web dissipation in a linear oscillator is commonly described by the relaxation time or equivalently the dissipation rate or by either of two dimensionless quantities the quality factor q and the relaxation factor

dissipation enhanced unidirectional transport in topological systems - May 06 2022

web nov 17 2023 dissipation is a common occurrence in real world systems and is generally considered to be detrimental to transport in this study we examine the transport properties of a narrow quantum anomalous hall system with dissipation applied on one edge when the fermi level resides within the hybridization gap we find that while transport is
