Rationality Relativism And The Human Sciences:

Rationality, Relativism and the Human Sciences Joseph Margolis, A.S. Krausz, R. Burian, 2012-12-06 The Greater Philadelphia Philosophy Consortium was launched in the early eighties. It began during a particularly lean period in the American economy. But its success is linked as much to the need to be in touch with the rapidly changing currents of the philosophical climate as with the need to insure an adequately stocked professional community in the Philadelphia area faced perhaps permanently with the threat of increasing attrition. The member schools of the Consortium now include Bryn Mawr College, the University of Pennsylvania, Temple University and Villanova University, that is the schools of the area that offer advanced degrees in philosophy. The philosophy faculties of these schools form the core of the Consortium, which offers graduate students the instructional and library facilities of each member school. The Consortium is also supported by the associated faculties of other regional schools that do not offer advanced degrees, notably those at Drexel University, Haverford College, La Salle University and Swarthmore College, both philosophers and members of other departments as well as interested and professionally qualified persons from the entire region. The affiliated and core professionals now number several hundreds, and the Consortium's various ventures have been received most enthusiastically by the academic community. At this moment the Consortium is planning its fifth year of what it calls the Conferences on the Philosophy of the Human Studies.

Routledge Encyclopedia of Philosophy: Index Edward Craig, 1998. Volume seven of a ten volume set which provides full and detailed coverage of all aspects of philosophy, including information on how philosophy is practiced in different countries, who the most influential philosophers were, and what the basic concepts are. Sociology as a Human Science Isaac Ariail Reed, 2023-04-25. Sociology as a Human Science is a set of foundational, wide-ranging and updated essays from Isaac Ariail Reed. Gathered together for the first time with a new introduction, they articulate a distinct perspective on concept and method in social science. Reed writes about realism and positivism, postmodernism and empiricism, mechanisms and causality, and power and history, developing thereby an understanding of the key debates out of which 21st century sociology has developed. Carefully considering all manner of arguments in metatheory and epistemology and moving towards a program of interpretive explanation focused on culture and power, Reed places sociology at the center of debates about knowledge production across the humanities and social sciences. His reconstructive approach, positioned after the posts, poststructuralism, postmodernism and postcolonialism, provides a way for interpretive sociology to provide analytically sound, theoretically extensive and empirically rich understandings of social life.

The Orders of Discourse John G. Gunnell, 1998-08-06. In this insightful book, distinguished political scientist John G. Gunnell explores the relationship between social science and philosophy and the range of problems that have attended this relationship. Gunnell argues that social science has turned to philosophy, especially to areas such as the philosophy of science and other sites of philosophical foundationalism, in search of cognitive identity and the grounds for normative and empirical judgment. Gunnell's emphasis is

on political and social theory and the theoretical constitution of social phenomena The Orders of Discourse will be of interest to political theorists political philosophers and social scientists **Is Science Value Free?** Hugh Lacey,2005-06-23 Exploring the role of values in scientific inquiry Hugh Lacey examines the nature and meaning of values and looks at challenges to the view posed by postmodernists feminists radical ecologists Third World advocates and religious fundamentalists that science is value free He also focuses on discussions of development especially in Third World countries This paperback edition includes a new preface Literature and Rationality Paisley Livingston,1991-12-12 This interdisciplinary study establishes connections between divergent approaches to rationality in philosophy social science and literary studies Livingston provides a broad survey of the basic assumptions and questions associated with concepts of rationality in philosophical accounts of action in decision theory and in the theory of rational choice **Heidegger on Science** Trish Glazebrook,2012-02-23 Although Martin Heidegger is well known for his work on technology he is not often discussed in the context of science broadly speaking This volume is the first to showcase diverse perspectives on Heidegger s assessments of the sciences looking at a number of different ways that Heidegger s writings contribute to questions concerning how we understand the world through science With particular attention to quantum theory natural science technoscience and a section devoted specifically to investigating what Being and Time has to say about science the book will be of interest to scholars in a wide range of disciplines and traditions It closes with consideration of questions about sustainability and ethics raised by Heidegger s engagement with the sciences *Radical Interpretation in Religion* Nancy Frankenberry,2002-09-19 Publisher Description **Roots in the Air** Michael Krausz,2018-11-12 By way of dialogues Michael Krausz offers philosophical reflections about his life as philosopher artist and musician He also rehearses his views about relativism interpretation creativity and self realization Much of Krausz s work has been inspired by conversations with thinkers such as Karl Popper Thomas Kuhn Isaiah Berlin the Dalai Lama and musicians such as Josef Gingold Frederik Prausnitz and Luis Biava While the death of his grandparents in Auschwitz continues to disquiet his consciousness Krausz s critiques of versions of Advaitic Hinduism and Tibetan Buddhism led him to a distinctive humanism This thought provoking book includes personal and professional accounts about particular philosophers artists and musicians It will edify anyone who like Krausz has confronted issues of self identity and human existence **Unapologetic Theology** William Carl Placher,1989-01-01 In Unapologetic Theology William Placher examines religion and the search for truth in a pluralistic society Among the issues he considers are science and its relation to belief dialogue among various religions and the theological method **Rediscovering Empathy** Karsten Stueber,2010-08-13 Empathy as epistemically central for our folk psychological understanding of other minds a rehabilitation of the empathy thesis in light of contemporary philosophy of mind In this timely and wide ranging study Karsten Stueber argues that empathy is epistemically central for our folk psychological understanding of other agents that it is something we cannot do without in order to gain understanding of

