Radioreactive Apples Stories:

10 Short Stories Volume 1 Martin Lundqvist, 2021-02-16 This Anthology contains the following short stories The Dinner at Darkwood Mansion Keila halts the Terran drug smugglers in the year 2869 Daydreaming in the shoe shop The Escargot Conspiracy How I met your mother and almost got arrested for murder The Snailkeeper at Lupusserra The Cathedral Date The Clinic Murders The Golden Duck Dinner The Escape from the Tang Emperor **Telling the Untold Story** Steve Weinberg, 1992 Author of his own controversial unauthorized biography of Armand Hammer Steve Weinberg here shows how a new generation of biographers is revealing the lives of powerful individuals in dramatic and important new ways Trained as investigative journalists today's writers have entered a domain once dominated by university scholars Unlike their more academic predecessors who often wrote nonjudgmental books on the public lives of long dead individuals these new biographers are willing to tackle such powerful living subjects as Nancy Reagan Henry Kissinger Hugh Hefner Pete Rose and Fidel Castro Few of these books are adoring Without cooperation from their subjects and sometimes under threat of lawsuit these writers are probing into private lives and enabling readers to make up their own minds about public figures Tracing the evolution of the craft of biography up to the present day Weinberg draws on interviews with some of today's best biographers as well as his own experience with the Hammer biography to highlight the careers of some of the writers whose work exploded the boundaries of traditional biography When Robert Caro became the first journalist to win a Pulitzer Prize for Biography for his book on Robert Moses it marked the dawn of a new approach to the craft Weinberg also explores the techniques of Philadelphia Inquirer journalists Donald Barlett and James Steele whose jointly authored biographies of Howard Hughes and Nelson Rockefeller mark another sign of how far the genre of biography has come The book is enriched by samples of investigative biography at its best including a scathingly honest profile of the reigning queen of unauthorized biography Kitty Kelley and Calvin Trillin's fascinating New Yorker profile of the Miami Herald's inimitable police reporter Edna Buchanan The living of a life is more difficult than the chronicling of it but the chronicling is certainly no simple task writes Weinberg Telling somebody else's life fully fairly and compellingly is probably an impossible task But it is important to keep pushing the limits of the possible For writers reviewers publishers and general readers Telling the Untold Story is a fascinating look at how a new kind of biographer has forever changed our expectations of the genre and continues to push biography to exciting new limits Radioactive Clouds of Death over Utah Dr. Daniel W. Miles, 2013-01-31 I have completed the manuscript with the tentative title Radioactive Clouds of Death Over Utah From 1950 to the 1958 moratorium on atmospheric testing the Atomic Energy Commission detonated over 100 atomic bombs at the Nevada Test Site The inhabitants of St George Utah the so called downwinders were repeatedly in the fly zone of these toxic wind blown clouds so much so that St George became known nationwide as Fallout City USA According to the back cover of John Fuller's 1984 best seller The Day We Bomb Utah America's Most Lethal Secret Within a few years a plague of cancer and birth defects had

ripped through the area a plague that may have caused the cancer related deaths of John Wayne and over 100 other cast and crew members of The Conqueror which was filmed only miles from the test site Actually it was filmed only five miles from St George Utah Congressman Jim Matheson alleged in a recent op ed article in the Deseret News that the horrendous legacy of radioactive fallout is still killing downwinders Thousands of citizens throughout the West continue to get sick and die from radiation exposure caused illnesses From an editorial in the February 15 2001 issue of the Deseret News the federal government literary sacrificed the health of thousands of unsuspecting Utahans and Nevadans The focus of Radioactive Clouds of Death Over Utah is to retrospectively consider both the short term and long term health effects of radioactive fallout exposure on downwinders from the perspectives of the downwinders the tort lawyers the government itself politicians producers of five television documentaries writers of six popular books hundreds of magazine and newspaper articles and many scientific studies on fallout health effects on Utah residents Recently the Utah press has featured many fallout cancer stories giving much weight to anecdotal accounts downwinders have been featured in the Deseret News 265 times in the last decade On April 12 2011 U S Senator Tom Udall D NM led a bipartisan group of senators in introducing S 791 the Radiation Exposure Compensation Act Amendments of 2011 which would among other things expand compensation to downwinders in all counties in Idaho Montana Colorado New Mexico and to areas not now covered in Utah Nevada and Arizona Today with heightened fears about radiation leaks from damaged nuclear power plants in Japan and the possibilities of nuclear terrorism the discussion of fallout induced cancers in this book provides valuable basic information about what is known about exposure to radiation and its health risks A balanced perception of the health risks of ionizing radiation is of great societal importance to issues as varied as radiological terrorism the future of nuclear power nuclear waste storage occupational radiation exposure the clean up of nuclear waste sites medical x rays whole body scanning by computed tomography results in much higher organ doses of radiation than conventional single film x rays manned space exploration and frequent flyer risks

