translations are conventional conservative and didactic showing preference for an exotic rather than local specificity with systematic manipulation of Australian referents betraying a perception of Australia as antipodean rural exoticism The significance of the study lies in underscoring the manner in which a given culture is constructed in another cultural milieu especially through translated children s literature Cooking Up World History Suzanne I. Barchers, Patricia Marden, 1994-02-15 Take students on a culinary trip around the world and introduce them to other cultures through the recipes research readings and related media offered in this tasty resource More than 20 countries and regions frequently studied in elementary and middle schools are represented Each chapter has a brief introduction that describes the cookery of a culture five to six recipes that provide a complete meal research questions that connect the culture and food to history and an annotated bibliography of reading resources and media Great for social studies and for multicultural extensions Grades K
