Sexual Strategies How Females Choose Their Mates:

Sexual Strategies Mary Batten, 1992 Science acknowledges that much of human behavior is biological rather than cultural and human reproduction is much like the birds and the bees Here award winning science writer Mary Batten compares human and animal mating behavior and explains why men love to look at voluptuous young women and why women are attracted to wealthy powerful men Love, Romance, Sexual Interaction Nathaniel Pallone, 2018-01-16 This volume brings together in a single resource fourteen empirical studies examining a variety of emotions and behaviors covering many aspects of love romance and sexual interaction from recent issues of Current Psychology Scholars from universities and research centers bring under the empiricist's microscope a variety of emotions and behaviors ranging from dating relationships criteria for the ideal mate held by both men and women the relationship between perceptions of parents and partners in a direct test of psychoanalytic conceptualizations of mate selection how the media influence perceptions about love and romance sources of marital conflict gender differences in responses to infidelity and even the attitudes of consumers toward prostitution Contributors and topics of discussion include Albert Mehrabian and Jeffrey S Blum Physical Appearance Attractiveness and the Mediating Effect of Emotions Gordon L Flett Paul L Hewitt Brenley Shapiro and Jill Rayman Perfectionism Beliefs and Adjustment in Dating Relationships Robert Ervin Cramer Jeffrey T Schaefer and Suzanne Reid Identifying the Ideal Mate More Evidence for Male Female Convergence Glenn Geher Perceived and Actual Characteristics of Parents and Partners A Freudian Model of Mate Selection Claudia J Haferkamp Beliefs about Relationships in Relation to Television Viewing Soap Opera Viewing and Self Monitoring Blaine J Flowers and Brooks Applegate Marital Satisfaction and Conventionalization Examined Didactically Claudia J Haferkamp Dysfunctional Beliefs Self Monitoring and Marital Conflict Emily A Impett Kristin P Beals and Letitia A Peplau Testing the Investment Model of Relationship Commitment and Stability in a Longitudinal Study of Married Couples Richard Clements and Clifford H Swensen Commitment to One's Spouse as a Predictor of Marital Quality among Older Couples Robert Ervin Cramer William Todd Abraham Lesley M Johnson Barbara Manning Ryan Gender Differences in Subjective Distress to Emotional and Sexual Infidelity William Todd Abraham Robert Ervin Cramer Ana Maria Fernandez and Eileen Mahler Infidelity Race and Gender Ami Rokach Strategies of Coping with Loneliness throughout the Lifespan **Sexual Strategies** Mary Batten, 1992 Science acknowledges that much of human behavior is biological rather than cultural and human reproduction is much like the birds and the bees Here award winning science writer Mary Batten compares human and animal mating behavior and explains why men love to look at voluptuous young women and why women are attracted to wealthy powerful men **Mating Systems and Strategies** Stephen M. Shuster, Michael J. Wade, 2019-12-31 This book presents the first unified conceptual and statistical framework for understanding the evolution of reproductive strategies Using the concept of the opportunity for sexual selection the authors illustrate how and why sexual selection though restricted to one sex and opposed in the other is

one of the strongest and fastest of all evolutionary forces They offer a statistical framework for studying mating system evolution and apply it to patterns of alternative mating strategies In doing so they provide a method for quantifying how the strength of sexual selection is affected by the ecological and life history processes that influence females spatial and temporal clustering and reproductive schedules Directly challenging verbal evolutionary models that attempt to explain reproductive behavior without quantitative reference to evolutionary genetics this book establishes a more solid theoretical foundation for the field Among the weaknesses the authors find in the existing data is the apparent ubiquity of condition dependent mating tactics They identify factors likely to contribute to the evolution of alternative mating strategies which they argue are more common than generally believed and illustrate how to measure the strength of selection acting on them Lastly they offer predictions on the covariation of mating systems and strategies consider the underlying developmental biology behind male polyphenism and propose directions for future research Informed by genetics this is a comprehensive and rigorous new approach to explaining mating systems and strategies that will influence a wide swath of evolutionary biology

