Christian Theology and the Secular University Paul A. Macdonald, Jr., 2017-02-24 If the secular university by definition is non sectarian or non denominational then how can it accommodate a discipline like Christian theology Doesn't the traditional goal of theological study which is to attain knowledge of the divine fundamentally conflict with the main goal of secular academic study which is to attain knowledge about ourselves and the world in which we live So why should theology be admitted or even care about being admitted into secular academic life And even if theology were admitted what contribution to secular academic life could it make Working from a Christian philosophical and theological perspective but also engaging a wide range of theologians philosophers and religious studies scholars Christian Theology and the Secular University takes on these questions arguing that Christian theology does belong in the secular university because it provides distinct resources that the secular university needs if it is going to fulfill what should be its main epistemic and educative ends This book offers a fresh and unique perspective to scholars working in the disciplines of theology philosophy and religious studies and to those in other academic disciplines who are interested in thinking critically and creatively about the place and nature of theological study within the secular university

Wittgenstein, Education and the Problem of Rationality Michael A. Peters, 2021-01-21 This book develops an argument for a historicist and non foundationalist notion of rationality based on an interpretation of Wittgenstein of the Philosophical Investigations and On Certainty The book examines two notions of rationality a universal versus a constitutive conception and their significance for educational theory The former advanced by analytic philosophy of education as a form of conceptual analysis is based on a mistaken reading of Wittgenstein Analytic philosophy of education used a reading of Wittgenstein's philosophy of language to set up and justify an absolute universal and ahistorical notion of rationality By contrast the book examines the underlying influence of the later Wittgenstein on the historicist turn in philosophy of science as a basis for a non foundationalist and constitutive notion of rationality which is both historical and cultural and remains consistent with wider developments in philosophy hermeneutics and social theory This book aims to understand the philosophical motivation behind this view to examine its intellectual underpinnings and to substitute this universal conception of rationality by reference to a Hegelian interpretation of the later Wittgenstein that emphasizes his status as an anti foundational thinker

Expertise Out of Context Robert R. Hoffman, 2007 Researchers have revealed that real expertise while applied to well defined tasks with highly circumscribed contexts often stretches beyond its routine boundaries For example a medical doctor may be called upon to diagnose a rare disease or perform emergency surgery outside his or her area of specialization because other experts are not available Moreover in some cases the context for expertise is in a constant state of flux such that no one case is identical Expertise Out of Context is a culmination of some of the most insightful studies conducted by researchers in the fields of cognitive systems engineering and naturalistic decision making in the effort to better understand expertise and its development Born out of the Sixth International Conference on Naturalistic Decision Making a conference that gathers researchers who study cognition perception and reasoning outside of the traditional laboratory this book is organized in five parts the first of which provides an overview of the topic and presents varied perspectives Consequent sections cover how to make sense of things tools for thinking out of context how to cope with uncertainty in a changing workplace and teams operating out of context As researchers in naturalistic decision making have investigated such areas as the knowledge and decision making skills of expert firefighters critical care nurses military commanders and aircraft pilots this volume is of importance to an expansive
