The Central Nervous System of Vertebrates, Vol. 3/I H. Kuhlenbeck, 1970-05-27 In 1927 Hartwig Kuhlenbeck published a series of lectures on the central nervous system of vertebrates and gave neurobiology its standard reference for decades The present work now complete in 5 volumes represents a monumental expansion of the early lectures *Headless Males Make Great Lovers* Marty Crump, 2024-05-31 The natural world is filled with diverse not to mention quirky and odd animal behaviors Consider the male praying mantis that continues to mate after being beheaded the spiders insects and birds that offer gifts of food in return for sex the male hip pocket frog that carries his own tadpoles the baby spiders that dine on their mother the beetle that craves excrement or the starfish that sheds an arm or two to escape a predator's grasp *Headless Males Make Great Lovers and Other Unusual Natural Histories* celebrates the extraordinary world of animals with essays on curious creatures and their amazing behaviors In five thematic chapters Marty Crump a tropical field biologist well known for her work with the reproductive behavior of amphibians examines the bizarre conduct of animals as they mate parent feed defend themselves and communicate Crump's enthusiasm for the unusual behaviors she describes from sex change and free love in sponges to aphrodisiac concoctions in bats is visible on every page thanks to her skilled storytelling which makes even sea slugs dung beetles ticks and tapeworms fascinating and appealing Steeped in biology *Headless Males Make Great Lovers* points out that diverse and unrelated animals often share seemingly bizarre behaviors evidence Crump argues that these natural histories though outwardly weird are successful ways of living Illustrated throughout and filled with vignettes of personal and scientific interest *Headless Males Make Great Lovers* will enchant the general reader with its tales of blood squirting horned lizards and intestine ejecting sea cucumbers all in the service of a greater appreciation of the diversity of the natural histories of animals **Medical Books and Serials in Print**, 1984 *Aquatic Oligochaetes* Brenda M. Healy, Trefor B. Reynoldson, Kathryn A. Coates, 2012-12-06 The book contains papers on the biology of aquatic oligochaetes and some related groups They cover a wide range of topics including phylogeny taxonomy geographic distribution freshwater and marine ecology population dynamics histology and ultrastructure physiology and behaviour The wide scope is in line with recent trends in annelid research with less emphasis on pollution studies and faunistics and a renewed interest in experimental biology using new techniques **Medical and Health Care Books and Serials in Print**, 1986 **Textbook of Neural Repair and Rehabilitation: Volume 2, Medical Neurorehabilitation** Michael E. Selzer, Stephanie Clarke, Leonardo G. Cohen, Gert Kwakkel, Robert H. Miller, 2014-04-24 In two freestanding volumes *Textbook of Neural Repair and Rehabilitation* provides comprehensive coverage of the science and practice of neurological rehabilitation Revised throughout bringing the book fully up to date this volume *Medical Neurorehabilitation* can stand alone as a clinical handbook for neurorehabilitation It covers the practical applications of the basic science principles presented in Volume 1 provides authoritative guidelines on the management of disabling symptoms and describes comprehensive rehabilitation approaches

for the major categories of disabling neurological disorders New chapters have been added covering genetics in neurorehabilitation the rehabilitation team and the economics of neurological rehabilitation and brain stimulation along with numerous others Emphasizing the integration of basic and clinical knowledge this book and its companion are edited and written by leading international authorities Together they are an essential resource for neuroscientists and provide a foundation of the work of clinical neurorehabilitation professionals **Subject Guide to Books in Print** ,1996

Bowker LLC,1979-05 **The Principal Diseases of Lower Vertebrates** H. Reichenbach-Klinke,E. Elkan,2013-10-22 The Principal Diseases of Lower Vertebrates presents the material published by Heinz H Reichenbach Klinke between 1957 and 1962 in three separate volumes as Krankheiten der Aquarienfische Alfred Kernen Stuttgart Krankheiten der Amphibien and Krankheiten der Reptilien Gustav Fischer Stuttgart The scope of the work has been enlarged with material contributed by E Elkan who has also done the translation Representatives of the main groups of parasites affecting fish have been presented as far as possible The book is organized into three parts covering the diseases of fishes amphibians and reptiles Experience has shown that those who keep or are interested in one kind of lower vertebrate will sooner or later also take an interest in one of the other groups It was therefore thought expedient to include what is at present known of lower vertebrate pathology in one volume even at the risk of some repetition where fishes amphibians and reptiles suffer from similar diseases or are the victims of identical parasites
