

- (4) the *institutional effects* of the struggle and balance between different theories of political leadership — plebiscitary, autocratic, bureaucratic — again primarily in their German and Russian settings,
- (5) the *moral-intellectual ambiguities* confronting the political writer who attributes historical or scientific correctness to particular mass-elite doctrines and action-strategies in the midst of the political struggle (not treated as a separate category).

Only one general conclusion is drawn from the "empirical" chapters, and the author labels that "not very original or startling." He finds that Weber on the whole maintained a different analytical stance, asked different kinds of questions, and applied different modes of analysis in his practical, as compared with his systematic-theoretical writings, and that "the full implications of these differences have never been adequately explored" (p. 261). Beyond specifying what he means by "different," Beetham gives no empirical tests for this finding, which many social scientists, in my opinion, would find both interesting and controversial. It is exactly for this reason, one suspects, Beetham is inhibited from recognizing how much the political and social sciences of today are indebted to Weber for the degree to which since 1890–1920 they have become more self-critical, more reflective, more analytical than merely positivist, more insistent upon the distinction between theoretical-scientific and practical-policy knowledge.

The conclusion of which the author seems most proud is that, as an historical and scientific sociologist, Weber committed "ideological errors." At specifiable points, particularly in Weber's treatment of democracy and capitalism (the generalization does not extend to the whole of the systematic-scientific work), Beetham tells us that Weber's conscious-unconscious need to support the value-syndrome expressed in the political writings led him to make assertions of sometimes universal, sometimes causal necessity that are conceptually distorted, one-sided, incomplete, or just not necessarily so. Further, the author argues that some of Weber's propositions cannot be defended on objectively scientific grounds, while others can be shown in specific cases to be logically refutable. The author makes these methodological debating points skillfully (pp. 264–275), but textual analysts who do not share his persuasion must decide the substantive weight to be given an appraisal of *The Protes-*

tant Ethic and Economy and Society on such grounds, particularly when by his own criterion of selection they should have been excluded from his appraisal.

The unsettled questions left by the book are whether modern political theory does or does not, should or should not, judge Weber's work on the basis of either the practical or the academic writings. The author might have said these are *its* dilemmas, but for his own good reasons he refrains from doing so. His dialectical position is that the "practical" criteria of the citizen-politician's world, or an ideological segment thereof, must be controlling. If I may employ a strained analogy, would it be appropriate to appraise Plato on the basis of *The Statesman* and *The Laws*, and then find that portions of *The Republic* are ideologically incorrect? Alternatively, would not an adequate modern evaluation have to start from the position that Weber acted politically not as one personality, but in at least three, perhaps four, roles: as theoretical system-builder, social scientist, policy analyst, and public action-mover?

Greedy Institutions: Patterns of Undivided Commitment. By Lewis A. Coser. (New York: The Free Press, 1974. Pp. 166. \$7.95.)

Greedy institutions "make total claims on their members and . . . attempt to encompass within their circle the whole personality . . . they seek exclusive and undivided loyalty" (p. 4). They are not, however, "total institutions" (in Erving Goffman's sense) because, instead of relying on physical force, they usually prefer "non-physical mechanisms to separate the insider from the outsider" (p. 6). As against both of them, Coser's own commitment is squarely to political pluralism. His concept of "greedy institution" is deliberately evaluative. There is no value-neutrality here on the part of a distinguished liberal member of the profession, who has been fighting the old and new extreme left for many years. There are echoes of this struggle in this collection of ten essays, half of which have been published previously and one of which goes back two decades to an attack on Leninist and Trotskyist sectarians in *Dissent* magazine.

Coser wants his work to be understood as "largely exploratory" (p. 17). A polished essayist in Simmel's tradition, he must not be expected to present a systematic contribution to organization theory. Instead, he enjoys

Union Women Mary Margaret Fonow, 2003 For more than a quarter century steel mills in the United States and Canada have produced more than metal they have produced a new kind of worker and union activist Women of Steel In an era labeled postfeminist and postindustrial women have created spaces in this quintessentially male dominated workforce from which to mobilize for their rights as women and workers In *Union Women* Mary Margaret Fonow captures the stories of the

women of the United Steelworkers She focuses on a tenacious group who used their developing power in the union to challenge sex discrimination and to advocate for women's rights and applied their transnational resources to construct a feminist response to globalization and economic restructuring In the process they have transformed the organizations resources and networks of both the labor and women's movements and have in turn transformed themselves into feminists In *Union Women* Fonow uses statistical archival and ethnographic research methods to provide a broad historical account of women in the steel industry Fonow's sweeping approach allows her to examine several key issues in social movement feminist and political theory and to show that insights from these fields shape each other She explores how social movements are gendered how working class women develop a feminist consciousness and how this process is informed by intersecting demands of race class and gender As a comparative cross national study *Union Women* also demonstrates how different political and social cultures affect women's organizing and strategic decisions Finally Fonow emphasizes that economic restructuring and globalization pose immediate challenges for women as laborers and activists and that in order to survive all unions must develop organizing and mobilization strategies informed by feminism and other social movements
