Sexual Selection And The Descent Of Man:

Sexual Selection and the Descent of Man Bernard Campbell, 2017-07-12 Just over one hundred and thirty years ago Charles Darwin in *The Descent of Man and Selection in Relation to Sex* 1871 developed remarkably accurate conclusions about man's ancestry based on a review of general comparative anatomy and psychology in which he regarded sexual selection as a necessary part of the evolutionary process But the attention of biologists turned to the more general concept of natural selection in which sexual selection plays a complex role that has been little understood This volume significantly broadens the scope of modern evolutionary biology by looking at this important and long neglected concept of great importance In this book which is the first full discussion of sexual selection since 1871 leading biologists bring modern genetic theory and behavior observation to bear on the subject The distinguished authors consider many aspects of sexual selection in many species including man within the context of contemporary evolutionary theory and research The result is a remarkably original and well rounded view of the whole concept that will be invaluable especially to students of evolution and human sexual behavior The lucid authority of the contributors and the importance of the topic will interest all who share in man's perennial fascination with his own history The book will be of central importance to a wide variety of professionals including biologists anthropologists and geneticists It will be an invaluable supplementary text for courses in vertebrate biology theory of evolution genetics and physical anthropology It is especially important with the emergence of alternative explanations of human development under the rubric of creationism and doctrines of intelligent design

Descent of Man and Selection in Relation to Sex Charles Darwin, 2004 Excerpt from *The Descent of Man and Selection in Relation to Sex* The nature of the following work will be best understood by a brief account of how it came to be written During many years I collected notes on the origin or descent of man without any intention of publishing on the subject but rather with the determination not to publish as I thought that I should thus only add to the prejudices against my views It seemed to me sufficient to indicate in the first edition of my *Origin of Species* that by this work light would be thrown on the origin of man and his history and this implies that man must be included with other organic beings in any general conclusion respecting his manner of appearance on this earth Now the case wears a wholly different aspect When a naturalist like Carl Vogt ventures to say in his address as President of the National Institution of Geneva *personne en Europe au moins n ose plus soutenir la creation ind pendante et de toutes pieces des esp es* it is manifest that at least a large number of naturalists must admit that species are the modified descendants of other species and this especially holds good with the younger and rising naturalists The greater number accept the agency of natural selection though some urge whether with justice the future must decide that I have greatly overrated its importance Of the older and honoured chiefs in natural science many unfortunately are still opposed to evolution in every form About the Publisher Forgotten Books publishes hundreds of thousands of rare and classic books Find more at www.forgottenbooks.com This book is a reproduction of an important historical work Forgotten Books

The Descent of Man Charles Darwin,2019-09-25 Reproduction of the original The Descent of Man by Charles Darwin *The Descent of Man, and Selection in Relation to Sex* Charles Darwin,2016-09-01 The Descent of Man and Selection in Relation to Sex is a book by Charles Darwin first published in 1871 which applies evolutionary theory to human evolution and details his theory of sexual selection a form of biological adaptation distinct from yet interconnected with natural selection The book discusses many related issues including evolutionary psychology evolutionary ethics differences between human races differences between sexes the dominant role of women in mate choice and the relevance of the evolutionary theory to society **The Descent of Man**, Charles Darwin,1888 *Sexual Selection and the Descent of Man* Bernard Grant Campbell,1972-01 This volume significantly broadens the scope of modern evolutionary biology by looking at the important and long neglected concept of natural selection in which sexual selection plays a complex role that has been little understood and is of great importance In this classic book which was the first full discussion of sexual selection since 1871 leading biologists bring modern genetic theory and behavior observation to bear on this subject The distinguished authors consider many aspects of sexual selection in many species including man within the context of contemporary evolutionary theory and research The Descent of Man and Selection in Relation to Sex Charles Darwin,2016-07-29 he Descent of Man and Selection in Relation to Sex is a book by English naturalist Charles Darwin first published in 1871 which applies evolutionary theory to human evolution and details his theory of sexual selection a form of biological adaptation distinct from yet interconnected with natural selection The book discusses many related issues including evolutionary psychology evolutionary ethics differences between human races differences between sexes the dominant role of women in mate choice and the relevance of the evolutionary theory to society

