Math Mystic's Guide to Creative Spirituality Sarah Voss, 2024-04-04 The Math Mystic's Guide to Creative Spirituality is unique provocative engaging and a masterpiece of philosophical and mystical exploration It offers gourmet treats for those with spiritual hunger a feast of innovative perspectives on building social collateral trust forgiveness resilience and intellectual desserts for the mathematically inclined User friendly for the non mathematician the book also provides a smorgasbord of resources for those who want to know more about the math Deeply personal but also scholarly with an unprecedented use of mathematical metaphors this book will appeal to mathematicians scientists teachers philosophers religious educators and spiritual seekers of many persuasions A math professor before becoming a Unitarian Universalist minister the author has compiled herein a lifetime of creative study about the relationship between math and religion She has pioneered ways to use mathematics to help clarify such spiritual ideas as God fairness equality redemption and the nature of things In the process she coined the terms matheology and mathaphor introduced the notion of math sermons and has expanded the concept of moral math This exciting collection of essays with a little poetry as garnish uses math as a language to nourish the spiritual heart of our global society *Shades of Reality* Bob Bishop, Robert J. Bishop, 1998 Bob Bishop explores the concepts of reality both as perceived and scientific and demonstrates how different paradigms affect our perceptions The author shows how preconceived notions grounded in logical paradigms can affect not only scientific and mechanical invention but difficult societal issues as well The our current judicial system voting age and abortion are just a few of our ideas that are based more on Aristotelian concepts rather than the principles of fuzzy logic that are argued by Bishop so persuasively *Forthcoming Books* Rose Arny, 1998-04 [The Big Questions](#) Lou Marinoff, 2009-09-07 Professor Lou Marinoff's first book drew on the wisdom of the great philosophers to solve our everyday problems launching a movement that restored philosophy to what it once was useful in all walks of life Now in *The Big Questions* he takes the concept to the next level applying centuries of philosophy and great literature to answer central questions of modern existence Urging us not to accept victimhood as the by product of modern life Professor Marinoff uses specific case studies from his counseling practice to show how wisdom from the great thinkers can help us define our own philosophy and thereby reclaim our sense of well being He asks and answers questions that go to the heart of the human condition How do we know what is right How can we cope with change Why can't we all get along And most centrally how can we use the centuries of wisdom that have come before us to help us answer these questions and feel at ease in the world Accessible entertaining and profoundly useful *The Big Questions* mixes wisdom from the great thinkers with specific case studies to illuminate how a shift in perspective can truly be life changing Lou Marinoff is the author of the international hit *Plato Not Prozac* which has been published in twenty languages A professor of philosophy at the City College of New York Marinoff is also the founding president of the American Philosophical Practitioners Association Praise for *Plato Not Prozac* What exactly is philosophical

practice Marinoff calls it therapy for the sane In a nutshell it s using the 2 500 year old tradition of philosophy to solve everyday problems like work relationship and family issues It s a return to what philosophy was meant to be a guideline for a way of life Salon Com Plato Not Prozac looks to become the bible of the philosophical counseling movement Philadelphia Inquirer Magazine The ancient think **Subject Guide to Books in Print** ,1991 **Radical Philosophy** ,1986

Elpel,2010-11-24 What if our entire experience of reality were based on an assumption that could be proven false In Roadmap to Reality Thomas J Elpel tests the assumption that we are a sentient self aware species and finds evidence suggesting otherwise Like automatons we copy beliefs and behaviors from generation to generation without consciously evaluating why we do what we do We absorb a definition of reality and act on it without ever questioning the source of that definition In short we don t act we react Roadmap to Reality is the quest to unravel the illusions to discover what reality really is The journey follows the link between technology and thought showing how hunter gatherer agricultural industrial and informational societies define reality in predictable ways In essence production technology dictates how we perceive cause and effect how we solve problems and how we approach parenting and governing Roadmap to Reality sequentially follows simple ideas and commonsense logic to reveal how consciousness and worldviews evolve in layers over time Roadmap to Reality enables the reader to step outside of ordinary reality to obtain a fresh perspective on culture government prosperity sustainability and meaning The quest takes the reader to the ends of the universe with a casual writing style peeling back the layers of consciousness to discover the reality beyond Roadmap to Reality will change your perspective of history and world events and it will change you enabling you to let go of preconceived notions about the nature of reality to discover a more holistic more satisfying life experience

Spirit Calls Nature Marco Masi,2021-01-18 A scientific philosophical and spiritual overview in three volumes of the relationship between science and spirituality neuroscience and the mystery of consciousness mind and the nature of reality evolution and the purpose and meaning of life and the universe A plaidoyer for a science that goes beyond the curve of

