Sherman,2006-08-31 Adoption is a transformational process bringing parenthood to those who long for but cannot bear children and giving stranded children home family and their place in the world But every adoption is preceded and followed by its story and when these stories are told in the offices of psychotherapists we begin to understand the impact of adoption in all its complexity We learn from parents how their quest to have and raise a child has played out in real life and what shadows might have fallen between the dream and the reality And we learn from the children the many ways that being adopted shaped their development their sense of identity what went wrong along the way and how we may help Clinical work with parents and children as well as with adults who were adopted is the focus of Understanding Adoption Because adoption has become widely practiced accepted and accessible and because it has greatly changed the composition of families it is a timely subject for study The authors of this book undertake exploration of this important terrain of loss and connection and of the fragility and resilience of human bonds      *Handbook of Affirmative Psychotherapy with Lesbians and Gay Men* Kathleen Ritter,Anthony I. the Taking a Hard Look Gender and Visual Culture international conference 20 21 June 2007 Institute for Gender and Women's Studies University of Pretoria South Africa are collected here in the hope to make a purposeful contribution to the burgeoning discourse However by addressing the creative intersection between gender and visual culture this edited volume is no novelty In fact the topic of gender and visual culture has been addressed over the past decade in several edited volumes It is in this proud tradition that this book aims to take its place and to create a dialogue with international theory on gender and visual culture studies from a South perspective Key questions that are explored in the volume What type of gendered visual culture is being presented and created in the South particularly but not exclusively How is visual culture gendered Can one refer to a move beyond gender in terms of a trans gendered visual culture or are we still caught up in the same debilitating role models How does one address the ever increasing alienation between gender studies and the younger generation of students and scholars moving into higher education What is the role of gender as interdisciplinary tool in the academic analysis of visual culture as it spans across several subjects such as science social work technology psychology medicine philosophy sociology engineering communication economics religious studies business management anthropology geography historical studies cultural and media studies visual studies art history and literature studies