The Descent of Man Charles Darwin,2016-01-04 The Descent of Man Selection in Relation to Sex Charles Darwin The Descent of Man and Selection in Relation to Sex is a book by English naturalist Charles Darwin first published in 1871 which applies evolutionary theory to human evolution and details his theory of sexual selection a form of biological adaptation distinct from yet interconnected with natural selection The book discusses many related issues including evolutionary psychology evolutionary ethics differences between human races differences between sexes the dominant role of women in mate choice and the relevance of the evolutionary theory to society THE NATURE of the following work will be best understood by a brief account of how it came to be written During many years I collected notes on the origin or descent of man without any intention of publishing on the subject but rather with the determination not to publish as I thought that I should thus only add to the prejudices against my views It seemed to me sufficient to indicate in the first edition of my Origin

of Species that by this work light would be thrown on the origin of man and his history and this implies that man must be included with other organic beings in any general conclusion respecting his manner of appearance on this earth Now the case wears a wholly different aspect When a naturalist like Carl Vogt ventures to say in his address as President of the National Institution of Geneva 1869 *personne en Europe au moins n ose plus soutenir la creation independante et de toutes pieces des especes* it is manifest that at least a large number of naturalists must admit that species are the modified descendants of other species and this especially holds good with the younger and rising naturalists The greater number accept the agency of natural selection though some urge whether with justice the future must decide that I have greatly overrated its importance Of the older and honoured chiefs in natural science many unfortunately are still opposed to evolution in every form Includes Principles of Sexual Selection Secondary Sexual Characters in the Lower Classes of the Animal Kingdom Secondary Sexual Characters of Insects Insects Continued Order Lepidoptera Secondary Sexual Characters of Fishes Amphibians and Reptiles Secondary Sexual Characters of Birds Birds Continued Birds Continued Birds Concluded Secondary Sexual Characters of Mammals Secondary Sexual Characters of Mammals Continued Plus more **The Descent of Man and Selection in Relation to Sex** Charles Darwin,1871 [The Descent of Man, and Selection in Relation to Sex](#) Charles Darwin,2004-06 In the discussion on Sexual Selection in my Descent of Man no case interested and perplexed me so much as the brightly coloured hinder ends and adjoining parts of certain monkeys As these parts are more brightly coloured in one sex than the other and as they become more brilliant during the season of love I concluded that the colours had been gained as a sexual attraction **The Descent of Man and Selection in Relation to Sex** Charles CHARLES DARWIN,2021-08-22 The Descent of Man and Selection in Relation to Sex was originally published in 1871 and is a book written by evolutionary theorist Charles Darwin In it Darwin explores evolutionary theory and natural selection building upon his already well known ideas of evolution Specifically he delves into the relationship between sexual selection and society The book was generally well received at that time with a significant number of copies sold However Darwin s ideas were already well known and discussed in the scientific community by the time the book came out This resulted in a generally positive reception by the public and the scientific community but little surprise owing to the fact that there were no significantly new revelations [The Descent of Man; and Selection in Relation to Sex Volume 1](#) Charles Darwin,2013-09 This historic book may have numerous typos and missing text Purchasers can usually download a free scanned copy of the original book without typos from the publisher Not indexed Not illustrated 1888 edition Excerpt SUPPLEMENTAL NOTE os SEXUAL SELECTION IN EELATION TO MONKEYS Reprinted from Natube November 2 1876 p 18 In the discussion on Sexual Selection in my Descent of Man no case interested and perplexed me so much as the brightlycoloured hinder ends and adjoining parts of certain monkeys As these parts are more brightly coloured in one sex than the other and as they become more brilliant during the season of love I concluded that the colours had been gained as a sexual attraction I was well aware that I thus laid

