*Peripheral Labour* Ravi Raman, 2010-01-21 This book presents a historical account of plantations in India in the context of the modern world economy It brings history up to the present thereby showing how history can assist in explaining contemporary conditions and trends The author focuses on labour and economic development problems and uses the World Systems theory so as to demonstrate the practical utility of the theory and its limitations as a guide to historical research Based on extensive archival research the book interprets the dynamics of plantation capitalism by focusing on the work life and struggle of the dalits on plantations in colonial and post colonial South India as they evolved from the mid 19th century It argues that these elements of the plantation life world were fashioned by the specific characteristics of the workers location within the capitalist world economy the then prevailing local social structure and the scheme of disciplining to which the workers were subjected to Treating the relations among various social forces the planting communities the oppressed communities dalits in India the regional and national state and the Imperial regime this book fills a gap in academic literature on capitalism economic development and globalization **The Restructuring of Capitalism in Our Time** William K. Tabb, 2012 Actions

taken by the United States and other countries during the Great Recession focused on restoring the viability of major financial institutions while guaranteeing debt and stimulating growth. Once the markets stabilized, the United States enacted regulatory reforms that ultimately left basic economic structures unchanged. At the same time, the political class pursued austerity measures to curb the growing national debt. Drawing on the economic theories of Keynes and Minsky and applying them to the modern evolution of American banking and finance, William K. Tabb offers a chilling prediction about future crises and the structural factors inhibiting true reform. Tabb follows the rise of banking practices and financial motives in America over the past thirty years and the simultaneous growth of a shadow industry of hedge funds, private equity firms, and financial innovations such as derivatives. He marks the shift from an American economy based primarily on the production of goods and nonfinancial services to one characterized by financialization, then shows how these developments, perspectives, and approaches not only contributed to the recent financial crisis but also prevented the enactment of effective regulatory reform. He incisively analyzes the damage that increasing unsustainable debt and excessive risk taking has done to our financial system and expands his critique to a discussion of world systems and globalization. Revealing the willful blind spots of mainstream finance theory, Tabb moves beyond an economic model reliant on debt expansion and dangerous levels of leverage, proposing instead a social structure of accumulation that places economic justice over profit and more practically institutes an inclusive, sustainable model for growth.

*Leviathans* Alfred D. Chandler, Bruce Mazlish, 2005-01-17 A groundbreaking 2005 exploration of multinational corporations that differs from other books on the subject by offering the reader a totally global perspective of multinationals without portraying them simply as economic entities. Written by experts on various aspects of the history, development, cultural, and social implications of the multinational corporation, the book paints a compelling and coherent picture of the way these businesses affect almost all areas of our existence. As we might expect, the multinational company is shown to play a major role in the globalization that is reshaping so much of our lives. Rethinking Marxism David F. Ruccio, 2021-09-08 In this issue, class revolution is discovered in a perhaps unlikely context: the paid domestic labor of African American women. Analyzing the changing economic relationship between African American women and white households from the end of slavery to the late 1970s, Cecilia Rio uses the concepts of Marxian class analysis and a wealth of empirical evidence to demonstrate that African American women were historical agents of fundamental class transformation. Also in this edition: articles on Humanities Surplus, Communism to Capitalism, Categories of Class Analysis, Contingent Commodification of Labor, Power, and more.

*Marginality and Exclusion in Egypt* Ray Bush,Habib Ayeb,2012-06-14 What does it mean to be marginalized Is it a passive condition that the disadvantaged simply have to endure Or is it a manufactured label reproduced and by its nature transitory In the wake of the new uprising in Egypt this insightful collection explores issues of power politics and inequality in Egypt and the Middle East It argues that the notion of marginality tends to mask the true power relations that perpetuate poverty and exclusion It is these dynamic processes of political and economic transformation that need explanation The book provides a revealing analysis of key areas of Egyptian political economy such as labour urbanization and the creation of slums disability refugees street children and agrarian livelihoods reaching the impactful conclusion that

marginalization does not mean total exclusion What is marginalized can be called upon to play a dynamic part in the future as is the case with the revolution that toppled President Mubarak
