Reactor Dosimetry In The 21st Century:

Reactor Dosimetry in the 21st Century Jan Wagemans, Hamid Ait Abderrahim, 2003 This book presents the state of the art in reactor dosimetry as applied to nuclear power plants and to high performance research reactors accelerator driven systems and spallation sources The reader will also find the latest advances in computer code development for radiation transport and shielding In addition the book focuses on radiation measurement techniques **Reactor Dosimetry State Of** The Art 2008 - Proceedings Of The 13th International Symposium Wim Voorbraak, Luigi Debarberis, Pierre D'hondt, Jan Wagemans, 2009-08-19 This book gives the state of the art in the field of reactor dosimetry as applied in nuclear power plants and research reactors Surveillance programs are presented for nuclear power plants in Europe including Russia and Ukraine USA Argentina and Korea New cross section measurements from most of the European American and Japanese research reactors are reported The latest developments in computer code development for radiation transport and shielding calculations and radiation measurement techniques are also highlighted **Physics and Engineering of Radiation Detection** Syed Naeem Ahmed, 2014-11-20 Physics and Engineering of Radiation Detection presents an overview of the physics of radiation detection and its applications It covers the origins and properties of different kinds of ionizing radiation their detection and measurement and the procedures used to protect people and the environment from their potentially harmful effects The second edition is fully revised and provides the latest developments in detector technology and analyses software Also more material related to measurements in particle physics and a complete solutions manual have been added Discusses the experimental techniques and instrumentation used in different detection systems in a very practical way without sacrificing the physics content Provides useful formulae and explains methodologies to solve problems related to radiation measurements Contains many worked out examples and end of chapter problems Detailed discussions on different detection media such as gases liquids liquefied gases semiconductors and scintillators Chapters on statistics data analysis techniques software for data analysis and data acquisition systems **Properties and Applications of Silicon Carbide** Rosario Gerhardt, 2011-04-04 In this book we explore an eclectic mix of articles that highlight some new potential applications of SiC and different ways to achieve specific properties Some articles describe well established processing methods while others highlight phase equilibria or machining methods A resurgence of interest in the structural arena is evident while new ways to utilize the interesting electromagnetic properties of SiC continue to increase

Californium-252 Isotope for 21st Century Radiotherapy J.G. Wierzbicki,2012-12-06 Californium 252 is a neutron emitter with a high specific activity making it useful in a variety of applications the most spectacular of which is in brachytherapy for cancer patients Radiation oncology has exhausted nearly every option for treating radioresistant tumors by photon brachytherapy and therefore new types of radiation need to be studied to improve the curability of cancer Audience Californium brachytherapy is used in only a few radiation therapy centers in the world so the book will be highly instructive

for radiation oncologists medical physicists and radiobiologists.
