Understanding Language Classroom Contexts Martin Wedell, Angi Malderez, 2013-04-11 Arguably the whole point of education is to effect change in what people know and are able to do Globalization has contributed to a common perception worldwide of the need to introduce changes to the teaching and learning of languages The success of many attempts to do so has been limited by insufficient consideration of implementation contexts Understanding Language Classroom Contexts explores and illustrates how what happens in any language classroom is influenced by and can be an influence on the contexts in which it is situated A clear understanding of these influences is thus the starting point for planning effective change The book considers many visible and invisible features of the multiple layers of any context and provides a framework for understanding the types of factors that may influence whether changes planned by a teacher or externally initiated are likely to be successful The book will help teachers and educational managers or change planners outside the classroom to understand why their classrooms are as they are and so to make informed decisions about what can or cannot or not easily be changed and suggests how any changes might be appropriately managed

Assessing Health-related Quality of Life of Children Pei Wang, Shunping Li, Jing Wu, Nan Luo, 2024-02-20 Assessing health related quality of life HRQOL of Children has been a popular topic in recent years worldwide However there are several issues gaps in this research area which need to be addressed For instance previous studies on HRQOL of Children populations have normally used HRQOL instruments designed for adults These measurements may not be suitable for children as they are in a series of cognitive developmental stages and have different perspectives towards the relative importance of HRQOL dimensions In order to tackle this issue and to accurately measure children's HRQOL a set of dedicated HRQOL instruments should be first developed and validated The validated instruments could then be applied to the population measuring their HRQOL In addition the HRQOL information collected could be translated into health utility score if it is measured by utility instruments e.g EQ 5D Y for the population Moreover the relevant studies on these issues is still lacking especially in non western countries