myself open to ridicule though in fact it is not more surprising that a monkey should display his bright red hinder end than that a peacock should display his magnificent tail I had however at that time no evidence of monkeys exhibiting this part of their bodies during their courtship and such display in the case of birds affords the best evidence that the ornaments of the males are of service to them by attracting or exciting the females I have lately read an article by Joh von Fischer of Gotha published in Der Zoologische Garten April 1876 on the expression of monkeys under various emotions which is well worthy of study by any one interested in the subject and which shows that the author is a careful and acute observer In this article there is an account of the behaviour of a young male mandrill when he first beheld himself in a looking glass and it is added that after a time he turned round and presented his red hinder end to the glass Accordingly I wrote to Herr J von Fischer to ask what he supposed was the meaning of this strange action and he has sent me two long letters full of new and curious details which will I hope be hereafter published He says that he was himself at first perplexed

Darwin and the Making of Sexual Selection Evelleen Richards, 2017-04-27 Darwin's concept of natural selection has been exhaustively studied but his secondary

evolutionary principle of sexual selection remains largely unexplored and misunderstood Yet sexual selection was of great strategic importance to Darwin because it explained things that natural selection could not and offered a naturalistic as opposed to divine account of beauty and its perception Only now with Darwin and the Making of Sexual Selection do we have a comprehensive and meticulously researched account of Darwin's path to its formulation one that shows the man rather than the myth and examines both the social and intellectual roots of Darwin's theory Drawing on the minutiae of his unpublished notes annotations in his personal library and his extensive correspondence Evelleen Richards offers a richly detailed multilayered history Her fine grained analysis comprehends the extraordinarily wide range of Darwin's sources and disentangles the complexity of theory practice and analogy that went into the making of sexual selection Richards deftly explores the narrative strands of this history and vividly brings to life the chief characters involved A true milestone in the history of science Darwin and the Making of Sexual Selection illuminates the social and cultural contingencies of the shaping of an important if controversial biological concept that is back in play in current evolutionary theory [The Descent of Man, and Selection in Relation to Sex \(Classic Reprint\)](#) Charles Darwin, 2016-07-24 Excerpt from The Descent of Man and Selection in Relation to Sex The nature and value of specific characters Application to the races of man Arguments in favour of And opposed to ranking the so called races of man as distinct species Sub species Monogonists and polygonists convergence of character About the Publisher Forgotten Books publishes hundreds of thousands of rare and classic books Find more at www.forgottenbooks.com This book is a reproduction of an important historical work Forgotten Books uses state of the art technology to digitally reconstruct the work preserving the original format whilst repairing imperfections present in the aged copy In rare cases an imperfection in the original such as a blemish or missing page may be replicated in our edition We do however repair the vast majority of imperfections successfully any imperfections that remain are intentionally left to preserve the state of such historical works *The Descent of Man, and Selection in Relation to Sex Volume 1* Charles Darwin, 2013-09 This historic book may have numerous typos and missing text Purchasers can usually download a free scanned copy of the original book without typos from the publisher Not indexed Not illustrated 1872 edition Excerpt been important they would long ago have been either fixed and preserved or eliminated In this respect man resembles those forms called by naturalists protean or polymorphic which have remained extremely variable owing as it seems to their variations being of an indifferent nature and consequently to their having escaped the action of natural selection We have thus far been baffled in all our attempts to account for the differences between the races of man but there remains one important agency namely Sexual Selection which appears to have acted as powerfully on man as on many other animals I do not intend to assert that sexual selection will account for all the differences between the races An unexplained residuum is left about which we can in our ignorance only say that as individuals are continually born with for instance heads a little rounder or narrower and with noses a little longer or shorter such slight differences might become fixed and uniform if the unknown agencies which

induced them were to act in a more constant manner aided by long continued intercrossing Such modifications come under the provisional class alluded to in our fourth chapter which for the want of a better term have been called spontaneous variations Nor do I pretend that the effects of sexual selection can be indicated with scientific precision but it can be shown that it would be an inexplicable fact if man had not been modified by this agency which has acted so powerfully on innumerable animals both high and low in the scale It can further be shown that the differences between the races of man as in color hairiness form of features etc are of the nature which it might have been expected would have been acted on by
