

Health Promotion With Latino Communities

Latino Community Health Workers and the Promotion of Sexual and Reproductive Health

Julia Lechuga, PhD¹
Dina Garcia, MPH²
Jill Owczarzak, PhD³
Maria Barker⁴
Meghan Benson, MS⁴

Community health worker (CHW) programs have existed for over 50 years across the world. However, only recently has research evidence documented their effectiveness. Research is still needed to identify issues related to implementation and sustainability of CHW programs. This article explores the role and challenges of U.S. Latino CHWs trained to deliver a comprehensive sexual and reproductive health educational intervention to Latino families. We conducted a semistructured interview with a purposive convenience sample of 19 CHWs. Findings suggest that CHWs occupy roles that go beyond those they were trained for. CHWs serve not only as educators but also as providers of social support, facilitators of access to resources, patient navigators, and civil rights advocates. Lack of clarity of the role of a CHW influenced perceptions of adequacy of compensation, training, and integration into the agency that trained them. Policy facilitating the standardization of the CHW occupational category and role expectations is imperative to ensure successful implementation and sustainability of U.S. CHW programs.

Keywords: community health workers; *promotores de salud*; sexual and reproductive health; Latinos

Latinos comprise 16.3% of the total U.S. population, and it is expected that by 2050 the Latino population will reach 132.6 million people

(Pew Hispanic Research Center, 2011; Centers for Disease Control and Prevention [CDC], 2012). Unfortunately, Latinos in the United States face considerable health disparities in multiple domains, particularly in sexual and reproductive health. For example, the rate of HIV infections among Latinos since 2006 is 2.5 times that of non-Hispanic Whites (CDC, 2009). In addition, Latinas are 2 times more likely to be diagnosed with other sexually transmitted infections such as chlamydia (CDC, 2009) and cervical cancer than non-Hispanic White women (American Cancer Society, 2009). Latinas are less likely to get screened for cervical cancer and receive follow-up treatment once cervical abnormalities are detected (American Cancer Society, 2009). Research also indicates that ethnic disparities exist in other sexual and reproductive health domains such as unintended pregnancies and incorrect use of contraceptives. Specifically, approximately 70% of Latinas aged 15 to 44 years surveyed in the 2006-2010 National Survey of Family Growth reported ever being pregnant and that 51% of such pregnancies were unintended. Participants also reported that half of these unintended pregnancies followed after incidents of

Sexual And Reproductive Health Promotion In Latino Populations

Michael Rajnik

Sexual And Reproductive Health Promotion In Latino Populations:

Parteras, Promotoras Y Poetas M. Idali Torres, George Peter Cernada, 2003 Bringing together a multidisciplinary multicultural collection of case studies this work focuses on sexual and reproductive health education problems and programs from across the Americas It links the experience of US Latino populations with public health culture and community in Latin American countries

Counseling and Family Therapy with Latino Populations Robert L. Smith, R. Esteban Montilla, 2013-02-01 For the Latino population the family bond is powerful and enduring Family serves as the primary source of support care guidance and healing all difficulties that arise for an individual are surmounted together Therefore a practitioner working with a Latino client must gain the trust and respect of the family in order to carry out treatment efficiently He or she must essentially become a part of that family to encourage members to share their issues without the concern of breaching the confidence of the family Counseling and Family Therapy with Latino Populations helps the therapist to join the Latino family in order to identify and explore the difficulties that threaten their welfare With this fundamental principle as the basis the book's editors and contributors write chapters that focus on work with children and adolescents group counseling and substance abuse counseling They incorporate specific case studies methods and strategies for intervention and provide insight into the cultural relevance behind each example This book is a necessary resource for therapists working with Latino clients who wish to offer effective techniques while continuing to value the integrity of family tradition

Youth-led Health Promotion in Urban Communities Melvin Delgado, Huiquan Zhou, 2008 The introduction of innovative social paradigms that stress community participation community focused empowerment assets social and economic justice themes and in the case of youth civic participation represents one of the outcomes of this questioning and bodes well for current and future generations The subject of how best to address the current and future health needs of this country's urban marginalized communities is one that has also received considerable attention in academic policy and practice arenas in the past decade A variety of models have been put forth to achieve the goal of health in these communities One of the most promising recommendations has been the use of health promotion as a vehicle for reaching and empowering communities of color in both rural and urban America The youth led environmental justice movement as it will be addressed in various sections of this book is one of the latest and most promising approaches towards health promotion that is grass roots and community participatory based Youth led health promotion represents an emerging field with tremendous implications for addressing the health needs of marginalized urban youth of color in the United States

Latina/o Sexualities Marysol Asencio, 2010 Latinas/os are currently the largest minority population in the United States They are also one of the fastest growing Yet we have very limited research and understanding of their sexualities Instead stereotypical images flourish even though scholars have challenged the validity and narrowness of these images and the lack of attention to the larger social context Gathering the latest empirical work in the social and behavioral sciences this reader offers us a

critical lens through which to understand these images and the social context framing Latina/os and their sexualities. Situated at the juncture of Latina/o studies and sexualities studies, *Latina/o Sexualities* provides a single resource that addresses the current state of knowledge from a multidisciplinary perspective. Contributors synthesize and critique the literature and carve a separate space where issues of Latina/o sexualities can be explored given the limitations of prevalent research models. This work compels the current wave in sexuality studies to be more inclusive of ethnic minorities and sets an agenda that policy makers and researchers will find invaluable.