other minds Setting his argument in the context of contemporary philosophy of mind and the interdisciplinary debate about the nature of our mindreading abilities Stueber counters objections raised by some in the philosophy of social science and argues that it is time to rehabilitate the empathy thesis Empathy regarded at the beginning of the twentieth century as the fundamental method of gaining knowledge of other minds has suffered a century of philosophical neglect Stueber addresses the plausible philosophical misgivings about empathy that have been responsible for its failure to gain widespread philosophical acceptance Crucial in this context is his defense of the assumption very much contested in contemporary philosophy of mind that the notion of rational agency is at the core of folk psychology Stueber then discusses the contemporary debate between simulation theorists who defend various forms of the empathy thesis and theory theorists In distinguishing between basic and reenactive empathy he provides a new interpretive framework for the investigation into our mindreading capacities Finally he considers epistemic objections to empathy raised by the philosophy of social science that have been insufficiently discussed in contemporary debates Empathy theorists Stueber writes should be prepared to admit that although empathy can be regarded as the central default mode for understanding other agents there are certain limitations in its ability to make sense of other agents and there are supplemental theoretical strategies available to overcome these limitations

Context , Political Theory and Social Science J. Gunnell, 2011-02-14 This work is devoted to a critical analytical examination of the history character and conduct of contemporary academic political theory and to a reconsideration of significant elements of this field of inquiry from the perspective of the philosophy of Ludwig Wittgenstein Risk Science and Sustainability Tom Beer, Alik Ismail-Zadeh, 2012-12-06 1 AUK ISMAIL ZADEH 2 TOM BEER 3 1 International Institute of Earthquake Prediction Theory and Mathematical Geophysics Russian Academy of Sciences Warshavskoye shosse 79 2 Moscow 113556 Russia e mail aismail mitp ru 2 Geophysikalisches Institut Universittit Karlsruhe Hertzstr 16 Karlsruhe 76187 Germany e mail Alik Ismail Zadeh gpi uni karlsruhe de 3 CSIRO Environmental Risk Network CSIRO Atmospheric Research Aspendale Vic 3195 Australia e mail Tom Beer csiro au The world faces major threats to the sustainability of our planet These threats are accompanied by the immediate dangers of natural and man made disasters Our vulnerability to them is greatly magnified with each passing year undermining our ability to maintain a sustainable and productive world into the 21st Century and beyond Both history and common sense teach us that science has a tremendous potential to find ways to cope with these threats 1 The EUROSCIENCE working group Science and Urgent Problems of Society 2 and the IUGG Commission on Geophysical Risk and Sustainability were initiators of the EUROSCIENCE IUGG Advanced Research Workshop Science for Reduction of Risk and Sustainable Development of Society sponsored by the NATO Science Program The Workshop was held on 15 16 June 2002 in Budapest Hungary More than 40 participants from 17 countries took part in the Workshop Talks and discussions addressed mainly the question of how science can help in reduction of risk and sustainable development of society **Science Unfettered** J. E. McGuire, Barbara Tuchańska, 2000

