Reflections On Medicine Biotechnology And The Law:

Reflections on Medicine, Biotechnology and the Law Zelman Cowen, University of Nebraska--Lincoln. College of Law, 1985 *Reflections on Medicine, Biotechnology, and the Law* Zelman Cowen, 1986 Human Rights and Biomedicine George P. Smith II, 2021-08-04 The eight chapters within this volume are structured around an exploration of the fundamental issues in the field of biomedical human rights dignity and autonomy in not only procreative liberties but throughout the complete cycle of life and death the freedom of scientific inquiry into the new biotechnological methods of collaborative reproduction the right to genetic integrity at birth and throughout life and the equitable right to health or access to health care benefits during life and old age All these central issues are tested of necessity but utilitarian principles which in turn force the templates for decision making evaluate the gravity of harm deriving from a particular human right and its recognition and enforcement measured against the utility of the social economic or cultural good accruing from recognition of such a right in the first instance Ultimately cultural relativism will be seen more often than universality as the determinative point of balance This volume not only informs the ongoing debate on the role of human rights in biomedicine but will also provide enlightened responses to the troublesome issues presented in this new age of biotechnology

Thoughts About Thoughts Dr. Munir A. Cheema, 2020-06-30 One life is far too short for one to start learning from a scratch In honing these stray thoughts I have leaned heavily on others Many of my ideas tallied with those of my associates some wise some scholarly They have made such instant impact that I can no longer discern the origin or legacy of the thoughts Our sentiments are alike like in hospitals whose walls have heard more cordial prayers than in temples synagogues churches and the mosques Ours is a lineage where we share our callings I trail a dynasty of writers particularly medical that have similar passions Our thoughts and the themes are alike because the subject is common I bask in the reflected glory of my predecessors who stand on the shoulders of their precursors Our knowledge is concord *Global Biopiracy* Ikechi Mgbeoji, 2011-11-01 Legal control and ownership of plants and traditional knowledge of the uses of plants TKUP is a vexing issue The phenomenon of appropriation of plants and TKUP otherwise known as biopiracy thrives in a cultural milieu where non Western forms of knowledge are systemically marginalized and devalued as folk knowledge or characterized as inferior Global Biopiracy rethinks the role of international law and legal concepts the Western based Eurocentric patent systems of the world and international agricultural research institutions as they affect legal ownership and control of plants and TKUP The analysis is cast in various contexts and examined at multiple levels The first deals with the Eurocentric character of the patent system international law and institutions The second involves the cultural and economic dichotomy between the industrialized Western world and the westernizing developing world The third level of analysis considers the phenomenal loss of human cultures and plant diversity Exhaustively researched and eloquently argued Global Biopiracy sheds new light on a contentious topic The impact of intellectual property law on indigenous peoples and informal or traditional innovations is a field of study that currently includes only a handful of scholars Biopiracy will be an invaluable resource for students teachers and legal practitioners Human Rights and Human Nature Marion Albers, Thomas Hoffmann, Jörn Reinhardt, 2014-02-18 This book explores both the possibilities and limits of arguments from human nature in the context of

human rights Can the concept of human nature provide a basis for understanding fundamental rights Is it plausible to justify the claim to universal validity of human rights by reference to human nature Or does the idea of human rights in its modern post 1945 manifestation go in essence beyond human nature The essays in this volume introduce naturalistic positions and their concomitant critiques They address the role that human nature both actually does and potentially may play in forming a foundation for and acting as an exemplification of fundamental rights Beyond that they give attention to the challenges caused by Life Sciences Human nature itself is subject to transformation and transgression in an unprecedented manner The essays reflect on issues such as reproduction species manipulation corporeal autonomy and enhancement Contributors are jurists philosophers and political scientists from Germany Switzerland Turkey Poland and Japan Current Legal Theory, 1988