Liquidator: The Chernobyl Story Sergei Belyakov, 2018-12-19 In the late April of 1986 the world learned about the quaint town in the Central Ukraine Chernobyl The largest nuclear catastrophe in the history of mankind which affected the lives of millions and millions had forced the USSR government to take unprecedented actions One of them was the formation of a cleanup crew from the Army reservists They were tasked with a titanic chore of cleaning the Chernobyl Nuclear Power Plant from radioactive debris after the explosion of Reactor 4 Sergei Belyakov then a PhD scientist volunteered to become one of the many nuclear jumpers of that long forgotten crew This book sums up his recollections about that nuclear jumper stint It is written not as a traditional memoir but as an alloy of personal views and feelings templated over the information about the Chernobyl disaster from the official sources of those days It will give the Western readers a chilling sense of the magnitude of the event that brought down the almighty Soviet Union Related Link s **The Future of Fallout, and Other Episodes in Radioactive World-Making** Joseph Masco, 2020-12-18 In The Future of Fallout and Other Episodes in

Radioactive World Making Joseph Masco examines the strange American intimacy with and commitment to existential danger Tracking the simultaneous production of nuclear emergency and climate disruption since 1945 he focuses on the psychosocial accommodations as well as the technological revolutions that have produced these linked planetary scale disasters Masco assesses the memory practices visual culture concepts of danger and toxic practices that in combination have generated a U S national security culture that promises ever more safety and comfort in everyday life but does so only by generating and deferring a vast range of violences into the collective future Interrogating how this existential lag i e the material and conceptual fallout of the twentieth century in the form of nuclear weapons and petrochemical capitalism informs life in the twenty first century Masco identifies key moments when other futures were still possible and seeks to activate an alternative postnational security political imaginary in support of collective life today

Twilight Exposed! The Inside Story of a Billion Dollar Franchise, *Nuclear Renaissance* William J. Nuttall, 2022-06-15 Nuclear power is low carbon and reliable but in recent years it has struggled to play a strong role in global plans for electricity generation in the 21st century Many of those involved with nuclear power and environmental agencies see controlled expansion of nuclear plants as the most environmentally friendly way of meeting growing energy demands In the UK policy makers must recognise concerns around severe accidents and radioactive wastes and balance these against the risks arising from other energy technologies In addition energy policy makers must ensure that energy supplies remain affordable for all in society How might new nuclear power stations help meet emerging policy needs This second edition of *Nuclear Renaissance Technologies and Policies for the Future of Nuclear Power* continues to examine the future of nuclear power in the contexts of economics environmental sustainability and security of electricity supplies Fully updated with the latest technologies and concerns this comprehensive guide illustrates the technical challenges and opportunities facing nuclear power This semi technical overview of modern technologies meets the growing interest from scientists environmentalists and governments in the potential expansion of nuclear power Various countries are starting to announce plans for new nuclear plants either to replace those being decommissioned to provide additional power or to contribute to the decarbonisation of especially challenging industrial activities In the 2020s many commentators once again point to a renaissance just beginning *Nuclear Renaissance Technologies and Policies for the Future of Nuclear Power* is essential reading for physicists engineers policy makers researchers energy analysts and graduate students in energy sciences engineering and public policy Key features Fully updated throughout with new content on topics including the latest developments in fission and fusion energy the global financial crisis of 2008 2009 and the Fukushima Daiichi nuclear accident Accessible to readers without a formal education in the area Authored by an authority in the field **Jungian Arts-Based Research and "The Nuclear Enchantment of New Mexico"** Susan Rowland, Joel Weishaus, 2020-07-26 Jungian Arts Based Research and *The Nuclear Enchantment of New Mexico* provides clear accessible and in depth guidance both for arts based researchers using Jung's ideas and for Jungian scholars undertaking arts based research The book provides a central extended example which applies the techniques described to the full text of Joel Weishaus prose poem *The Nuclear Enchantment of New Mexico* published here for the first time Designed as a how to book Jungian Arts Based Research and *The Nuclear Enchantment of New Mexico* explores how Jung contributes to the new arts based paradigm in psychic functions such as intuition by providing an epistemology of symbols that includes the unconscious and research strategies such as active imagination Rowland examines Jung's *The Red Book* as an early example of Jungian arts based

