Quantum Invariants of Knots and 3-Manifolds Vladimir G. Turaev, 2016-07-11 Due to the strong appeal and wide use of this monograph it is now available in its third revised edition The monograph gives a systematic treatment of 3 dimensional topological quantum field theories TQFTs based on the work of the author with N Reshetikhin and O Viro This subject was inspired by the discovery of the Jones polynomial of knots and the Witten Chern Simons field theory On the algebraic side the study of 3 dimensional TQFTs has been influenced by the theory of braided categories and the theory of quantum groups The book is divided into three parts Part I presents a construction of 3 dimensional TQFTs and 2 dimensional modular functors from so called modular categories This gives a vast class of knot invariants and 3 manifold invariants as well as a class of linear representations of the mapping class groups of surfaces In Part II the technique of 6j symbols is used to define state sum invariants of 3 manifolds Their relation to the TQFTs constructed in Part I is established via the theory of shadows Part III provides constructions of modular categories based on quantum groups and skein modules of tangles in the 3 space This fundamental contribution to topological quantum field theory is accessible to graduate students in mathematics and physics with knowledge of basic algebra and topology It is an indispensable source for everyone who wishes to enter the forefront of this fascinating area at the borderline of mathematics and physics

New Concepts and Applications in Soft Computing Valentina Emilia Balas,János Fodor,Annamária R.

Várkonyi-Kóczy,2012-07-20 The book provides a sample of research on the innovative theory and applications of soft computing paradigms The idea of Soft Computing was initiated in 1981 when Professor Zadeh published his first paper on soft data analysis and constantly evolved ever since Professor Zadeh defined Soft Computing as the fusion of the fields of fuzzy logic FL neural network theory NN and probabilistic reasoning PR with the latter subsuming belief networks evolutionary computing including DNA computing chaos theory and parts of learning theory into one multidisciplinary system As Zadeh said the essence of soft computing is that unlike the traditional hard computing soft computing is aimed at an accommodation with the pervasive imprecision of the real world Thus the guiding principle of soft computing is to exploit the tolerance for imprecision uncertainty and partial truth to achieve tractability robustness low solution cost and better rapport with reality In the final analysis the role model for soft computing is the human mind We hope that the reader will share our excitement and find our volume both useful and inspiring