Working on a large canvas *Science Unfettered* contributes to the ongoing debates in the philosophy of science. The ambitious aim of its authors is to reconceptualize the orientation of the subject and to provide a new framework for understanding science as a human activity. Mobilizing the literature of the philosophy of science, the history of science, the sociology of science, and philosophy in general, Professors McGuire and Tuchanska build on these fields with the view of transforming their insights into a new epistemological and ontological basis for studying the enterprise of science. In this approach, McGuire and Tuchanska have combined work from both Anglo American and Continental traditions of philosophy. As a result, the works of Popper, Kuhn, Quine, and Lakatos, as well as Heidegger, Gadamer, Nietzsche, Foucault, and Feyerabend, are called into play. In addition, *Science Unfettered* deals extensively with history and historicity, offering a theory of historicity of science as it emerges in sociocultural contexts. Unorthodox in its approach, *Science Unfettered* articulates an alternative that views science ontologically as a practice, a perspective from which traditional issues concerning the relationship of experiment to theory, the cognitive to the social, the relation between historical change and epistemic validity, the meaning of objectivity, and the like, can be addressed in a more fruitful way than is possible by starting with the traditional ontological framework of subject and object.

Epistemology Nicholas Rescher, 2012-02-01 Guided by the founding ideas of American pragmatism, *Epistemology* provides a clear example of the basic concepts involved in knowledge acquisition and explains the principles at work in the development of rational inquiry. It examines how these principles analyze the course of scientific progress and how the development of scientific inquiry inevitably encounters certain natural disasters. At the center of the book's deliberations, there lies not only the potential for scientific progress but also the limit of science as well. This comprehensive introduction to the theory of knowledge addresses a myriad of topics, including the critique of skepticism, the nature of rationality, the possibility of science for extraterrestrial intelligences, and the prospect of insoluble issues in science.

Rewired Paul N. Markham, 2007-07-01 *Rewired* begins with the claim that contemporary views of Christian spirituality, particularly in the American evangelical tradition, concentrate too exclusively on the interior and individual nature of spiritual experience. Paul Markham argues that a reexamination of the doctrine of religious conversion is needed within American evangelicalism and finds resources for such a model in the Wesleyan theological tradition and from philosophical and scientific insights into a nonreductive physicalist view of human nature. In considering data from theology and science, this book represents an integrated work in science and religion.

Religion, Interpretation, and Diversity of Belief Terry F. Godlove, 1997 Often different religious traditions offer very different pictures of the world. In fact, religions are so fascinating partly because they present alternative pictures of the nature of time, space, persons, food, community, life, death, and so on. How are we to make sense of this radical diversity of belief? The most common response is to say that religions are alternative conceptual frameworks or schemes whose categories organize experience in sometimes diverse ways. On this view of the framework model of religious belief, we cannot map religious frameworks onto a single comprehensive grid because they

themselves function as the maps In this sense the Buddhist and Baptist are sometimes said to live in different worlds Religion Interpretation and Diversity of Belief traces the history of the framework model from Kant to Durkheim and then argues for its replacement Rather than seeing religions as all encompassing grids we must recognize that they themselves are constrained in at least two unavoidable ways first by the formal rules that make human experience possible at all and second by the fact that as language users we must presuppose that we hold the vast bulk of our beliefs in common Given these constraints we can then see religious differences however dramatic as relatively limited and largely theoretical The framework model is deeply entrenched in those disciplines central to the study of religion especially so in philosophy sociology anthropology psychology and theology The negative thrust of this is to suggest this allegiance needs to be reconsidered Positively the book sketches a picture of linguistic interpretation on which our differences religious or otherwise stand out against the background of what we have in common

Logics of Critical Explanation in Social and Political Theory Jason Glynos, David Howarth, 2007-09-12 This book develops a novel approach to critical explanation as a function of logics taking a distinctive approach to social science explanation and political studies more specifically which avoids the problem of scientism

The Disorder of Political Inquiry Keith Topper, 2009-07-01 Engaging the work of thinkers such as Rorty Taylor Bourdieu Bhaskar and Arendt and literature in political science and history and philosophy of science Topper proposes a pluralist normative and broadly pragmatist conception of political inquiry one alive to the notorious vagaries idiosyncrasies and uncertainties of political life
