offered as an integrative theory For those who favor linear determinism and the narrow treatment of variables one at a time this might seem speculative Others with an interest not just in understanding who we are but how we fit into a vast cosmos might find it intriguing My only hope is that it fosters debate Praise for Evolution Information PersonalityNot since Julian Jaynes The Origin of Consciousness in the Breakdown of the Bicameral Mind has there been such a thought provoking account of human personality Robert DePaolo s description how the mind evolved and its implications for psychiatry are ahead of our time a must read for any student or professional in the fields of philosophy and psychology David Kamen PhD Clinical Psychologist Nashua Counseling Center A revolutionary treatise that includes an invigorating and thought provoking new therapeutic approach Deborah Whitaker Duncklee Transpersonal Therapist Author of Looking Glass Sky The Widow s Walk and Screenplays Coconut Grove and We are Stardust

The Global Imperative Robert P Clark, 2018-02-12 Robert Clark delves into 100 millennia of human history to create a unified and consistent explanation for humankind s inner need to spread itself across the globe He examines key events from different eras such as the voyages of the Chinese treasure fleet the shaping of the Aztec s trade system in MesoAmerica the role of steam powered transport in the supply of an English city the rise of the gas powered engine and the digitization of information in the computer age melding them together to form a framework for understanding the process of globalization Drawing on a variety of academic disciplines including the physical sciences

biology anthropology geography economics political science sociology and demography Clark reveals the spread of humans and their cultures to be part of an ongoing struggle to supply the energy needs of an increasingly large and complex society Entropy and thermodynamics terms often ignored or misunderstood by social science students clearly frame a fascinating vision of humans inherent tendency toward a globalized world Although human expansion has drawn increasing attention in the last several decades as this tumultuous century has progressed Clark shows that the process of globalization is not a recent concept From the very roots of the species humankind has been driven by a range of internal and external factors to expand in order to survive the increasing complexity of human civilization
