural human process which is primary to learning.
- Individual students actively construct their own mathematical realities.

Radical Constructivism:

RADICAL CONSTRUCTIVISM Ernst von Glasersfeld, 2013-08-06 First Published in 1995 In the past decade or two the most important theoretical perspective to emerge in mathematics education has been that of constructivism This burst onto the international scene at the controversial Eleventh International Conference on the Psychology of Mathematics Education in Montreal in the summer of 1987 No one there will forget von Glasersfeld's authoritative plenary presentation on radical constructivism and his replies to critics Ironically the conference at which attacks on radical constructivism were perhaps intended to expose fatally its weaknesses served as a platform from which the theory was launched to widespread international acceptance and approbation Radical constructivism is a theory of knowing that provides a pragmatic approach to questions about reality truth language and human understanding It breaks with the philosophical tradition and proposes a conception of knowledge that focuses on experiential fit rather than metaphysical truth It claims to be a useful approach not the revelation of a timeless world The ten chapters of this book present different facets in an elegantly written and thoroughly argued account of this epistemological position providing a profound analysis of its central concepts Key Works in Radical Constructivism Ernst von Glasersfeld, 2007-01-01 Key Works on Radical Constructivism brings together a number of essays by Ernst von Glasersfeld that illustrate the application of a radical constructivist way of thinking in the areas of education language theory of knowledge and the analysis of a few concepts that are indispensable in almost everything we think and do Ernst von Glasersfeld's work opens a window on how we know what we know The present work grew out of a desire to make more accessible this line of thought to highlight its originality and consistency and to illustrate its fecundity in the domains of cognition and learning The first three parts of this book contain texts by Glasersfeld that outline the constructivist approach and explicate the frequently drastic reconceptualizations he has suggested Both the last part and the postscript consist of commentaries by Edith Ackermann Jacques D sautels G rard Fourez Leslie P Steffe and Kenneth Tobin scholars in the fields that Glasersfeld has been concerned with They examine a number of critical aspects pertaining to radical constructivism's current and future development often tracing out paths that warrant further exploration and reflection in particular concerning the sociopolitical dimension of knowledge Key Works on Radical Constructivism is intended as a reference book for researchers educators and students of education and for anyone interested in grasping or deepening their grasp of radical constructivism's tenets ambitions and concerns Readers will discover in this collection of firsthand contributions the contours of a bold contemporary debate about a most compelling current of thought **Radical Constructivism in Action** Leslie P. Steffe, Patrick W. Thompson, 2002-11-01 Over the last twenty five years Ernst von Glasersfeld has had a tremendous impact on mathematics and science education through his fundamental insights into the nature of knowledge and knowing Radical Constructivism in Action is a new volume of papers honouring his work by building on his model of knowing The contributions by leading researchers present constructivism in

action tying the authors actions regarding practical problems of mathematics and science education philosophy and sociology to their philosophical constraints giving meaning to constructivism operationally The book begins with a retrospective analogy between radical constructivism s emergence and changes in what is thought of as certain scientific knowledge It aims to increase understanding of constructivism and Glasersfeld s achievement and is vibrant evidence of the continued vitality of research in the constructivism tradition *Ranulph Galnville and How to Live the Cybernetics of Unknowing* Soren Brier, Phillip Guddemi, Louis H. Kauffman, 2016-07-19 A festschrift issue of Cybernetics and Human Knowing focusing on the work of Ranulph Glanville cybernetician design researcher theorist educator and multi platform artist designer performer Neurophilosophy of Free Will Henrik Walter, 2009-01-23 Walter applies the methodology of neurophilosophy to one of philosophy s central challenges the notion of free will Neurophilosophical conclusions are based on and consistent with scientific knowledge about the brain and its functioning Neuroscientists routinely investigate such classical philosophical topics as consciousness thought language meaning aesthetics and death According to Henrik Walter philosophers should in turn embrace the wealth of research findings and ideas provided by neuroscience In this book Walter applies the methodology of neurophilosophy to one of philosophy s central challenges the notion of free will Neurophilosophical conclusions are based on and consistent with scientific knowledge about the brain and its functioning Walter s answer to whether there is free will is It depends The basic questions concerning free will are 1 whether we are able to choose other than we actually do 2 whether our choices are made intelligibly and 3 whether we are really the originators of our choices According to Walter freedom of will is an illusion if we mean by it that under identical conditions we would be able to do or decide otherwise while simultaneously acting only for reasons and being the true originators of our actions In place of this scientifically untenable strong version of free will Walter offers what he calls natural autonomy self determination unaided by supernatural powers that could exist even in an entirely determined universe Although natural autonomy can support neither our traditional concept of guilt nor certain cherished illusions about ourselves it does not imply the abandonment of all concepts of responsibility For we are not mere marionettes with no influence over our thoughts or actions **Radical Constructivism ; ...** Glasersfeld, 1995 Workflow-based Process Controlling Michael Zur Muehlen, 2004 Workflow based Process Controlling Systems provide companies with the ability to measure the operational performance of their business processes in a timely and accurate fashion The combination of workflow audit trails with data warehouse technology and operational business data allows for complex analyses that can support managers in their assessment of an organization s performance The increasing maturity of business process management and data warehouse systems enables the design and development of advanced process oriented management information systems Michael zur Muehlen discusses the integration of workflow audit trail data with existing data warehouse structures and develops a reference architecture for process oriented management information systems Starting with an organizational and technical

