Pierce, 1963 Low-level Radiation United States. Department of Energy. Technical Information Center, 1978 *Life Sciences and Radiation* Jürgen Kiefer, 2004-02-20 The book contains the proceedings of an international workshop held in Giessen in October 2002 that explored the potential of radiation research in the life sciences The contributions demonstrate that the development of molecular biology and cell biology is intimately linked with the application of radiation methods It is shown that the study of the cell cycle and of intercellular communication as well as recent achievements in radiation therapy and the understanding of carcinogenic processes are not possible without radiation research Repair of genetic damage cannot be studied without the analysis of radiation induced damage and its modification The book thus details the great importance of radiation research in the whole field of life sciences and constitutes not only an important source book for radiation scientists but also an introduction in the field for the nonspecialist interested in the state of the art in radiation research *The Effects of Radiation and Radioisotopes on the Life Processes: General topics. The Future of Low Dose Radiation Research in the United States National Academies of Sciences, Engineering, and Medicine,Division on Earth and Life Studies,Nuclear and Radiation Studies Board,2020-01-13 Exposures at low doses of radiation generally taken to mean doses below 100 millisieverts are of primary interest for setting standards for protecting individuals against the adverse effects of ionizing radiation However there are considerable uncertainties associated with current best estimates of risks and gaps in knowledge on critical scientific issues that relate to low dose radiation The Nuclear and Radiation Studies Board of the National Academies hosted the symposium on The Future of Low Dose Radiation Research in the United States on May 8 and 9 2019 The goal of the symposium was to provide an open forum for a national discussion on the need for a long term strategy to guide a low dose radiation research program in the United States The

symposium featured presentations on low dose radiation programs around the world panel discussions with representatives from governmental and nongovernmental organizations about the need for a low dose radiation research program reviews of low dose radiation research in epidemiology and radiation biology including new directions and lessons to be learned from setting up large research programs in non radiation research fields This publication summarizes the presentation and discussion of the symposium

Perez and Brady's Principles and Practice of Radiation Oncology Edward C. Halperin, Carlos A. Perez, Luther W. Brady, 2008 The thoroughly updated fifth edition of this landmark work has been extensively revised to better represent the rapidly changing field of radiation oncology and to provide an understanding of the many aspects of radiation oncology This edition places greater emphasis on use of radiation treatment in palliative and supportive care as well as therapy