Strategies of Sex and Survival in Female Hamadryas Baboons Larissa Swedell, 2015-10-15 This book describes the first field study focusing on the behavior of hamadryas females in the wild In its attempt to rectify the male biased view of hamadryas baboon behavior that has persisted over the decades this book suggests that female behavior contributes more to hamadryas social organization than has previously been assumed and that females may in fact be acting in their own best interests after all For upper level undergraduate courses on primate behavior and ecology

Challenging Popular Myths of Sex, Gender and Biology Malin Ah-King, 2013-11-27 This edited volume challenges popular notions of sex gender and biology and features international trans disciplinary research The book begins with an exploration of supposedly natural sexual differences then looks at research in evolutionary biology and examines topics such as gender stereotypes in humans The first chapters explore important questions What are the fundamental sex differences How do genes and hormones influence an individual s sex Subsequent chapters concern topics including sex stereotypes in the field of sexual conflict how the focus on genes in evolutionary biology disregards other means of inheritance and the development of Darwin s theory of sex differences The last three chapters look at humans discussing an interdisciplinary approach to the evolution of sex differences in body height biological versus social constructive perspectives on the gendering of voices and nature culture arguments in the current political debate on paternity leave in Norway

Taking Sex Differences Seriously Steven E. Rhoads, 2010-05 Most discussions of sexuality today assume that differences between men and women are insubstantial and that the boundary between the masculine and the feminine is highly porous To reflect the idea that male and female roles have been socially constructed they speak of gender instead of sex and ridicule the double standard of studs and sluts Because men and women are virtually interchangeable it is argued men should do an equal share of domestic work so that women can compete equally with men outside the home This vision of androgyny has compelling aspects But Dr Steven Rhoads finds one problem whatever we might like to believe sex distinctions remain a deeply rooted part of human nature In *Taking Sex Differences Seriously* he assembles a wealth of scientific evidence showing that these differences are hardwired into our biology They range from the subtle women instinctively carry babies on their left side near the maternal heartbeat to the profound women with higher testosterone levels are more promiscuous more competitive and more conflicted about having children Rhoads explores male female disparities in aggression and dominance in sexuality and nurturing He shows how denial of these differences has affected phenomena such as the sexual revolution and fatherless families and policies such as Title IX and the call for universal day care But he also says that society is improved by discouraging some natural tendencies like men's temptation toward predatory sex and encouraging others like women's greater interest and talent in caring for babies Steven Rhoads dispels social clichés and spotlights biological realities in this provocative book Meticulously researched and elegantly written *Taking Sex Differences Seriously* is a groundbreaking look at the way we are

Sex, Time, and Power Leonard Shlain, 2004-08-03 As in the bestselling *The Alphabet Versus the Goddess* Leonard Shlain's provocative new book promises to change the way readers view themselves and where they came from *Sex Time and Power* offers a tantalizing answer to an age old question Why did big brained Homo sapiens suddenly emerge some 150 000 years ago The key according to Shlain is female sexuality Drawing on an awesome breadth of research he shows how long ago the narrowness of the newly bipedal human female's pelvis and the increasing size of infants heads precipitated a crisis for the species Natural selection allowed for the adaptation of the human female to this environmental stress by reconfiguring her hormonal cycles entraining them with the periodicity of the moon The results however did much more than ensure our existence they imbued women with the concept of time and gave them control over sex a power that males sought to reclaim And the possibility of achieving immortality through heirs drove men to construct patriarchal cultures that went on to dominate so much of human history From the nature of courtship to the evolution of language Shlain's brilliant and wide ranging exploration stimulates new thinking about very old matters

