Reaching Health For All:

Achieving Health for All David Bishai, Meike Schleiff, 2020-09-15 How did seven low and middle income countries inspired by the landmark Alma Ata Declaration dramatically improve citizen health by focusing on primary health care The Alma Ata Declaration of 1978 marked a potential turning point in global health signaling a commitment to primary health care that could have improved the safety of air food water roads homes and workplaces in all 180 countries that signed it Unfortunately progress in many countries stalled in the 1980s The declaration was however embraced by a number of countries where its implementation led to substantial improvement in citizen health Achieving Health for All reveals how inspired by Alma Ata the governments of seven countries executed comprehensive primary health care systems deploying new cadres of community based health workers to bring relevant services to ordinary households Drawing on a set of narrative case studies from Bangladesh Indonesia Ethiopia Nepal Ghana Sri Lanka and Vietnam the book explains how a primary health care focus succeeded in improving population health The book also conclusively demonstrates that comprehensive multisector community controlled and population level primary health care is a viable strategy that against the odds has led to sustainable scalable good health at lower cost Bringing together a group of experts to analyze the forty year legacy of the Alma Ata Declaration Achieving Health for All is a fascinating look at the work needed to transform nations from places that make people sick to places where they stay healthy An inspiring array of lessons learned along the way shows how readers can make policies that support the health of all people Contributors Onaopemipo Abiodun Vinya Ariyaratne John Koku Awoonor Williams Kedar Prasad Baral Ayaga A Bawah Pedro M s Bermejo Fred N Binka David Bishai Carolina Cardona Dennis Carlson Chala Tesfaye Chekagn Hoang Khanh Chi Svea Closser Luc Barri re Constantin Zufan Abera Damtew Marlou de Rouw Nadia Diamond Smith Philip Forth Mignote Solomon Haile Nguyen Thanh Huong Taufique Joarder Alice Kuan Seblewengel Lemma Sasmira Matta Ahmed Moen Rituu B Nanda Frank K Nyonator Ferdous Arfina Osman Claudia Pereira Henry B Perry James F Phillips Meike Schleiff Melissa Sherry Rita Thapa Kebede Worku

Globalization and Health Ichirō Kawachi, Sarah P. Wamala, 2007. Globalization is breaking down economic, political, cultural, demographic, and social barriers across the world at an astonishing pace. The topic of globalization can arouse passionate debate in many circles, including academic journals, the popular media, and even on the streets. This new world order is marked by new actors, new rules of governance, new forms of communication, and the global movement of populations. Health is an exquisitely sensitive mirror of social conditions, and the authors of this book argue that the assessment of health is an important criterion for evaluating and monitoring the progress of globalization. This book provides an analysis of the most serious global threats to health, the tools that can be used to evaluate them, and the international agencies established to respond to them. Medical threats such as infectious diseases, obesity, tobacco use, and global climate change are discussed, but the authors also expand their scope to include socio-political health impacts such as economic inequality. The complex role of organizations such as the World Health Organization, the International Monetary Fund, and the World Bank is also analyzed, as is the increasing interconnectedness of health and non-health actors. Is this blurring of boundaries really beneficial to the public's health, or have these actors abandoned health issues for power politics? By drawing together an international group of health experts, *Globalization and Health* provides a comprehensive account of the successes and failures, as well as the challenges and opportunities of globalization for public health.