Latina/o American Health and Mental Health Leticia Arellano-Morales Ph.D., Erica T. Sosa, 2018-02-16 Essential reading for health and mental health administrators, community agencies and policy makers as well as students and general interest readers, this book details the state of the physical and mental health of many Latina/o American groups. While Latina/o Americans originate from more than 25 countries, most health or mental health texts largely focus on Mexican Americans and often fail to address other Latina/o groups such as South Americans, Central Americans, Puerto Ricans and others. Moreover, most works address either health or mental health but not both together. In contrast, *Latina/o American Health and Mental Health* addresses both the health and mental health of diverse Latina/o heritage groups. An interdisciplinary approach enables readers to identify both similar and divergent areas that affect the health and mental health of Latina/o Americans. Strengths-based and social justice perspectives rather than a deficit perspective guide the work in its assessment of disparities among treatment for different groups. This text is ideal for graduate students, practitioners, researchers and policy makers in public health, community health, family studies, psychology, counseling, social work and Latina/o studies who are interested in understanding Latina/o health and mental health in the United States and providing culturally responsive services.

Critical Concepts in Queer Studies and Education Nelson M. Rodriguez, Wayne J. Martino, Jennifer C. Ingrey, Edward Brockenbrough, 2016-08-30 This book advances a broad constellation of critical concepts situated within the field of queer studies and education. Collectively, the concepts take up a cross section of scholarship that speaks to various political, epistemological, theoretical, methodological and pedagogical concerns. Given the ongoing global centrality of sociocultural and political developments related to the topic of LGBTQ in the twenty-first century, the concepts in this volume and the issues raised by each contributor will have wide international appeal among researchers, scholars, educators, students and activists working at the intersection of queer studies and education.

Latina Girls Jill Denner, Bianca Lucrecia Guzmán, 2006-06 The existing research has focused on stereotypical perceptions of Latinas as frequently dropping out of school, becoming teen mothers or being involved with boyfriends in gangs. *Latina Girls* brings together cutting-edge research that challenges these stereotypes.

Fixing Men Matthew C. Gutmann, 2007-11-06 Most studies on reproductive rights make women their focus, but in *Fixing Men*, Matthew Gutmann illuminates what men in the Mexican state of Oaxaca say and do about contraception, sex and AIDS. Based on extensive fieldwork, this breakthrough study by a preeminent anthropologist of men and masculinities reveals how these men and the women in their lives make decisions

about birth control how they cope with the plague of AIDS and the contradictory healing techniques biomedical and indigenous medical practitioners employ for infertility impotence and infidelity Gutmann talks with men during and after their vasectomies and discovers why some opt for sterilization while so many others feel planned out of family planning

Self-Regulation in Health Behavior Denise de Ridder, John de Wit, 2006-06-14 This text offers a comprehensive overview of new approaches to health related behaviour from a self regulation perspective The authors outline the assumptions on which self regulation theories are based discuss recent research and draw out the implications for practice with a particular focus on changing health behaviour The book is arranged in two sections Goal Setting and Goal Activation in Health Behaviour and Goal Striving and Goal Persistence The epilogue compares self regulation theories with the prevailing social cognitive models *Communications Research in Action* Philip M. Napoli, Minna Aslama, 2011 This volume is an important contribution to academic and activist knowledge It is ambitious in the range of issues areas it covers challenging in the depth and breadth of analysis of the individual chapters All in all this is a treasure trove of new insights experiences and innovative approaches to politically committed and scholarly work that aim to make a difference Marianne Franklin Goldsmiths University of London **Hispanic Journal of Behavioral Sciences**, 2008 Health Promotion Throughout the Life Span Carole Lium Edelman, Carol Lynn Mandle, Elizabeth C. Kudzma, 2013-01-01 Up to date and easy to read this textbook provides comprehensive coverage of all major concepts of health promotion and disease prevention It highlights growth and development throughout the life span emphasizing normal development as well as the specific problems and health promotion issues common to each stage All population groups are addressed with separate chapters for individuals families and communities Provided by publisher **The Oxford Handbook of Acculturation and Health** Seth J. Schwartz, Jennifer Unger, 2017-08-10 The Oxford Handbook of Acculturation and Health expertly brings together two very distinct but complementary streams of work and thought theoretical and methodological work on acculturation and the applied work linking acculturation to various health outcomes among international migrants and their families In this important volume the work of landmark acculturation theorists and methodologists come together to showcase applied epidemiologic and intervention work on the issues facing acculturation and public health today Edited by Seth J Schwartz and Jennifer B Unger this Handbook is divided into two important parts for readers Part one features chapters that are dedicated to theoretical and methodological work on acculturation including definitional issues measurement issues and procedures for studying acculturation across immigrant groups and national contexts The second part focuses on the links between acculturation and various health outcomes such as obesity physical activity drug and alcohol abuse mental health delinquency and suicide Notably because a majority of the research on acculturation and health has been conducted on Hispanic immigration this volume contextualizes that research and offers readers compelling insight for how to apply these principles to other immigrant groups in the United States and around the world *Doing Focus Groups* Rosaline

