ORAL SURGERY AND MEDICAL TIPS FOR DENTISTS A YASAR GUNER,2025-06-09 When learning becomes a habit it also becomes a pleasure The knowledge we gain from what we learn is in fact a form of power Of course as dentists it is not primarily our job to be concerned with every aspect of general health As dentists we focus on the health treatment and surgery of the mouth teeth and jaws Our knowledge is centered on this However while performing oral dental and maxillofacial surgeries and treatments we must not forget that we are treating not just the mouth but the entire patient We must observe and pay attention to abnormal conditions in the patient s systemic health This applies to every field of dentistry When necessary we should consult the patient s physician for advice All of this makes it essential for a dentist to have a sufficient foundation in general medical knowledge Collaboration with medicine becomes even more critical in oral and maxillofacial surgery Whether in the operating room or due to the nature of the procedures a strong medical partnership is required Although dentistry is an independent profession it is a medical discipline that should never detach itself from medicine The information in this book is intended to further support and enhance that collaboration