Sex Joann Ellison Rodgers, 2003-02-11 How much do you really know about sex In *Sex A Natural History* Joann Ellison Rodgers unearths both the roots of our sexual nature and the expression of our primal urges explaining what it is that makes us male and female and providing fascinating insights into the biology and physiology of flirtation love courtship intercourse fidelity parenting and nurturing She describes scientists discoveries about how the hormone that triggers labor contractions keeps prairie voles

faithful to one mate how the brain waves of female mice change when a male comes within smell range and how Harlequin paperback romances and fantasies can be arousing and what these findings tell us about our own sexuality Sex A Natural History illuminates one of the most powerful and often misunderstood aspects of human and animal existence Intimacies William R. Jankowiak, 2008-02-18 No culture is ever completely successful or satisfied with its synthesis of romantic love companionship and sexual desire Whether the setting is a busy metropolis or a quiet farming village a tension always exists between a community's sexual habits and customs and what it believes to be the proper context for love Even in Western societies we prefer sexual passion to romance and companionship and no study of any culture has shown that individuals regard passion and affection equally The pursuit of love and sex has generated an infinite number of ambiguities and contradictions yet every community hopes to find a resolution to this conflict either by joining dividing or stressing one act over the other In this follow up to Romantic Passion A Universal Experience William R Jankowiak examines how different cultures rationalize the expression of passionate and comfort love and physical sex He begins by mapping out the intricacies of the love sex conundrum and the psychological dilemma of reconciling these competing forces He then follows with essays on sex love and intimacy among Central African foragers and farmers the love dyad in Lithuania intimacy among the Lahu of Southwestern China the interplay of love sex and marriage in the High Himalayas verbalized experiences of love and sexuality in Indonesia love work as it relates to sex work among prostitutes intimacies and estrangements in the marital and extramarital relationships of Huli men infidelity and masculinity in Southwestern Nigeria and the ritual of sex and the rejuvenation of the love bond among married couples in the United States **The Bedtrick** Wendy Doniger, 2022-08-22 Somehow I woke up one day and found myself in bed with a stranger Meant literally or figuratively this statement describes one of the best known plots in world mythology and popular storytelling In a tour that runs from Shakespeare to Hollywood and from Abraham Lincoln to Casanova the erudite and irrepressible Wendy Doniger shows us the variety danger and allure of the bedtrick or what it means to wake up with a stranger The Bedtrick brings together hundreds of stories from all over the world from the earliest recorded Hindu and Hebrew texts to the latest item in the Weekly World News to show the hilariously convoluted sexual scrapes that people manage to get themselves into and out of Here you will find wives who accidentally commit adultery with their own husbands You will read Lincoln's truly terrible poem about a bedtrick You will learn that in Hong Kong the film The Crying Game was retitled Oh No My Girlfriend Has a Penis And that President Clinton was not the first man to be identified by an idiosyncratic organ At the bottom of these wonderful stories ancient myths and historical anecdotes lie the dynamics of sex and gender power and identity Why can't people tell the difference in the dark Can love always tell the difference between one lover and another And what kind of truth does sex tell Funny sexy and engaging The Bedtrick is a masterful work of energetic storytelling and dazzling scholarship Give it to your spouse and your lover *Reproductive Strategies in Insects* Omkar, Geetanjali Mishra, 2022-02-15 Reproduction is one of the most inherent

tasks that all living organisms are actively involved in It forms the backbone of their existence with all evolutionary energies directed over billion years of creation into maximizing reproductive effort For so simple and directed a need such as maximizing reproduction it is interesting to see how much diversity and complexity exists in this task Each organism despite having the same end goal employs different strategies The complexities intricacies and strategies of successful reproduction while being extremely fascinating are equally baffling Reproductive Strategies in Insects provides an expansive critical look at the reproductive strategies of the most diverse group of animals the insects Insects which inhabit myriad niches in all ecosystems except the oceans show the most diverse reproductive strategies ranging from simplest to most complex Reproductive strategies viz search for mates number of mates display of mate quality assessment of mate quality acceptance of mate rejection of mates forced copulations the fight for paternity pre during and post copula the modulation of paternity ovipositional strategies and parental care are described in detail in this book Also each strategy is analyzed in relation to its morphological physiological ethological ecological and evolutionary aspects Features Covers a wide variety of reproductive strategies A detailed step by step description of reproductive strategies Discusses morphological physiological ethological ecological and evolutionary aspects Modulation of these strategies and responsible modulatory factors are also discussed Well illustrated Recent research results and probable future research directions This is a niche reference book for ethologists biologists studying behavioural evolution and entomologists It may also be used as a textbook for a graduate level course in behaviour
