

Radical Agriculture

Edited by Richard Merrill

Radical Agriculture

Stephen E. Hunt

Radical Agriculture:

Radical Agriculture R. Merrill, 1964 **Radical Agriculture** Richard Merrill, 1976 **Regenerating Agriculture** Jules N. Pretty, 2013-11-05 For the past 50 years the main goal of agriculture has been to increase production at any price using high amounts of fertilizers and pesticides and intensive industrial methods This has caused damage to the environment and widespread rural depopulation This study shows that there is a viable alternative a form of agriculture which conserves resources maintains rural employment and minimizes the external costs without loss of productivity Using case studies from industrialized and developing countries the author describes the new technical institutional and policy options available

Kropotkin Brian Morris, 2018-06-01 The nineteenth century witnessed the growth of anarchist literature which advocated a society based on voluntary cooperation without government authority Although his classical writings on mutual aid and the philosophy of anarchism are still published today Peter Kropotkin remains a neglected figure A talented geographer and a revolutionary socialist Kropotkin was one of the most important theoreticians of the anarchist movement In *Kropotkin The Politics of Community* Brian Morris reaffirms with an attitude of critical sympathy the contemporary relevance of Kropotkin as a political and moral philosopher and as a pioneering social ecologist Well researched and wide ranging this volume not only presents an important contribution to the history of anarchism both as a political tradition and as a social movement but also offers insightful reflections on contemporary debates in political theory and ecological thought After a short biographical note the book analyzes in four parts Kropotkin's writings on anarchist communism agrarian socialism and integral education modern science and evolutionary theory the French Revolution and the modern state and possessive individualism terror and war Standing as a comprehensive and engaging introduction to anarchism social ecology and the philosophy of evolutionary holism Kropotkin is written in a straightforward manner that will appeal to those interested in social anarchism and in alternatives to neoliberal doctrines **Visions of Freedom** Morris Brian Morris, 2019-10-15 Every ten years notoriously

eclectic thinker Brian Morris takes a year of sabbatical and launches out into another field about which he knows nothing In the 1980s it was botany in the 1990s zoology in the 2000s entomology The quintessential polymath Morris has written on his incredible breadth of interests in wide ranging essays with subjects ranging from boxing to deep ecology to new age gurus Collected here for the first time *Visions of Freedom* brings together all of Morris's concise yet diverse essays on politics history and ecology written since 1989 It includes book reviews letters and articles in the engaging and accessible style for which Morris is known The thinkers he deals with are as diverse as Thomas Paine to C L R James from Karl Marx to Krishnamurti from Max Weber to Naomi Klein He also delves into the canon of classic anarchist thinkers like Kropotkin Bakunin Reclus Proudhon and Flores Magnon Taking a stance against the obscurantism of contemporary academic discourse Morris's writings demonstrate an interdisciplinary approach that moves seamlessly between topics developing practical connections between scholarly debates and the pressing social ecological and political issues of our times *The Social*

Risks of Agriculture Ronald C. Wimberley, Craig K. Harris, Joseph J. Molnar, Terry J. Tomazic, 2002-08-30 In a vast society where environmentally conscious nonfarming voters and consumers have grown to greatly outnumber those directly engaged in agriculture what happens in agriculture becomes increasingly subject to control by the general society as policies and laws cater to constituents and consumers This book provides an overview of how Americans perceive and value farmers and examines public opinion with regard to a number of agricultural issues Based on analysis of national survey data the authors offer an empirically based discussion and interpretation of those views and perceptions that help to shape policy and social sustainability This unique collection illustrates that in addition to its natural biological and economic risks agriculture has social risks that reverberate through all levels of society As the general population grows and the number of farms and farmers diminishes the weight of public opinion becomes more important in the policy arena of society as well as in the market demands for food and fiber grown in safe and favorable environmental conditions Setting the stage with a consideration of the larger society's interests in agricultural issues and of social and agricultural interdependence the contributors cover a range of topics and issues affecting agriculture at the end of the 20th century Chapters examine public perceptions of government's role in farming support for an environmentally friendly agricultural system views on pesticides and chemicals in foods consumer attitudes on food safety threats to clean drinking water concerns over farm animal welfare and the basic agrarian ethic of American society The book concludes with a look to the future of the social risks of agriculture in the 21st century

Civic Agriculture Thomas A. Lyson, 2012-05-22 A engaging analysis of food production in the United States emphasizing that sustainable agricultural development is important to community health

The Oxford Handbook of Land Politics Saturnino M. Borrás, Jennifer C. Franco, Researcher Jennifer C Franco, 2025 Access to land in all its multiple meanings is necessarily diverse complex and contentious and facilitating and maintaining such access constitutes a mosaic of social relations and institutional instruments rather than the minimalist and simplistic reduction of land to land property that in turn tends to be interpreted always as individual private property The Oxford Handbook of Land Politics offers heterodox analytical tools to help the reader make sense of the complexity of the politics of land