reason and embraces a new synthesis of knowledge The overcoming of the limitations of the intellect into an extended vision of ourselves and Nature A critique of physicalism the still dominant doctrine that believes that all reality can be reduced to matter and the laws of physics alone A review and reassessment of the old and new philosophical and metaphysical ideas which attempts to bring closer Western and Eastern traditions where science philosophy consciousness Spirit and Nature are united in a grand vision that goes beyond the limited conventional scientific and philosophical paradigm An answer to the questions of purpose and meaning and the future evolution of humankind beyond a conception that posits a priori a purposeless and meaningless universe A report of the new scientific discoveries and at the same time an essay on ancient as modern philosophical conceptions from the One of Plotinus the God of Spinoza until the recent revival of panpsychism or the universal consciousness A new look from the perspective of philosophical idealism into the weird world of quantum physics and an invitation to look beyond and towards new ways of seeing that might help us to transcend our present narrow understanding expanding it into an integral evolutionary cosmology Not just a philosophical and metaphysical meditation but rather an appeal to work towards a change of consciousness a widening of our perspective towards a new way of seeing beyond a purely mechanistic worldview to avoid a social environmental and economic collapse Humans are transitional beings that will have to make a choice relapse into a pre rational state or evolve towards a new species supported by an ideal of human unity in diversity as the expression of a spiritual evolutionary process the call of the Spirit on Nature Volume I will address the following questions Is consciousness reducible What is the difference between mind and consciousness if any What is the hard problem of consciousness What is the difference between the subconscious subliminal and unconscious Do we have free will Is mind computational Do plants and even unicellular organism have some basal cognition These and other questions will be discussed from the standpoint of the new findings of neurosciences consciousness studies and the philosophy of mind An analysis which will clarify the limits of reason and materialism its logical fallacies and false premises and the dead end of modern neurocentrism This will set the basis allowing us to consider in the next volumes of this series consciousness science and spirituality from the perspective of the past and modern Western philosophy first and then indicate us a new way of seeing the world which could potentially lead us to a new science A synthesis of knowledge will be achieved in the last volume where we will include the Eastern wisdom in form of a spiritual emergentism with a special emphasis on the evolutionary cosmology of the Indian seer Sri Aurobindo **Warning!** P. A. Ransom, 2019-01-10 Warning Reality May Not Be Compatible with Your Worldview explains how the most significant event in human history was the awakening of intellectual consciousness and the ability to make informed decisions based on careful observation logic and critical reasoning Author P A Ransom explores the evolution of the brain what reality is and how we search for it in our complex world He addresses the question of our assumptions about truth and faith and how when faith is added to the equation it can destroy the credibility of anything it wishes We all live in a world that is constructed in the mind Our senses tell

us that the world is real We just accept as fact that what our senses reveal to us is not an illusion Yet even our senses can be tricked if you have experienced an illusion like a magic trick or special effects you know how easily the brain can be deceived What we think we know is sometimes far from the truth No matter how well considered our knowledge is it is always subject to change as our understandings evolve It would be prudent then to reexamine our beliefs Warning Reality May Not Be Compatible with Your Worldview exposes the truth about dogma and rituals that lead our minds into delusional beliefs When we embrace ignorance we turn our backs on truth and close our minds to new ideas and discoveries **Break the**

Simulation Matthew Holland,2019-06-14 I started writing Break the Simulation in April 2019 I was in a refreshed state of mind and in a sudden and unexpected urge to share existential philosophical and epistemological concepts as well as educate on deep metaphysical mentality and its connection to our lives and why it should be important to you no matter who you are and where you are in your life Whether you are 14 years old and just starting your journey or are 95 years old and still feel like you have so much more to give I am fascinated by our subjective perception of reality that we are all stuck in a very singular point of view a singular perspective on what we all agree to be an objective reality and reading is one of the ways in which we have to see the same things from the same point of view and it is up to our own interpretation to carry that To be is to be perceived and to be perceived is all we have to experience our entire existence *Unraveling Reality* Ishi

Nobu,2017-09-27 Unraveling Reality Behind the Veil of Existence Through colorful illustrative stories that come from digging down to the roots of physics and biology Unraveling Reality exposes the very nature of existence Dissecting actuality Unraveling Reality presents how the world really works and why It is a worldview consistent with the wisdom of enlightened sages from time immemorial yet brazenly bolstered by modern science with discoveries considered inscrutable The conclusion of Unraveling Reality will astonish you and may change your own world for you can never unlearn the truth Unraveling Reality is the opening salvo in the magnum opus Spokes of the Wheel A comprehensive education for the inquisitive adult the Spokes series covers the following disciplines cosmogony and cosmology Earth science including geology and ecology physics chemistry biology including abiogenesis genetics life s history and evolution human physiology diet nutrition and health psychology and sociology including history of technology economics including history and theory the human impact on the Earth environmental ecology and politics including history of both theory and actuality For more information please go to the Ishi Nobu website ishinobu.com *Spirit Calls Nature* Marco Masi,2021-04-19 A trilogy on the synthesis of knowledge between science philosophy and spirituality What is the nature of consciousness and the mind Is the mind physical What does science tell us about free will What is reality Is a new way of seeing the world and a new science possible Is a materialistic worldview which reduces everything to the laws of physics the last word Is reason the ultimate tool for knowledge Is the universe an undirected and purposeless clockwork or is there more in life and evolution Can we reconcile science philosophy life consciousness and evolution from a spiritual emergentist perspective These and many other

scientific philosophical and existential questions will be addresses and answered in the frame of a grand vision between East and Wets science and philosophy materialism and spirituality Content of Volume II The world as an illusion according to philosophical idealism consciousness and mind with the unwarranted distinction between primary and secondary qualities the weird world of quantum physics and the question for what is real The intuitional higher mind Western philosophy is revisited from Plato to Spinoza from Berkeley to the philosophers of modernity as Husserl Bergson Teilhard de Chardin and Deleuze whose thoughts and inner perceptions have molded the Western metaphysics and phenomenology Non materialist philosophies which question the nature of mind consciousness and the cosmos such as panpsychism and the return of the cosmic consciousness will conclude the review of Western metaphysics This will set the stage for a new synthesis between science and spirituality the analytic and intuitive mind in the frame of the German writer and natural philosopher W von Goethe and his way of seeing the wholeness of Nature as multiplicity in unity
