**Radicals in Urban Politics** Robert Bailey (Jr.),1974      Radicals in Urban Politics Robert Bailey,1974      Theories of Urban Politics Jonathan S Davies,David L Imbroscio,2008-11-18 Anybody who thinks the study of urban politics is stagnating needs to pick up a copy of Theories of Urban Politics Insightful analysis of scholarship on traditional topics is supplemented by chapters on nontraditional topics including the new institutionalism network governance and urban leadership If you want to keep up with cutting edge debates in urban studies the Davies and Imbroscio volume is essential Todd Swanstrom Saint Louis University Connects the best traditions of urban political theory with important new contributions on emerging themes This completely revised second edition is an invaluable book for new students and established scholars It is accessible theoretically rich and maps out an exciting and challenging research agenda It will spend more time open and on the desk than closed and on the bookshelf Professor Chris Skelcher University of Birmingham Many colleagues have told us that our edition of Theories of Urban Politics provided great insights and grounding to students and seasoned researchers alike We are delighted that so able a successor has emerged Those that study urban politics need to be challenged and inspired by theory and this book delivers a powerful update for urban scholars David Judge Gerry Stoker and Harold Wolman Editors of the First Edition This long awaited sequel to the pioneering First Edition updates debates and developments through an excellent collection of entirely new essays contributed by some of the leading academics in the field A special feature of the volume is that it links concerns in urban politics in North America and Europe An excellent read Professor David Wilson De Montfort University Expanding and updating the successful first edition Theories of Urban Politics Second Edition provides a comprehensive introduction to and evaluation of the theoretical approaches to urban governance Restructured into four new parts Power Governance Citizens and Challenges the second edition reflects developments in the field over the last decade with newly commissioned chapters updating and adding to the theoretical material included in the first edition With contributions from many of the key figures in urban theory today this text will be required reading on all urban politics urban planning and public administration courses      The Radicals' City: Urban Environment, Polarisation, Cohesion Ralf Brand,Sara Fregonese,2016-02-24 Bringing together comparative case studies from Belfast Beirut Amsterdam and Berlin this book examines the role of the urban environment in social polarisation processes In doing so it provides a timely and refreshingly innovative voice in the confusing babble on counter terrorism urban conflict and community cohesion Despite their socio political differences these cities are telling cases of how the location and shape of very mundane objects such as rubbish bins bridges clothes stores shopping malls and caf s in addition to the obvious fences walls and barbed wire are often subject to heated controversies and influence the way urban conflict is lived and practised Within a Science and Technology Studies STS theoretical framework the authors provide a systematic analysis of these four cities and provide many concrete and richly illustrated examples of material agency without losing sight of their specific historical political geographical and

social conditions The STS angle permits some surprising yet extremely convincing conclusions which are of use not only for a range of practitioners but also to scholars interested in the social shaping processes and the consequences of urban artefacts The authors argue that although architecture and urban design is clearly not the sole cause of conflict and polarisation neither is it completely innocent Conversely it cannot be the silver bullet to solve related problems and to create community cohesion However the materiality of our cities must not be ignored in fact it can and should be enrolled in our efforts The book contains detailed descriptions of such positive cases as inspiration for practitioners as diverse as policy makers architects urban designers planners community workers consultants or police officers

**Radical Urban Political Economy** Charles Hoch, Joel Friedman, 1980      **The City and Radical Social Change** Dimitrios I. Roussopoulos, 1982

**The Transformation of Urban Liberalism** James Moore, 2017-11-30 The Transformation of Urban Liberalism re evaluates the dramatic and turbulent political decade following the Third Reform Act and questions whether the Liberal Party's political heartlands the urban boroughs really were in decline In contrast to some recent studies it does not see electoral reform the Irish Home Rule crisis and the challenge of socialism as representing a fundamental threat to the integrity of the party Instead this book illustrates using parallel case studies how the party gradually began to transform into a social democratic organisation through a re evaluation of its role and policy direction This process was not one directed from the centre despite the important personalities of Gladstone and Rosebery but rather one heavily influenced by grass roots politics Consequently it suggests that late Victorian politics was more democratic and open than sometimes thought with leading urban politicians forced to respond to the demands of party activists Changes in the structure of urban rule produced new policy outcomes and brought new collectivist forms of New Liberalism onto the political agenda Thus it is argued that without the political transformations of the decade 1885 1895 the radical liberal governments of the Edwardian era would not have been possible

*The Radical Homeowner* Ian C. Winter, 2021-03-23 Originally published in 1994 this book provides an important contribution to contemporary housing debates as well as clear examples of the use of qualitative data in causal analysis Based on 3 original Australian case studies and a range of international data this book demonstrates that the interests and meanings of home ownership can lead home owners into radical courses of social action that oppose the status quo despite national governments having sponsored a remarkable growth in home ownership to promote a loyal citizenship and political stability

