*Innovation and Growth* Martin Andersson, Börje Johansson, Charlie Karlsson, Hans Lööf, 2012-09-20. This volume provides an understanding of firms' R D and innovation strategies and their economy wide consequences. It is based on the premise that differences in firm level returns as well as economy wide outcomes may be linked to the heterogeneous ways in which firms organize and undertake R D and innovation activities. It emphasizes innovation strategies of innovating firms and reflects that innovation efforts do not represent a uniform type of expenditure. Organized into three parts, the volume moves from the micro to the macro level. This structure highlights the notion that R D and innovation and growth are two interdependent perspectives. The first of these is micro oriented and focuses on innovation processes of firms where R D activities and other innovation efforts give rise to consequences such as a strengthening of resource bases, growth of sales and employment, patents, new products, increasing productivity and profits and improved chances of survival. The second perspective comprises economy wide effects in the form of overall technological change, growth in total factor productivity and structural change processes where certain sectors may benefit from new inputs from other sectors while others experience declining markets and reduced output. The book brings together contributions and perspectives from both economics and business scholars and will appeal to academics, researchers and students interested in R D and innovation strategies, international business, business strategy and the economics of technological change.

**Uncertainty and Enterprise** Amar Bhidé, 2025-01-19. Uncertainty, doubt about what is or could be, fuels our ambitions and fears. Tantalizing possibilities spur us to innovate and explore. Yet we also strive to reduce uncertainty. Mountain climbers and deep sea divers plan carefully. Rules, routines and research in business, the law and medicine are designed to increase predictability and forestall unpleasant surprises. Mainstream economics, however, hides from uncertainty, banishing it to the mystical world of unknown unknowns or reducing it to mechanistic calculation. Its textbooks ignore everyday problems that lack demonstrably correct solutions. But resolute responses to such problems require confidence. Where does confidence come from, especially when we go beyond the known? How do we justify our fallible judgments to ourselves and others? Drawing on more than thirty years of teaching and research, Amar Bhidé offers compelling answers. Inspired by while modernizing the forgotten ideas of the economist Frank Knight and other great twentieth century thinkers, Bhidé challenges both hyper rational economic orthodoxy and claims of pervasive behavioral biases. He shows that while big bets require more justification, the facts alone don't persuade skeptics. Instead, narratives that combine reason, contextual

evidence and creative interpretations align our imaginations Bhid s framework and rich examples explain neglected and surprising features of entrepreneurship He shows how startups and giant corporations coexist how seemingly bureaucratic procedures encourage the giants to undertake complex high stakes initiatives and how vividly described possibilities help make the imagined real Cutting through esoteric theories but avoiding glib prescriptions Uncertainty and Enterprise examines the foundations of bold yet reasonable action

**The Capacity to Innovate** Sarah Giest,2021-04-07 In The Capacity to Innovate Sarah Giest provides insight into the collaborative and absorptive capacities needed to provide public support to local innovation through cluster organizations The book offers a detailed view of the vertical multi level and horizontal dynamics in clusters and cluster policy and addresses how they are managed and supported Using the biotechnology field as an example Giest highlights challenges in the collaborative efforts of public bodies private companies and research institutes

to establish a successful ecosystem of innovation in this sector The book argues that cluster policy in collaboration with cluster organizations should focus on absorptive and collaborative capacity elements missing in the cluster context in order to improve performance Currently governments operate at different levels from the local to the supranational in order to support clusters and cluster policies are often pursued alongside other programs leading to uncoordinated efforts and ineffective cluster strategies The Capacity to Innovate advocates for a coordinated effort by government and cluster organizations to support capacity elements lacking within the specific cluster context      **Incentivising Angels** Stephen
