In their book titled: *Money, Banking, and Financial Markets*, authors Stephen G. Cecchetti (an economic advisor and the chairman of the Monetary and Economic Department at the Bank for International Settlements), and Kermit L. Schoenholtz (a professor of New York University, the Economic Department of the Leonard N. The first part of the book is titled *Money and the Financial System* (pp. 43-110) and consists of the three chapters (Chapters 1, 2 and 3). Within this chapter, the authors also point out the five important principles of money and banking which run through as the basis from the beginning to the end of the book; these are: time has a value, a risk requires compensation, information is key when making a decision, a market determines prices and the allocation of resources and a stable improvement of welfare. The second chapter analyzes money, both in theory and in practice. In order to understand the essence of the function of money in a national economy, a shorter analysis has been