Barbour,2008-03-05 Focus groups are an ever popular method for collecting qualitative data in the social sciences Doing Focus Groups provides practical advice on planning and organizing successful groups Rose Barbour discusses the advantages and limitations of using group discussion and demonstrates effective methods for collecting and analysing data

Caribbean Pleasure Industry Mark Padilla,2008-11-15 In recent years the economy of the Caribbean has become almost completely dependent on international tourism And today one of the chief ways that foreign visitors there seek pleasure is through prostitution While much has been written on the female sex workers who service these tourists Caribbean Pleasure Industry shifts the focus onto the men Drawing on his groundbreaking ethnographic research in the Dominican Republic Mark Padilla discovers a complex world where the global political and economic impact of tourism has led to shifting sexual identities growing economic pressures and new challenges for HIV prevention In fluid prose Padilla analyzes men who have sex with male tourists yet identify themselves as normal heterosexual men and struggle to maintain this status within their relationships with wives and girlfriends Padilla s exceptional ability to describe the experiences of these men will interest anthropologists but his examination of bisexuality and tourism as much neglected factors in the HIV AIDS epidemic makes this book essential to anyone concerned with health and sexuality in the Caribbean or beyond **Advancing the Science of**

Cancer in Latinos Amelie G. Ramirez,Edward J. Trapido,2019-11-21 This open access book gives an overview of the sessions panel discussions and outcomes of the Advancing the Science of Cancer in Latinos conference held in February 2018 in San Antonio Texas USA and hosted by the Mays Cancer Center and the Institute for Health Promotion Research at UT Health San Antonio Latinos the largest youngest and fastest growing minority group in the United States are expected to face a 142% rise in cancer cases in coming years Although there has been substantial advancement in cancer prevention screening diagnosis and treatment over the past few decades addressing Latino cancer health disparities has not nearly kept pace with progress The diverse and dynamic group of speakers and panelists brought together at the Advancing the Science of Cancer in Latinos conference provided in depth insights as well as progress and actionable goals for Latino focused basic science research clinical best practices community interventions and what can be done by way of prevention screening diagnosis and treatment of cancer in Latinos These insights have been translated into the chapters included in this compendium the chapters summarize the presentations and include current knowledge in the specific topic areas identified gaps and top priority areas for future cancer research in Latinos Topics included among the chapters Colorectal cancer disparities in Latinos Genes vs Environment Breast cancer risk and mortality in women of Latin American origin Differential cancer risk in Latinos The role of diet Overcoming barriers for Latinos on cancer clinical trials Es tiempo Engaging Latinas in cervical cancer research Emerging policies in U S health care Advancing the Science of Cancer in Latinos proves to be an indispensable resource offering key insights into actionable targets for basic science research suggestions for clinical best practices and community interventions and novel strategies and advocacy opportunities to reduce health disparities in Latino

communities It will find an engaged audience among researchers academics physicians and other healthcare professionals patient advocates students and others with an interest in the broad field of Latino cancer *Promoting Health Equity During a Pandemic: Approaches to Address Vaccination Burden and Health Inequities Amongst Under-Served Populations in U.S. and Mexico* Cecilia B. Rosales, Maria Gudelia Rangel Gomez, Michael A. Flynn, 2023-07-31 Promoting Reproductive Health Shepard Forman, Romita Ghosh, 2000 The resulting case studies help also to answer broader questions regarding assistance for health and sustainable development from the perspective of both developing and donor countries BOOK JACKET *New Books on Women and Feminism* , 2004 **HIV Prevention With Latinos** Kurt C. Organista, 2012-06-28 This text written by leading authorities on theory research and practice in preventing HIV with diverse Latino populations and communities responds to the diminishing returns of the behavioural model of HIV risk by deconstructing the many social ecological contexts of risk within the Latino experience

This is likewise one of the factors by obtaining the soft documents of this **Sexual And Reproductive Health Promotion In Latino Populations** by online.