Terrorism, Radicalism, and Populism in Agriculture Luther G. Tweeten, 2008-06-02 While terrorism in agriculture takes few lives the misinformation emerging from the rhetoric of anti globalists radical environmentalists and animal welfare extremists costs Americans billions of dollars in lost income every year This controversial volume illuminates the political economic and global effects of these groups on the agricultural industry The clear concise and readable book discusses specific events and issues helping readers understand how radical agriculturalists think Tweeten explains how half truths and false ideologies find their way into our political systems and bring about bad public decisions increasing losses and causing global repercussions Terrorism Radicalism and Populism in Agriculture offers enlightenment for anyone involved in business agriculture policy making and politics

Troubled Harvest Joseph Cotter, 2003-09-30 During the 20th century two revolutions swept rural Mexico the

Mexican Revolution and the Green Revolution In both revolutionaries promised to address the problems of rural poverty and underdevelopment The Mexican Revolution led to a significant agrarian reform and created the State and elite that governed Mexico since the 1920s The Green Revolution helped increase Mexican agricultural production substantially and in 1970 it won a Nobel Peace Prize for Norman Borlaug who bred dwarf hybrid wheat Mexican agronomists played significant roles in both revolutions but neither revolution brought prosperity to peasant farmers This book examines the history of Mexican agronomy and agronomists to shed new light on the role of science in the Mexican Revolution the origins of the worldwide Green Revolution and general issues about the nature of the professions the impact of professionals ties to politics and the state and discourses between members of Mexico's urban middle class and peasantry Cotter also analyzes the impact of foreign models of science in Mexico the history of U S Mexican cooperation in the agricultural sciences and the factors that led Mexico to seek scientific assistance from the United States In a broad way he reveals new aspects of the ongoing struggle for the right to define modernity and progress in rural Mexico and offers new explanations for the failure of many of the State's efforts to assist peasant farmers

We Must Begin with the Land Stephen Hunt, 2025-04-29 A polyculture of ideas decolonising reframing and transforming how we think about the things we grow through a social ecology lens Ecological Solidarity and the Kurdish Freedom Movement Stephen E. Hunt, 2021-10-11 Ecological Solidarity and the Kurdish Freedom Movement Thought Practice Challenges and Opportunities is a pioneering text that examines the ideas about social ecology and communalism behind the evolving political structures in the Kurdish region The collection evaluates practical green projects including the Mesopotamian Ecology Movement Jinwar women's eco village food sovereignty in a solidarity economy environmental defenders in Iranian Kurdistan and Make Rojava Green Again Contributors also critically reflect on such contested themes as Alevi nature beliefs anti dam demonstrations human rights law and climate change the Gezi Park protests and forest fires Throughout this volume the contributors consider the formidable challenges to the Kurdish initiatives such as state repression damaged infrastructure and oil dependency Nevertheless contributors assert that the West has much to learn from the Kurdish ecological paradigm which offers insight into social movement debates about development and decolonization

The Invisible Farm Thomas Pawlick, 2001 The nature of rural life and food production is changing dramatically but remains overlooked by the major media The Invisible Farm provides the first substantial accounting of this problem addressing issues such as habitat destruction loss of biodiversity pollution and soil degradation Pawlick supplies readers with frightening examples of events taking place worldwide without public awareness As these environmental problems get worse farm reporters are disappearing from newspapers and television Rural news and environmental issues are increasingly neglected Pawlick argues that this lack of interest is partly due to less agricultural journalism training at universities As a result massive changes in farming distribution and production continue unabated while the consuming public is left uninformed A Burnham Publishers book

