Radical Constructionism Rethinking The Dynamics Of Development By Feffer:

Radical Constructionism Melvin Feffer,1990-11-01 Freud s inadequate description of the developmental link between a child s way of knowing and an adult s way of knowing According to Melvin Feffer Freud was unable to articulate a coherent developmental theory because he presupposed an adult mind in the child but called for an elaboration of his constructionist position In this book Dr Feffer offers an empirical demonstration of how these processes are involved in personality development presenting an alternative conception of interpersonal development one that starts from a different philosophical position and aims to be by virtue of this both more comprehensive and less problematic than that afforded by Freudian theory *National Library of Medicine Current Catalog* National Library of Medicine (U.S.),1989 Current Catalog National Library of Medicine (U.S.), First multi year cumulation covers six years 1965 70 Necessary Conditions of Learning Ference Marton,2014-06-20 Necessary Conditions of Learning presents a research approach phenomenography and a theory the variation theory of learning introduced and developed by Ference Marton and taken up by his wide and varied following around the world together with their practical applications in educational contexts Reflecting Marton s whole lifetime s work the unique and significant contribution of this book is to offer an evidence based answer to the questions How do we make novel meanings our own and How do we learn to see things in more powerful ways The presentation makes use of hundreds of empirical studies carried out in Europe and Asia which build on the theory The line of reasoning and the way in which the examples are put together is consistent with the theory it is both presented and applied The main argument is that in order to learn we have to discern and to discern the intended ideas we must be presented with carefully structured variation against a background of invariance We then go through processes of contrast generalization and fusion in order to make sense These insights form a practical framework for those who design teaching and teaching materials Necessary Conditions of Learning is a major original work for which scholars of pedagogical theory have been waiting a long time *In Search of a Calling* Thomas O.
