Railway Stations Planning Design And Management:

Railway Stations Julian Ross, 2000 This work discusses the planning design and management of railway stations It examines a range of stations Commercial aspects and matters of image and branding are explored alongside technical and operational issues

Transport Terminals and Modal Interchanges Christopher Blow, 2012-05-23 This is the first book to review a trend in transport systems which has only recently come of age the multi modal interchange Separate modes of transport are being linked through joined up thinking and transport designers and authorities are only now able to exploit interchange opportunities This book presents examples of how these new opportunities have been planned and designed and outlines how transfer and mobility can be improved in the future Blow takes the airport as the focal point of true multi modal passenger terminals and presents the development of these buildings as representing a new experience in travel The book shows that the success of the experience of transferring from one mode of transport to another depends on the many factors including congestion in an already overloaded system and the way that designers and managers have addressed contingency planning International examples are drawn from areas where mobility is most concentrated and the demands on design are at their highest The book also addresses important issues of rebuilding and redevelopment where once separate modes of transport are being linked to each other and where short term inconveniences rectify past wrongs in the long term It is a compendium of architectural and engineering achievement

Spatial Implications and Planning Criteria for High-Speed Rail Cities and Regions José Maria de Ureña, Chia-Lin Chen, Anastasia Loukaitou-Sideris, Roger Vickerman, 2021-03-29 Spatial Implications and Planning Criteria for High speed Rail Cities and Regions evaluates the varied experiences that HSR systems have brought about to different station cities and their regional territories around the world with an eye towards better future planning and policy of such systems This edited volume draws from examples of high speed rail operations in different cities in Europe and Asia to depict the various impacts of this major transportation infrastructure It attempts to distinguish the short and long term impacts described in the literature classifying them into regional and inter urban effects urban effects and wider economic impacts Planning challenges appear at two major points 1 during the initial planning stage that includes the route and location of stations and 2 during the development process that follows The case studies in the book concentrate on a variety of topics from the impact of high speed rail on population growth in some station cities to the regional economic impacts that an HSR system can bring about to the larger territories it passes through to the potential of station cities to better attract firms or to experience increases in tourism and commerce They also assess planning strategies and experiences from station cities to draw lessons for future HSR planning policies The Chapters in this book were originally published in a special issue of European Planning Studies

Railways, Urban Development and Town Planning in Britain: 1948-2008 Russell Haywood, 2016-03-23 This book provides a critical overview of the relationships between planning and railway management and development during the key period in the 20th Century when the railway

was in public ownership 1948 94 It assesses the strength of the relationships when working in collaboration with the private sector The book then focuses on the interplay between planning and railway since privatization in 1994 and points to best practice for the future in institutional structures and policy development to secure improved outcomes Transit-friendly Streets Project for Public Spaces, National Research Council (U.S.). Transportation Research Board, 1998 Presents 10 strategies used in both the United States and Europe to create transit friendly streets The strategies are followed by case studies of five communities that have pursued different initiatives to improve their livability by making their streets more transit friendly *Improving Interchanges* Asian Development Bank, 2015-01-01 The interchange hub is the gateway to the city and is a critical element in developing a sustainable and efficient public transport system This publication presents ideas for improving interchanges by enhancing the quality of the journey experience for passengers It draws upon international best practice and explains how ease and speed of mode transfers coupled with the availability of amenities and user facilities can make a journey more enjoyable The lessons and innovations presented here may be used for designing the next generation of interchange hubs in the People's Republic of China *Routledge Handbook of Transportation* Dusan Teodorovic, 2015-08-20 The Routledge Handbook of Transportation offers a current and comprehensive survey of transportation planning and engineering research It provides a step by step introduction to research related to traffic engineering and control transportation planning and performance measurement and evaluation of transportation alternatives The Handbook of Transportation demonstrates models and methods for predicting travel and freight demand planning future transportation networks and developing traffic control systems Readers will learn how to use various engineering concepts and approaches to make future transportation safer more efficient and more sustainable Edited by Dusan Teodorovic and featuring 29 chapters from more than 50 leading global experts with more than 200 illustrations the Routledge Handbook of Transportation is designed as an invaluable resource for professionals and students in transportation planning and engineering New Architecture and Technology Gyula Sebestyen, Christopher Pollington, 2007-06-07 Many books have covered the topics of architecture materials and technology New Architecture and Technology is the first to explore the interrelation between these three subjects It illustrates the impact of modern technology and materials on architecture The book explores the technical progress of building showing how developments both past and present are influenced by design methods It provides a survey of contemporary architecture as affected by construction technology It also explores aspects of building technology within the context of general industrial social and economic developments The reader will acquire a vocabulary covering the entire range of structure types and learn a new approach to understanding the development of design Sustainability and the Design of Transport Interchanges Brian Edwards, 2011-01-24 The interchange is a new form of transport building which integrates into a single whole various modes of public transport putting the passenger first rather than the infrastructure This book presents design principles for transport interchanges and offers analysis of best practice in

the UK and abroad The author demonstrates how this complex new building type integrates with the city on the one hand and with different types of transport on the other In this integration design in both plan and section are important as is urban and landscape design The idea of interchange is increasingly relevant as town planners engineers and architects address the question of sustainable development with its emphasis on energy efficiency social cohesion access for the elderly and urban regeneration

Railway Engineering Design & Operation G. Passerini,J.M. Mera,R. Takagi,2021-03-10 Originating from presentations at the 17th International Conference on Railway Engineering Design and Operation this volume contains selected research works on the topic It is important to continue to update the use of advanced systems by promoting general awareness throughout the management design manufacture and operation of railways and other emerging passenger freight and transit systems The included papers help to facilitate this goal and place a key focus on the applications of computer systems in advanced railway engineering These research studies will be of interest to all those involved in the development of railways including managers consultants railway engineers designers of advanced train control systems and computer specialists

Transporting Moments: Mobility, Australian Railways and the Trained Society Colin Symes,2015-04-06 Sociologists have suggested that being on the move entails a complex choreography comprised of passenger comportment signage announcements and posters Employing insights from mobility theory Transporting moments provides an account of railway culture from a passenger s perspective The book uses the context of commuting in Sydney at a time when elements of its intra urban rail network were being upgraded as its principal case study This upgrade covers its rolling stock infrastructure and linguistic landscape It is argued that understanding the rationale behind these changes requires an understanding of the historical and policy context in which the railways of Sydney s New South Wales and

Australia are embedded This is also the case with the nation's long distance trains whose operators have fought hard to stave off competition from airliners and cars Transporting moments therefore presents strong case for preserving public transport as a more equitable and sustainable form of mobility Governments Australian or otherwise can use these insights for productive investment in their rail networks and public transportation service in general and for reducing the nation's addiction to the automobile With its invaluable insights into travelling on trains Transporting moments is a fascinating addition to the growing corpus of literature on day to day mobility

Improving Energy Efficiency and Reducing Emissions through Intelligent Railway Station Buildings Asian Development Bank,2015-09-01 Buildings in the People's Republic of China PRC consume 21% of the total energy produced in the country This study analyzes and proposes feasible energy saving and emission reducing solutions for domestic railway stations in the PRC The use of intelligent building controls support reduction of energy consumption minimization or elimination of energy wastes and cost savings Strong institutional mechanisms and railway building management methods and policies also promote technological innovation Moreover these are necessary to balance the interests of multiple parties to be able to achieve energy efficiency in railway station buildings in the PRC
