Gastroesophageal Reflux Disease (GERD): Back to Surgery? L. Krähenbühl, M. W. Büchler, E. Frei, C. Klaiber, 1997. This volume provides a detailed and comprehensive review of current knowledge concerning all aspects of gastroesophageal reflux disease (GERD). The opening chapters on its pathogenesis and epidemiology include discussions of *Helicobacter pylori* as an etiological agent and Barrett's esophagus. The bulk of the volume is taken up with critical reviews of all the contemporary approaches to GERD, both medical and surgical, open and laparoscopic, and presents the early results from laparoscopic trials throughout the world. The book concludes with detailed descriptions from expert practitioners of the various alternative laparoscopic fundoplication techniques. This timely publication will be of interest not only to gastroenterologists and gastrointestinal surgeons but to all doctors and general practitioners who must advise and prescribe treatment for patients with this common distressing but remediable complaint.

Gastro-esophageal Reflux in Childhood Problems of Splenic Surgery in Childhood P. Wurnig, 2012-12-06. In 1968 the first contacts were arranged with the publishing house of Urban Schwarzenberg concerning the establishment of a periodical to be produced in English with the aim of publishing important scientific work in pediatric surgery and related disciplines. I thought especially of certain excellent inaugural dissertations and theses. When Urban Schwarzenberg promised to start such a series I recruited Peter Rickham then in Liverpool and now in Zurich and Jean Prevot of Nancy as executive editors. We chose the title *Progress in Pediatric Surgery* / *Fortschritte der Kinderchirurgie* / *Acquisitions en Chirurgie Infantile* as the name of our new series. The first volume was published in 1970 followed by another 16 volumes during the next 14 years. At the suggestion of Michael Urban we turned from the publication of long papers to theme-based volumes which proved to be extraordinarily useful. Mr

Urban the head of Urban Schwarzenberg told us in 1982 that his firm could no longer look after Progress in Pediatric Surgery With the agreement of Mr Urban we had to look for another publisher and found Springer Verlag who agreed to continue publishing Progress in Pediatric Surgery in the approved lay out We cordially thank Dietrich Götze of Springer Verlag for his helpful support This volume No 18 is the first of Progress in Pediatric Surgery to appear under the guidance of Springer Verlag We want to express our thanks to Mr Urban and Dr Benign Lesions of the Esophagus and Cancer Robert Giuli, Richard W. Difficult Decisions in Thoracic Surgery Mark K. Ferguson,2007-03-12 Why do thoracic surgeons need training in decision making Many of us who have weathered harrowing residencies in surgery feel that after such experiences decision making is a natural extension of our selves While this is no doubt true correct decision making is something that many of us have yet to master The impetus to develop a text on evidence based decision making in thoracic surgery was stimulated by a conference for cardiothoracic surgical trainees developed in 2004 and sponsored by the American College of Chest Physicians During that conference it became clear that we as thoracic surgeons are operating from a very limited fund of true evidence based information What was also clear was the fact that many of the decisions we make in our everyday practices are not only uninformed by evidence based medicine but often are contradictory to existing guidelines or evidence based recommendations The

objectives of this book are to explain the process of decision making both on the part of the physician and on the part of the patient and to discuss specific clinical problems in thoracic surgery and provide recommendations regarding their management using evidence based methodology Producing a text that will purportedly guide experienced practicing surgeons in the decision making process that they are accustomed to observe on a daily basis is a daunting task **Gastrointestinal**
