Security and Persistence John Rosenberg, J. Leslie Keedy, 2012-12-06 During a short visit to Bremen in December 1989 John Rosenberg had several discussions with me about computer architecture. Although we had previously worked together for more than a decade in Australia, we had not seen each other for over a year following my move to Bremen in 1988. Meanwhile John was spending a year on study leave at the University of St Andrews in Scotland with Professor Ron Morrison and his persistent programming research group. From our conversations it was quite clear that John was having a most fruitful time in St Andrews and was gaining valuable new insights into the world of persistent programming. He was very keen to explore the significance of these insights for the MONADS Project which we had been jointly directing since the early 1980s. MONADS was not about persistent programming. In fact it had quite different origins in the areas of software engineering and information protection. In an earlier stage of the project our ideas on these themes had led us into the world of computer architecture and even hardware design in our attempts to provide an efficient base machine for our software ideas. The most important practical result of this phase of the project had been the development of the MONADS PC, a mini computer which would be better compared with say a Vax. *Persistent Object Systems* Malcolm Atkinson, David Maier, Veronique Benzaken, 2012-12-06 The Sixth International Workshop on Persistent Object Systems was held at Les Mazets des Roches near Tarascon, Provence in southern France from the fifth to the ninth of September 1994. The attractive context and autumn warmth greeted the 53 participants from 12 countries spread over five continents. Persistent object systems continue to grow in importance. Almost all significant uses of computers to support human endeavours depend on long lived and large scale systems. As expectations and ambitions rise so the sophistication of the systems we attempt to build also rises. The quality and integrity of the systems and their feasibility for supporting large groups of co-operating people depends on their technical foundation. Persistent object systems are being developed which provide a more robust and yet simpler foundation for these persistent applications. The workshop followed the tradition of the previous workshops in the series focusing on the design, implementation and use of persistent object systems in particular and persistent systems in general. There were clear signs that this line of research is maturing as engineering issues were discussed with the aid of evidence from operational systems. The work presented covered the complete range of database facilities: transactions, concurrency, distribution, integrity and schema modification. There were examples of very large scale use, one involving tens of terabytes of data. Language issues, particularly the provision of reflection, continued to be important. **Enabling Real-Time Business Intelligence** Malu Castellanos, Umeshwar Dayal, Volker Markl, 2011-08-03 This book constitutes the thoroughly refereed conference proceedings of the 4th International Workshop on Business Intelligence for the Real Time Enterprise BIRTE 2010 held in Singapore in September 2010 in conjunction with VLDB 2010, the International Conference on Very Large Data Bases. The volume contains six research papers which are carefully reviewed and selected out of 12

submissions plus the three keynotes presented at the workshop The topics cover all stages of the business intelligence cycle including capturing of real time data handling of temporal or uncertain data performance issues event management and the optimization of complex ETL workflows XIXth Century Ornamented Types and Title Pages Nicolette Gray,1938 My

Johannes Brahms Jan Swafford,2012-01-11 An illuminating new biography of one of the most beloved of all composers published on the hundredth anniversary of his death brilliantly written by a finalist for the 1996 National Book Critics Circle Award Johannes Brahms has consistently eluded his biographers Throughout his life he attempted to erase traces of himself wanting his music to be his sole legacy Now in this masterful book Jan Swafford critically acclaimed as both biographer and composer takes a fresh look at Brahms giving us for the first time a fully realized portrait of the man who created the magnificent music Brahms was a man with many friends and no intimates who experienced triumphs few artists achieve in their lifetime Yet he lived with a relentless loneliness and a growing fatalism about the future of music and the world The Brahms that emerges from these pages is not the bearded eminence of previous biographies but rather a

fascinating assemblage of contradictions Brought up in poverty he was forced to play the piano in the brothels of Hamburg where he met with both mental and physical abuse At the same time he was the golden boy of his teachers who found themselves in awe of a stupendous talent a miraculous young composer and pianist poised between the emotionalism of the Romantics and the rigors of the composers he worshipped Bach Mozart Beethoven In 1853 Robert Schumann proclaimed the twenty year old Brahms the savior of German music Brahms spent the rest of his days trying to live up to that prophecy ever fearful of proving unworthy of his musical inheritance We find here more of Brahms s words his daily life and joys and sorrows than in any other biography With novelistic grace Swafford shows us a warm blooded but guarded genius who hid behind jokes and prickliness rudeness and intractability with his friends as well as his enemies but who was also a witty drinking companion and a consummate careerist skillfully courting the powerful This is a book rich in secondary characters as well including Robert Schumann declining into madness as he hailed the advent of a new genius Clara Schumann the towering pianist tormented personality and great love of Brahms s life Josef Joachim the brilliant self lacerating violinist the extraordinary musical amateur Elisabet von Herzogenberg on whose exacting criticism Brahms relied Brahms s rival and shadow the malevolent genius Richard Wagner and Eduard Hanslick enemy of Wagner and apostle of Brahms at once the most powerful and most wrongheaded music critic of his time Among the characters in the book are two great cities the stolid North German harbor town of Hamburg where Johannes grew up which later spurned him and glittering fickle music mad Vienna where Brahms the self proclaimed vagabond finally settled to find his sweetest triumphs and his most bitter failures Unique to this book is the way in which musical scholarship and biography are combined in a style refreshingly free of pretentiousness Jan Swafford takes us deep into the music from the grandeur of the First Symphony and the intricacies of the chamber work to the sorrow of the German Requiem allowing us to hear these familiar works in new and often surprising ways This is a clear eyed study of a remarkable man and a vivid portrait of an era in transition Ultimately Johannes Brahms is the story of a great backward looking artist who inspired musical revolutionaries of the following generations yet who was no less a prophet of the darkness and violence of our century A biographical masterpiece at once wholly original and definitive

Transmedia Frictions Marsha Kinder, Tara McPherson, 2021-03-16 Editors Marsha Kinder and Tara McPherson present an authoritative collection of essays on the continuing debates over medium specificity and the politics of the digital arts Comparing the term transmedia with transnational they show that the movement beyond specific media or nations does not invalidate those entities but makes us look more closely at the cultural specificity of each combination In two parts the book stages debates across essays creating dialogues that give different narrative accounts of what is historically and ideologically at stake in medium specificity and digital politics Each part includes a substantive introduction by one of the editors Part 1 examines precursors contemporary theorists and artists who are protagonists in this discursive drama focusing on how the transmedia frictions and continuities between old and new forms can be read most productively N Katherine Hayles and Lev