A Journey in Mathematics Education Research Erna Yackel, Koen Gravemeijer, Anna

Sfard,2010-11-30 Our objective is to publish a book that lays out the theoretical constructs and research methodologies within mathematics education that have been developed by Paul Cobb and explains the process of their development We propose to do so by including papers in which Cobb introduced new theoretical perspectives and methodologies into the literature each preceded by a substantive accompanying introductory paper that explains the motivation rationale for developing the new perspectives and or methodologies and the processes through which they were developed and Cobb s own retrospective comments In this way the book provides the reader with heretofore unpublished material that lays out in considerable detail the issues and problems that Cobb has confronted in his work that from his viewpoint required theoretical and methodological shifts advances and provides insight into how he has achieved the shifts advances The result will be a volume that in addition to explaining Cobb s contributions to the field of mathematics education also provides the reader with insight into what is involved in developing an aggressive and evolving research program When Cobb confronts problems and issues in his work that cannot be addressed using his existing theories and frameworks he looks to other fields for theoretical inspiration A critical feature of Cobb s work is that in doing so he consciously appropriates and adapts ideas from these other fields to the purpose of supporting processes of learning and teaching mathematics He does not simply accept the goals or motives of those fields As a result Cobb reconceptualizes and reframes issues and concepts so that they result in new ways of investigating exploring and explaining phenomena that he encounters in the practical dimensions of his work which include working in classrooms with teachers and with school systems The effect is that the field of mathematics education is altered Other researchers have found his new ways of looking useful to them And they in turn adapt these ideas for their own use The complexity of many of the ideas that Cobb has introduced into the field of mathematics education can lead to a multiplicity of interpretations by practitioners and by other researchers based on their own experiential backgrounds Therefore by detailing the development of Cobb s work including the tensions involved in coming to grips with and reconciling apparently contrasting perspectives the book will shed additional light on the processes of reconceptualization and thus help the reader to understand the reasons mechanisms and outcomes of researchers constant pursuit of new insights *Handbook of*

Truth Matters Lambert Zuidervaart, Allyson Carr, Matthew J. Klaassen, Ronnie Shuker, 2013-12-01 Why should we seek and tell the truth Does anyone know what truth is Many are skeptical about the relevance of truth Truth Matters endeavours to show why truth is important in a world where the very idea of truth is contested Putting philosophers in conversation with educators literary scholars physicists political theorists and theologians Truth Matters ranges across both analytic and continental philosophy and draws on the ideas of thinkers such as Aquinas Balthasar Brandom Davidson Dooyeweerd Gadamer Habermas Kierkegaard Plantinga Ricoeur and Wolterstorff Some essays attempt to provide a systematic account of truth while others wrestle with the question of how truth is told and what it means to live truthfully Contributors address debates between realists and anti realists explore issues surrounding relativism and constructivism in education and the social sciences examine the politics of truth telling and the ethics of authenticity and consider various religious perspectives on truth Most scholars agree that truth is propositional being expressed in statements that are subject to proof or disproof This book goes a step farther yes propositional truth is important but truth is more than propositional To recognize how it is more than propositional is crucial for understanding why truth truly matters Contributors include Doug Blomberg ICS Allyson Carr ICS Jeffrey Dudiak King s University College Olaf Ellefson York University Gerrit Glas VU University Amsterdam Gill K Goulding Regis College Jay Gupta Mills College Clarence Joldersma Calvin College Matthew J Klaassen ICS John Jung Park Duke University Pamela J Reeve St Augustine s Seminary Amy Richards World Affairs Council of Western Michigan Calvin Seerveld ICS Ronnie Shuker ICS Adam Smith Brandeis University John Van Rys Redeemer University College Darren Walhof Grand Valley State University Matthew Walhout Calvin College and Lambert Zuidervaart ICS

Regional Contexts and Citizenship Education in Asia and Europe Kerry J. Kennedy, Andreas Brunold, 2015-10-05 This book is concerned with the social and political aspects of regional groupings particularly how citizenship education fares in regional contexts The European Union EU has revolutionised its political and economic aims into more encompassing social and political goals The Association of Southeast Asian Nations ASEAN on the other hand is still moving towards fuller integration in social and economic terms as South East Asian nations seek a greater role on the global stage and particularly in the global economy Both the EU and ASEAN have drawn up educational frameworks that collectively work to harness educational achievements which in turn work to fulfill social and economic objectives at the regional level This book portrays citizenship issues affecting the two regions and describes the way citizenship education can reflect and address these issues Case studies on EU and ASEAN member countries make up the book s two parts which analyse among other issues The Changing Landscape of Citizenship Education in England Political Didactics and Political Education in Germany Rethinking a Conceptual Framework for Citizenship Education in ASEAN Countries Education for ASEANness A tool to build an ASEAN community This book explores new ideas on citizenship and comparative education in regional contexts and will be of interest to researchers concerned with the impact of regionalism on social development and to citizenship educators studying the