Appropriate Technology and Agriculture

in the United States Ann Becker, 1977 **Culture and Horticulture** Wolf D. Storl, 2013-02-19 Various studies have shown time and again that small organic farms and home gardens are capable of producing more food per acre with less fossil energy than large scale commercial agricultural installations dependent on machines and toxic chemical fertilizers and pesticides This classic book by Wolf D Storl a respected elder in the practice of permaculture details how food is grown holistically and beautifully by traditional communities around the world and shows how to apply their ancient wisdom to our own gardens With interest in natural sustainable organic and local food at an all time high people are looking beyond their farmers markets and CSA cooperatives to hyperlocal ways of growing healthy delicious produce in urban gardens and their own backyards Culture and Horticulture details time tested methods that are as effective today as they were hundreds of years ago On the practical front the book works as a manual for creating and maintaining a bountiful harvest It explains how to build the soil to maintain fertility how to produce compost how to plant sow and tend the various fruit and vegetable plants how to rotate crops and practice companion planting how to set up a favorable microclimate how to deal with so called weeds and pests how to harvest at the right time and finally how to store vegetables and herbs Special emphasis is given to the art and science of composting the compost being the heart of any self sufficient garden and a model for the cycle of life death and rebirth At the same time the reader is introduced to the wider aspects of horticulture to its historical philosophical and cosmological contexts and social relevance Gardening is a cultural activity shaped by peoples thoughts wishes and needs as well as by their cultural traditions The author an anthropologist by profession who has investigated the gardening practices of indigenous people throughout the world and worked for many years on biodynamic farms and in his own food garden will introduce the reader to Rudolf Steiner s vision of the garden as an organic unit embedded in the context of terrestrial and cosmic forces Storl explains the importance of cosmic rhythms solar lunar and planetary the role of biodynamic herbal preparations as medicines for the garden organism and the so called etheric and astral forces The book presents a vision of the garden as seen through the eyes of Goethean science a magical place where alchemical transformations of material substances take place **Agroecology** Stephen R. Gliessman, 2007 Providing the theoretical and conceptual framework for this continually evolving field Agroecology The Ecology of Sustainable Food Systems Second Edition explores environmental factors and complexities affecting agricultural crops and animals Completely revised updated and reworked the second edition contains new data new readings new issues and case studies and new options It includes two completely new chapters one on the role of livestock animals in agroecosystems and one on the cultural and community aspects of sustainable food systems The author clearly delineates the importance of using an ecosystem framework for determining if a particular agricultural practice input or management decision contributes or detracts from sustainability He explains how the framework provides the ecological basis for the functioning of the chosen management strategy over the long term He also examines system level interactions stressing the need for understanding the emergent qualities of populations communities

and ecosystems and their roles in sustainable agriculture Using examples of farming systems in a broad array of ecological conditions the book demonstrates how to use an ecosystem approach to design and manage agroecosystems for sustainability

Critical Food Issues Laurel Phoenix,Lynn Walter,2009-09-03 This authoritative research based collection examines urgent threats to future global food security and evaluates current and potential solutions Critical Food Issues Problems and State of the Art Solutions Worldwide examines 31 crucial areas of concern from soil degradation depletion of water for irrigation and loss of biodiversity to declining rural livelihoods hunger and obesity unjust farm labor practices and farm animal mistreatment Critical Food Issues divides its coverage into two exhaustive volumes one on bioenvironmental topics and one with a sociocultural focus Throughout highly accomplished experts from a variety of academic backgrounds review the current state of research on specific problems then identify strategies for confronting those problems that balance sustainable agrifood systems with environmental stewardship healthy people and equitable communities At a time of increasing public outcries over the quality of food and the impact of agrifood production on long term environmental and human well being Critical Food Issues offers an authoritative and comprehensive basis on which producers consumers and citizens can make more informed decisions about the future of food

The Social Consequences And Challenges Of New Agricultural Technologies Gigi M Berardi,Charles C Geisler,2019-07-11 Although formal social impact assessment of changing technologies in U S agriculture is still in its infancy scholars have been documenting the effects of new technology throughout the twentieth century In this collection Prcfessors Berardi and Geisler bring together historically relevant research and a carefully chosen cross section of contemporary work Their review of the literature is followed by an evaluation of the effects of mechanization on labor and production written in 1904 which provides a backdrop for papers from the 1940s and 1950s examining the mechanization of agriculture in the South in the Midwest and in rural areas in general Subsequent chapters offer present day insights on such topics as the socioeconomic consequences of automated vegetable and tobacco harvesting center pivot irrigation and organic and no till cultivation The authors also look at compensation and adjustment programs for displaced labor the relationship between technology and agribusiness growth and the effectiveness of university programs that prepare students to perform social impact assessments in agriculture The edited proceedings of a spirited roundtable discussion on new directions for the study of the social impacts of farm technology and the political economy of agriculture provide the thought provoking conclusion to this overview of the field

Exploring Political Ecology Alexander M. Ervin,2024-08-30 This book explores some of the conditions and underlying causes of the multiple environmental crises facing humanity Rooted in anthropology but multidisciplinary in scope it surveys the many socio cultural and socio economic errors foibles and follies that brought us to these circumstances Crucially and uniquely it outlines an array of viable and practical solutions some of which are radically different from the current status quo and cultural expectations The first chapter canvasses the emerging interdisciplinary field of political ecology then Part I

examines details and trends in agriculture Part II portrays the threats posed by carbon dependent and combusive technologies as well as the hydro and nuclear energy systems now powering the majority of human actions in developed parts of the world and expanding beyond The third part turns to consider solutions including green new deals de growth policies localization agroecology alternative energy systems and many more possibilities The conclusions engage with urgent moral and legal issues and outline social movement strategies all related to our collective neglect of climate change and then finally speculate upon possible futures This book is key reading for researchers and students interested in climate change across the social and physical sciences and humanities
