Sex Role Issues In Mental Health:

Sex-role Issues in Mental Health Kay F. Schaffer, 1980

Mental Health, Racism, and Sexism Charles V.

Willie, 1995-01-15 The essays in this volume discuss racism and sexism as they affect mental health. In particular, they focus on training, diagnosis, treatment, and research, emphasizing the power relationships between individuals and groups that cause unequal access to mental health care. They offer perspectives on issues and their distinct effects on mental health: interracial adoptions, teenage motherhood, gender bias in mental health diagnosis and therapy, prisons used as substitutes for hospitals, homeless families, and increasing violence in the home, on college campuses, and in the streets.

Issues in the Psychology of Women Maryka Biaggio, Michel Hersen, 2007-05-08 Over the past 15 years I have taught a graduate level course in Psychology of Women to students in two different professional psychology programs. Because my students were at the doctoral level and often had some familiarity with the psychology of women, these courses focused on bringing a feminist analysis of psychology and integrating a feminist analysis into one's scholarly work and professional activities. Although I used several fine psychology of women textbooks during this time, I found none that was specifically designed for graduate students. Thus, I always augmented the textbook with journal articles on specific aspects of the topic, and these focused articles have typically been well received by the students. The students whom I have encountered in these courses have often expressed a wish for a textbook that is designed for their needs. I think what they are asking for is one that could serve as a foundation for their scholarly analysis of psychology as well as a springboard for thoughtful application of a feminist perspective to the profession of psychology. Therefore, *Issues in the Psychology of Women* has been designed to serve as a textbook for advanced undergraduate or graduate courses including Psychology of Women or Feminist Analysis of Psychology. This book is the collective work of authors with special expertise in their chapter topic.

Rickel, Meg Gerrard, Ira Iscoe, 1984 This book in its diversity of topics reflects the reemergence of concern with women's issues in the last decade and the vigor and pioneering quality of scholarship in the area Such extensive albeit uneven development says something about the state of our society as well for organized scholarship is a form of problem solving part of the process of working through issues that come to the attention of observers of and commentators on the social world Be we can go further By recognizing that the contemporary women's movement is not new but is in keeping with a stream of feminism at least 150 years old we can encourage the current rekindling of interest and consciousness to reflect contemporary events as well xiii foreword Comprehensive Men's Mental Health David Castle, David Coghill, 2021-03-11 Although research shows that there is a silent crisis in men's mental health there remains surprisingly little literature on the subject This important textbook provides up to date practical and evidence based information on how mental health issues affect men and the way treatments should be offered to them Key opinion leaders from across the globe have been brought together to offer much needed understanding about the socio politico economic

context of men's lives today as well as ethnic and cultural effects and genetic epigenetic and gene environment interaction Clinically focused chapters cover topics such as suicide and self harm violence sociopathy and substance misuse in men depression anxiety and related disorders and psychotic and cognitive disorders The book uses a lifespan approach to assessment and treatment accounting for age and developmental phase An invaluable source of information for clinical specialists and trainees in psychiatry psychology and mental health nursing as well as social workers and occupational therapists

Finch, 2006-04-11 We live in a day and age in which many fields come together to define new ones and out of these newly defined areas come innovative practices and emergent ways of thinking The Sourcebook on Rehabilitation and Mental Health Practice documents one of these new fields one formed by the coalescence of rehabilitative and mental health services and employment Only recently have human service practitioners policy makers and administrators recognized that there is a growing synergy among these areas once separated by great gulfs of differences in culture perspectives and values and technologies It is not happenstance that rehabilitation mental health and employment are becoming increasingly integrated in contemporary human services There is considerable interest in work in contemporary society although different values and perspectives mediate this interest For people with disabilities an interest in work often comes from deep frustration from not having ready access to work and from not having enough of it to facilitate an acceptable quality of life or independent living Some people find work to be a source of problems that negatively affects their functioning They find the workplace stressful and unsupportive or they feel that work exacts too much from them reducing their quality of life and setting into motion numerous negative personal effects Beck 2000
