**Raw Materials, Energy and Western Security** Hanns W. Maull, 1984-12-05      **New Technology and Western Security Policy** Robert O'Neill, 1985-06-18      *The Political Economy Of National Security* Helen V Milner, David A Baldwin, 2019-07-11 This bibliography focuses on books and articles dealing with the interplay of wealth and power in the context of national security policy emphasising on the economic instruments of statecraft that are used to pursue national security goals and examining the politics of economic cooperation      *The Dynamics of Japan's Relations with Africa* Kweku Ampiah, 2013-01-11 This is the first book to examine in depth Japan's relations with Africa Japan's dependence on raw materials from South Africa made it impossible for Tokyo in the 1970s and 1980s to support other African states in their fight against the minority government and its policy of apartheid Kweku Ampiah's detailed analysis of Japan's political economic and diplomatic relations with sub Saharan Africa from 1974 to the early 1990s makes it clear that Japan was lukewarm in the struggle against apartheid Case studies of Tanzania and Nigeria dissect Japan's trade aid and investment policies in sub Saharan Africa more widely      **East Asia, the West and International Security** Robert O'Neill, 1987-06-18

**Resources and Strategy** Ian O. Lesser, 1989-06-18 This study aims to show that current thinking about the role of resources in war and as a component of military potential in peacetime relies on notions derived from historical experience and changes in the nature of warfare not least the advent of nuclear weapons      *Prospects for Security in the Mediterranean* Robert O'Neill, 1988-06-18 A compilation of papers analyzing the issues affecting security in the Mediterranean area and their policy implications The Mediterranean is seen as a potential theatre for East West confrontation both on land and at sea as a key trade route and as an area of inter relationship conflicts      **Europe in the Western Alliance** Jonathan Alford, Kenneth Hunt, 2015-12-30 This analysis of the political and strategic dilemmas that Europeans now face makes a case for greater political and military cooperation and argues for the creation of a European defence identity that will not hinder improvements in East West relations nor loosen the ties with the US      NATO's Conventional Defences Stephen J. Flanagan, 1988-10-07 A review of the full range of recent official and non official schemes for improving NATO's conventional posture from exploitation of emerging technologies to non provocative defences in the light of prevailing military political economic and demographic trends      On Security Ronnie D. Lipschutz, 1995 The idea of global security has taken on new meaning in the post Cold War world compelling analysts of international relations to reassess the military political and cultural issues that intersect with the notion of security On Security represents a wide range of views on shifting concepts of security at the turn of the millennium when the tangible bipolar arrangement of the Cold War era world system no longer exists Unlike much work in the field the essays in this volume do not take the state for granted as the referent object of security Contributors probe deeper asking what it really is that we imagine needs securing

the international system the nation state culture On Security inquires further into what constitutes security protection against enemies suppression of a particular ethnic or religious group insulation against economic competitors And finally contributors look into how ideas about security enter the realm of public debate and become institutionalized in organizations and policies are they based on tangible objective threats or do they arise from psychological and emotional attitudes about feared enemies Ranging in perspective from neorealist to postmodernist to constructivist the essays in On Security attempt to find answers and to come to grips with some of the dilemmas confronting the idea of security today The contributors to On Security Barry Buzan Beverly Crawford James Der Derian Daniel Deudney Pearl Alice Marsh Ole Weaver and Ronnie D Lipschutz offer a thought provoking overview of the ongoing debate about the nature of political reality and international relations

**Doctrine, the Alliance and Arms Control** Robert O'Neill, 1986-06-18 An Introduction to Strategic Studies Barry Buzan, 1987-09-04 An Introduction to Strategic Studies addresses some of the major questions that govern both international relations and human survival This book provides a comprehensive introduction to the core concepts of contemporary strategic thinking It argues that strategic studies is about the impact of military technology on relations between states and that its specialised contribution must always be seen within the broader context of international economic and political relations

**The Central American Security System** Peter Calvert, 1988 This study arising from the Ford Foundation Southampton project on North South security relations focuses on the concept of security in Central America and the Caribbean and on perceptions by states in the region of the rival claims of political independence economic well being national security and regional stability The Central American region is of particular interest because of the range it displays of crisis management regimes and crisis control techniques it also provides an illuminating example of the contemporary interaction of East West and North South relations Specific case studies are combined with theoretical analysis in this integrated assessment of the Central American situation that includes contributions from leading scholars in the UK United States and Central America itself

**The Oxford Handbook of Transformations of the State** Stephan Leibfried, Evelyne Huber, Matthew Lange, Jonah D. Levy, Frank Nullmeier, John D. Stephens, 2015-06-11 This Handbook offers a comprehensive treatment of transformations of the state from its origins in different parts of the world and different time periods to its transformations since World War II in the advanced industrial countries the post Communist world and the Global South Leading experts in their fields from Europe and North America discuss conceptualizations and theories of the state and the transformations of the state in its engagement with a changing international environment as well as with changing domestic economic social and political challenges The Handbook covers different types of states in the Global South from failed to predatory rentier and developmental in different kinds of advanced industrial political economies corporatist statist liberal import substitution industrialization and in various post Communist countries Russia China successor states to the USSR and Eastern Europe It also addresses crucial challenges in different areas of state intervention
