## Radical Theory:

*The Radical Theory in Chemistry* John Joseph GRIFFIN (F.C.S.), 1858      **Radical Theory of Rings** J.W. Gardner, R. Wiegandt, 2003-11-19 Radical Theory of Rings distills the most noteworthy present day theoretical topics gives a unified account of the classical structure theorems for rings and deepens understanding of key aspects of ring theory via ring and radical constructions Assimilating radical theory's evolution in the decades since the last major work on rings and radicals was published the authors deal with some distinctive features of the radical theory of nonassociative rings associative rings with involution and near rings Written in clear algebraic terms by globally acknowledged authorities the presentation includes more than 500 landmark and up to date references providing direction for further research      *The Radical Theory in Chemistry* John Joseph Griffin, 1858      *Theory of Radicals* L. Márki, R. Wiegandt, 2014-05-21 Radicals arose originally from structural investigations in rings but later on they infiltrated into various branches of algebra as well as into topology and relational structures This volume is the result of a conference attended by mathematicians from all five continents and thus represents the current state of research in the area      **Radical Theory** B. J. Gardner, 1989      **Radical Critiques of the Law** Stephen M. Griffin, Robert C. L. Moffat, 1997 The past two decades have seen an outpouring of work in legal theory that is self consciously critical of aspects of American law and the institutions of the liberal state In this lively volume eminent scholars in philosophy law and political science respond to this recent scholarship by exploring what constitutes a radical critique of the law examining such theories as critical legal studies feminist theory and theories of difference and critical race theory The authors consider whether the critiques advanced in recent legal theory can truly be called radical and what form a radical critique of American law should take Writing at the cutting edge of the critique of critical legal theory they offer insights first on critical legal scholarship then on feminist political and legal theory A third group of contributions questions the radicalness of these approaches in light of their failure to challenge fundamental aspects of liberalism while a final section focuses on current issues of legal reform through critical views on criminal punishment including observations on rape and hate speech Each major essay describes the underlying principles in the development of a radical legal theory and addresses unresolved questions relating to it while accompanying commentaries present conflicting views The resulting dialogue explores wide ranging issues like equity value relativism adversarial and empathic legal advocacy communitarianism and the social contract impartiality and contingency natural law and corrective justice A common thread for many of the articles is a focus on the social dimension of society and law which finds the individualism of prevailing liberal theories too limiting Radical Critiques of the Law is particularly unique in presenting critical and feminist approaches in one volume along with skeptical commentary about just how radical some critiques really are Proposing alternative critiques that embody considerably greater promise of being truly radical it offers provocative reading for both philosophers and legal scholars by showing that many claims to radicalism are highly problematic at best      *Radicals in Chemistry* Moses

Gomberg, 1928 Presents a lecture given in 1927 which gives a brief survey of the history of free radicals and tri valent carbon
