Shades Of Green The Clash Of Agricultural Science And Environmental Science:

Shades of Green Jerry S. Kidd, Renee A. Kidd, 1998 Looks at advances in agriculture productivity and its related pesticide use and introduces individuals who have aided in these advances and those opposed to chemical use

Agricultural Versus Environmental Science Jerry S. Kidd, Renee A. Kidd, 2006 Looks at issues surrounding agriculture and the environment *People of Bread* Wolfgang Vondey, 2008 Wolfgang Vondey contends that the story of the church is a story of the people of bread The image of bread is one of the richest and at the same time one of the most neglected biblical images that speak to an ecumenical understanding of the church Drawing from scripture from writers of the early church and from cutting edge debates in contemporary scholarship Vondey unfolds the social moral missiological ecumenical and eschatological dimensions of the church based on the story of bread that far exceeds a eucharistic interpretation *People of Bread* speaks to a growing interest in an understanding of the church by addressing the widespread revival of the theological imagination BOOK JACKET School Library Journal, 2006 **Bibliography of Agriculture**, 1998 Children's Books in Print R R Bowker Publishing, Bowker, 1999-12 American Book Publishing Record, 1997-09 El-Hi Textbooks & Serials in Print, 2000, 2000 **Forthcoming Books** Rose Arny, 1997-12 **The Biofuels Deception** Okbazghi

Yohannes, 2018-09-25 Traces the pitfalls of a biotech funded green energy of an economy and its consequences for our planet's future There is by now no question among informed people that the Earth is undergoing severe climate change soon to become catastrophic if humans don't take drastic measures to stop it Heroically into the fray steps the biofuel industry announcing to millions of anxious consumers that this eco crisis can be averted if only they turn away from fossil fuels to the saving power of synthetic bioproducts But although eliminating fossil fuels is essential the manufacture of biofuels has far more to do with sating profit hungry corporations than with saving the Earth Combining meticulous scientific narrative with devastating economic analysis *The Biofuels Deception* argues that the seemingly innovative hopeful campaign for green energy is actually driven by bio technology industries and global grain trading corporations These corporate players are motivated by a late capitalist need to cope with a crisis of accumulation they have no real interest in mitigating climate change alleviating poverty or even creating clean energy In fact the manufacture of biochemical bioplastics and biomaterials writes Okbazghi Yohannes portends horrific contradictions and disastrous consequences for nature and society Actually confronting climate change and the rampant inequality it engenders Yohannes says requires two steps The first is to understand the driving socioeconomic forces behind the biofuels industry The second is to unravel the tapestry of deceit itself This book is a necessity for any scholar or environmental activist interested in seeing beyond corporate chimeras to actual environmental solutions Science Left Behind Alex Berezhov, Hank Campbell, 2012-09-12 To listen to most pundits and political writers evolution stem cells and climate change are the only scientific issues worth mentioning and the only people who are anti science are conservatives Yet those on the left have numerous fallacies of their own Aversion to clean

energy programs basic biological research and even life saving vaccines come naturally to many progressives These are positions supported by little more than junk science and paranoid thinking Now for the first time science writers Dr Alex B Berezow and Hank Campbell have drawn open the curtain on the left's fear of science As *Science Left Behind* reveals vague inclinations about the wholesomeness of all things natural the unhealthiness of the unnatural and many other seductive fallacies have led to an epidemic of misinformation The results public health crises damaging and misguided policies and worst of all a new culture war over basic scientific facts in which the left is just as culpable as the right **New Scientist and Science Journal** ,1991-08 The Washington Post Index ,2008 Bowker's Complete Video Directory ,1998

Daily Graphic Yaw Boadu-Ayeboafah,2005-10-18 **NGO Discourses in the Debate on Genetically Modified Crops** Ksenia Gerasimova,2017-07-20 The development and use of genetically modified organisms GMOs has been a contentious topic for the last three decades While there have been a number of social science analyses of the issues this is the first book to assess the role of Non Governmental Organizations NGOs in the debate at such a wide geographic scale The various positions for and against GMOs particularly with regard to transgenic crops articulated by NGOs in the debate are dissected classified and juxtaposed to corresponding campaigns These are discussed in the context of key conceptual paradigms including nature fundamentalism and the organic movement post colonialism food sovereignty anti globalisation sustainability and feminism The book also analyses how NGOs interpret the debate and the persuasive communication tactics they use This provides greater understanding of the complexity of negotiations in the debate and explains its specific features such as its global scope and difficulty in finding compromises The author assesses the long term interests of various participants and changes in perceptions of science and in public communication as a result Examples of major NGOs such as Greenpeace Oxfam and WWF are included but the author also provides new research into the role of NGOs in Russia
