White, 2008 Accounting has been a lead sector in the General Agreement on Trade in Services GATS negotiations to reduce barriers to trade in professional services This is no accident Accounting already has a substantial international component the largest accounting firms have major international presences and have been eager to operate in less restrictive environments Accounting is coming to be understood as a vital infrastructural element of financial services and as finance becomes more global accounting too should become more global Similarly as large businesses enterprises generally have become more international their need for more international accounting services has grown But despite the considerable international presences of the major accounting firms virtually all countries maintain various types of restrictions that impede the flow of accounting services across borders The consequences have been higher costs poorer service to clients and reduced efficiency as well as lower quality accounting auditing standards in many countries Substantial progress can and should be made to reduce the current barriers to freer trade in accounting services

International Contracting: Law and Practice Larry A. DiMatteo, 2016-10-25

For well over a decade this prized guide has served practitioners handling the legal ramifications of international contracting projects. The fourth revised and expanded edition thoroughly describes the new and ever-changing concepts and procedures that continue to redefine the researching, drafting, and execution of international contracts. More profoundly, it takes fully into account the hugely increasing volume of international trade and its ongoing expansion into more and more countries worldwide and the concomitant need for businesspersons and transactional lawyers to be aware of the numerous recent international conventions and supranational responses to facilitate trade. All the invaluable features of earlier editions are of course still here, including analysis of key contract issues unique to various types of contracting, common contract clauses such as choice of law and dispute resolution clauses, contract checklists, insights gleaned from actual cases and arbitral proceedings, and clear explanation of the principles of good contract drafting. The major relevant international conventions, model laws, pertinent national laws, legal guides, and other documents and instruments are all covered with primary texts provided in appendices. Among the numerous issues and topics that arise are the following: incorporation of standard terms, difficulties of multiple language contracts, *lex mercatoria*, liability based upon preliminary agreements, issues of termination, regulation of Internet sales, role of model or uniform laws, sale of services, national law restrictions on the cross-border sale of services, intellectual property transfer and licensing agreements, franchising and joint ventures, electronic contracting and confidentiality, nondisclosure agreements, and covenants not to compete. More than merely an accessible reference that can be used as a framework tool in the negotiating and drafting of international contracts, this volume offers expert insights regarding the reasonableness of many contract clauses and the likelihood of their enforcement in a foreign jurisdiction. Because knowledge of the nuances of international transactional law cannot be overstated, this book is not only valuable but necessary. An adroit combination of contract theory and contract practice, the book continues to provide guidance to the law practitioner and student alike.