research and demonstrates how this practice challenges the convention of the detached researcher by providing holistic knowing Arts based researchers will find here a psychic dimension that also manifests in transdisciplinarity while those familiar with Jung's work will find in arts based research ways to foster diversity for a decolonized academy This unique project will be essential reading for Jungian and post Jungian academics and scholars arts based researchers of all backgrounds and readers interested in transdisciplinarity

The Pygmy Hippo Story Phillip T. Robinson, Gabriella L. Flacke, Knut M. Hentschel, 2017-03-01 Though the pygmy hippopotamus has been designated as a flagship species of West African forests meaning that by raising conservation efforts for a single species an entire ecological region could benefit very little research has been published on the animal They are solitary nocturnal and highly evasive and until recent developments in camera trap technology they were considered the least photographed large mammal species in the world The information currently available on this endangered species is scattered limited redundant and often inaccurate and no major volume exists as a resource for those interested in the conservation effort for the species until now Phillip Robinson and his coauthors provide a treatment of the natural history biology and ecology of the pygmy hippo along with a discussion of the rare animal's taxonomic niche and a summary of the research initiatives involving it up to this point The authors show the ways in which the pygmy hippo has come into contact with people in West African countries both in terms of ecological and cultural impact This creature has been the subject of local folktales and is treated as almost mythic in some regions Information on issues related to captivity breeding and zoos is provided The book is heavily illustrated with original photographs and anatomic drawings The project should be of use to conservation biologists zoologists and natural history readers and will be the definitive single volume account of an animal that the scientific community has designated to be ecologically significant to West Africa

Nuclear Nuevo México Myrriah Gómez, 2022-11-22 In the 1940s military and scientific personnel chose the Pajarito Plateau to site Project Y of the secret Manhattan Project where scientists developed the atomic bomb Nuevomexicanos and Tewa people were forcibly dispossessed from their ranches and sacred land in north central New Mexico with inequitable or no compensation Contrary to previous works that suppress Nuevomexicana's presence throughout U.S. nuclear history Nuclear Nuevo México focuses on recovering the voices and stories that have been lost or ignored in the telling of this history By recuperating these narratives Myrriah Gómez tells a new story of New Mexico one in which the nuclear history is not separate from the collective colonial history of Nuevo México but instead demonstrates

how earlier eras of settler colonialism laid the foundation for nuclear colonialism in New Mexico Gomez examines the experiences of New Mexicans who have been impacted by the nuclear industrial complex both the weapons industry and the commercial industry Gomez argues that Los Alamos was created as a racist project that targeted poor and working class New Mexican farming families along with their Pueblo neighbors to create a nuclear empire The resulting imperialism has left a legacy of disease and distress throughout New Mexico that continues today