**Radical Pedagogies** Beatriz Colomina, Ignacio G. Galán, Evangelos Kotsioris, Anna-Maria Meister, 2022-05-31 Experiments in architectural education in the post World War II era that challenged and transformed architectural discourse and practice In the decades after World War II new forms of learning transformed architectural education These radical experiments sought to upend disciplinary foundations and conventional assumptions about the nature of architecture as much as they challenged modernist and colonial norms decentered building imagined new roles for the architect and envisioned participatory forms of practice Although many of the experimental programs were subsequently abandoned terminated or assimilated they nevertheless helped shape and in some sense define architectural discourse and practice This book explores and documents these radical pedagogies and efforts to defy architecture s status quo The experiments include the adaptation of Bauhaus pedagogy as a means of unlearning under the conditions of decolonization in Africa a movement to design for every body including the disabled by architecture students and faculty at the University of California Berkeley the founding of a support network for women interested in the built environment regardless of their academic backgrounds and a design studio in the USSR that offered an alternative to the widespread functionalist approach in Soviet design Viewed through their dissolution and afterlife as well as through their founding stories these projects from

the last century raise provocative questions about architecture's role in the new century      *Black Social Capital* Marion Orr, 1999 Deindustrialization white flight and inner city poverty have spelled trouble for Baltimore schools Marion Orr now examines why school reform has been difficult to achieve there revealing the struggles of civic leaders and the limitations placed on Baltimore's African American community as each has tried to rescue a failing school system Examining the interplay between government and society Orr presents the first systematic analysis of social capital both within the African American community black social capital and outside it where social capital crosses racial lines Orr shows that while black social capital may have created solidarity against white domination in Baltimore it hampered African American leaders' capacity to enlist the cooperation from white corporate elites and suburban residents needed for school reform Orr examines social capital at the neighborhood level in elite level interactions and in intergovernmental relations to argue that black social capital doesn't necessarily translate into the kind of intergroup coalition needed to bring about school reform He also includes an extensive historical survey of the black community showing how distrust engendered by past black experiences has hampered the formation of significant intergroup social capital The book features case studies of school reform activity including the first analysis of the politics surrounding Baltimore's decision to hire a private for-profit firm to operate nine of its public schools These cases illuminate the paradoxical aspects of black social capital in citywide school reform while offering critical perspectives on current debates about privatization site-based management and other reform alternatives Orr's book challenges those who argue that social capital alone can solve fundamentally political problems by purely social means and questions the efficacy of either privatization or black community power to reform urban schools *Black Social Capital* offers a cogent conceptual synthesis of social capital theory and urban regime theory that demonstrates the importance of government politics and leadership in converting social capital into a resource that can be mobilized for effective social change      *The Urban Politics of Squatters' Movements* Miguel A. Martínez López, 2017-11-27 This volume sheds light on the development of squatting practices and movements in nine European cities Madrid Barcelona Seville Rome Paris Berlin Copenhagen Rotterdam and Brighton by examining the numbers variations and significant contexts in their life course It reveals how and why squatting practices have shifted and to what extent they engender urban movements The book measures the volume and changes in squatting over various decades mostly by focusing on Squatted Social Centres but also including squatted housing In addition it systematically compares the cycles socio-spatial structures and the political implications of squatting in selected cities This collection highlights how squatters' movements have persisted over more than four decades through different trajectories and circumstances especially in relation to broader protest cycles and reveals how political opportunities and constraints influence the conflicts around the legalisation of squats p      **Argentina's Radical Party and Popular Mobilization, 1916-1930** Joel Horowitz, 2010-11-01      **Radical Space** Debra Benita Shaw, Maggie Humm, 2016-03-24 The spatial turn in the Humanities and Social Sciences has produced a considerable body of

work which re assesses space beyond the fixed Cartesian co ordinates of Modernity and the nation state In the process space has been revealed as a productively contested concept with methodological implications across and between disciplines The resulting understandings of space as fluid changeable and responsive to the situation of bodies both human and non human has prepared the ground for radical concepts and uses of space with implications for how we conceive of contemporary lived reality Rather than conceiving of bodies as constantly rendered docile within the spaces of the post industrial nation state Radical Space reveals how activists and artists have deployed these theoretical tools to examine and contest spatial practice Bringing together contributions from academics across the humanities and social sciences together with creative artists this dynamically multidisciplinary collection demonstrates this radicalization of space through explorations of environmental camps new explorations of psychogeography creative interventions in city space and mapping the extra terrestrial onto the mundane spaces of everyday existence

The European Radical Left Giorgos Charalambous, 2021-12-20 Is today s left really new How has the European radical left evolved Giorgos Charalambous answers these questions by looking at three moments of rapid political change the late 1960s to late 1970s the turn of the millennium and post 2008 He challenges the conventional understanding of a new left drawing out continuities with earlier movements and parties Charalambous examines the Long 68 symbolised by the May uprisings in France which saw the rise of new left forces and the widespread criticism by younger radical activists of traditional communist and socialist parties He puts this side by side with the turn of the millennium when the Global Justice Movement rose to prominence and changed the face of the international left and also the period after the financial crash of 2008 and the rise of anti austerity politics which initiated the most recent wave of new left parties such as Podemos in Spain and Syriza in Greece With a unique two level perspective Charalambous approaches the left through both social movements and party politics looking at identities rhetoric and organisation and bringing a fresh new approach to radical history as well as assessing challenges for both activists and scholars
