algorithms Every year the Abel Prize the G del Prize and the Turing Award honor far reaching mathematical discoveries Sometimes these discoveries are brand new ideas and sometimes they are applications of mathematics to solve real world problems In this collection recipients of these awards will show you both the beautiful abstract ideas they study and the amazing power they have to transform the modern world **Non-Photorealistic Computer Graphics** Thomas

critical overview of an emerging field with contributions from both scholars and artist practitioners Over the last decade machinima the use of computer game engines to create movies has emerged as a vibrant area in digital culture Machinima as a filmmaking tool grew from the bottom up driven by enthusiasts who taught themselves to deploy technologies from computer games to create animated films quickly and cheaply The Machinima Reader is the first critical overview of this rapidly developing field The contributors include both academics and artist practitioners They explore machinima from multiple perspectives ranging from technical aspects of machinima from real time production to machinima as a performative and cinematic medium while paying close attention to the legal cultural and pedagogical contexts for machinima The Machinima Reader extends critical debates originating within the machinima community to a wider audience and provides a foundation for scholarly work from a variety of disciplines This is the first book to chart the emergence of machinima as a
