Myers,Richard O. Straub,2010-07-27 Longtime Myers collaborator Richard Straub provides an updated study guide for the new edition Twisted L-Functions and Monodromy Nicholas M. Katz,2009-01-10 For hundreds of years the study of elliptic curves has played a central role in mathematics The past century in particular has seen huge progress in this study from Mordell s theorem in 1922 to the work of Wiles and Taylor Wiles in 1994 Nonetheless there remain many fundamental questions where we do not even know what sort of answers to expect This book explores two of them What is the average rank of elliptic curves and how does the rank vary in various kinds of families of elliptic curves Nicholas Katz

answers these questions for families of big twists of elliptic curves in the function field case with a growing constant field The monodromy theoretic methods he develops turn out to apply still in the function field case equally well to families of big twists of objects of all sorts not just to elliptic curves The leisurely lucid introduction gives the reader a clear picture of what is known and what is unknown at present and situates the problems solved in this book within the broader context of the overall study of elliptic curves The book's technical core makes use of and explains various advanced topics ranging from recent results in finite group theory to the machinery of  $l$ -adic cohomology and monodromy Twisted L Functions and Monodromy is essential reading for anyone interested in number theory and algebraic geometry **SRDS Consumer**

Roche,2008-10-01 Not just another jeremiad against prevailing isms and orthodoxies Why Literature Matters in the 21st Century examines literature in its connection to virtue and moral excellence The author is concerned with literature as the teacher of virtue The current crisis in the humanities Mark William Roche argues may be traced back to the separation of art and morality When the distinction between is and ought is leveled he writes the power of the professions increases The arts and humanities concern themselves with the fate and prospects of humankind Today that fate and those prospects are under the increasing influence of technology In a technological age literature gains in importance precisely to the extent that our sense of intrinsic value is lost In its elevation of play and inexhaustible meaning literature offers a counterbalance to reason and efficiency It helps us grasp the ways in which diverse parts form a comprehensive and complex whole and it connects us with other ages and cultures Not least great literature grapples with the ethical challenges of the day **Culminated Index**
